

# The best touchscreen phones 2011

Many touch phones have been launched since the first iPhone. However, not every product has a touch screen worth choosing.

**Many touch phones have been launched since the first iPhone. However, not every product has a touch screen worth choosing.**

A good touch screen phone is quite responsive for users to quickly press, drag, and zoom in and out. Here are the best rated phones with 2011 touch screens.

## Samsung Galaxy S2

Galaxy brand has restored consumers' confidence in Samsung's ability to create great phones. Along with the Android operating system and impressive touch screen technology, S2 continues to follow that trend.

It features a 4.27-inch Super AMOLED Plus super-sharp screen, bringing the power of a 1.2GHz dual-core processor and an 8MP camera.

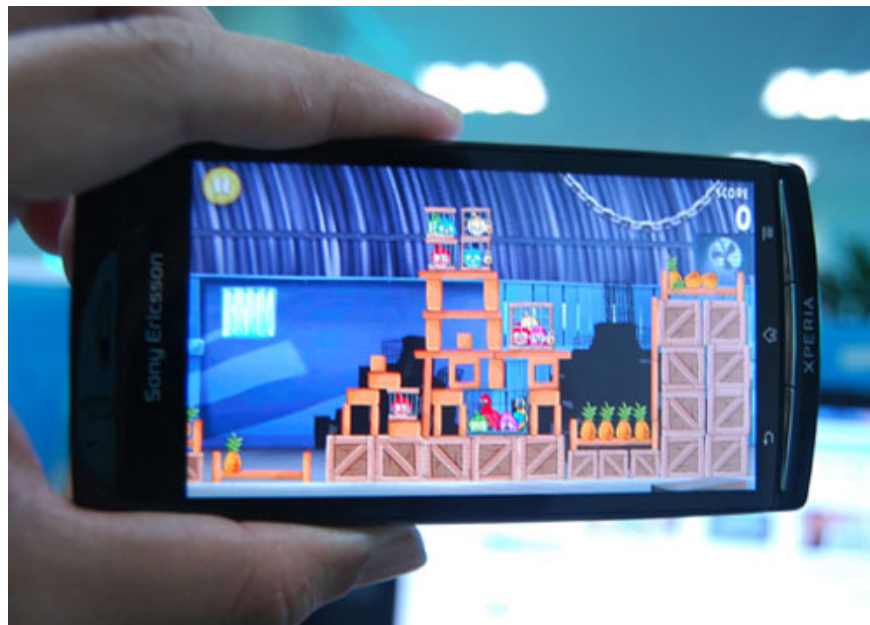

## Apple iPhone 4

The iPhone 4 was born with a lot of praise for the 3.5-inch capacitive touch screen using Retina Display retina display technology. This is really an improvement over the previous iPhone 3GS.

Users will be amazed at the smoothness and quick response on the touch screen of iPhone 4 with the manipulation of collage, zoom, multi-touch, . With 800: 1 contrast and degree 960x640 pixel resolution, iPhone 4 is perfect for watching widescreen movies and sharp photos as well as fine web browsing on a clear display.

## **Sony Ericsson Xperia Arc**

Xperia Arc features a brilliant 4.2-inch touch screen. The curved design of the body makes them one of the most comfortable products to hold. The product uses a new Reality Display with illuminated LED backlighting with

Mobile Bravia Engine technology, allowing users to watch videos and surf the web in a sharp, touchscreen display with great responsiveness. fast.

## **Samsung Galaxy S**

Galaxy S is equipped with a 4-inch Super AMOLED capacitive touchscreen that is highly appreciated for the brightness of the screen. WVGA 480x800 pixel resolution is behind the iPhone 4 (640x960) but users can still get vivid images, a true black color and outstanding contrast.

Although it is not bright after the 'younger brother' S2 was born, this 'phone' is still one of the best touch screen phones that users can trust in the image quality as well as the ability. responsive.

## **LG Optimus 3D**

While Nintendo launched a 3D screen without glasses in gaming devices, LG was the first to equip 3D display technology for Optimus 3D smartphone.

Products equipped with 4.3-inch Super LCD screen, operating on Android 2.2 operating system brings a vivid and bright picture surprising when surfing the web and watching movies. Meanwhile, parallax technology will help the phone display 3D games and video effects without glasses.

While the dual-core processor gives Optimus 3D the power, two 5MP cameras allow users to record 720p 3D video, capture 3D images and transfer 2D movies to 3D.
