

The best video rotation software

The best video rotation software. Introducing to you the best video rotation software today, with these software you can rotate videos as you like with just a few simple steps, anyone can do it.

Have you ever encountered the case when recording a video on the phone and when watching that video on the computer, the video was rotated horizontally or rotated 180 degrees looking very uncomfortable. Now you will be wondering, how to turn the video back to its original position? Of course, to solve this problem we will definitely need software intervention to be able to rotate the video to the right position. And in the following article, Thuthuatphanmem.vn will introduce to you the best video rotation software today, with these software you can rotate videos as you like with just a few simple steps, anyone can do. Please follow along.

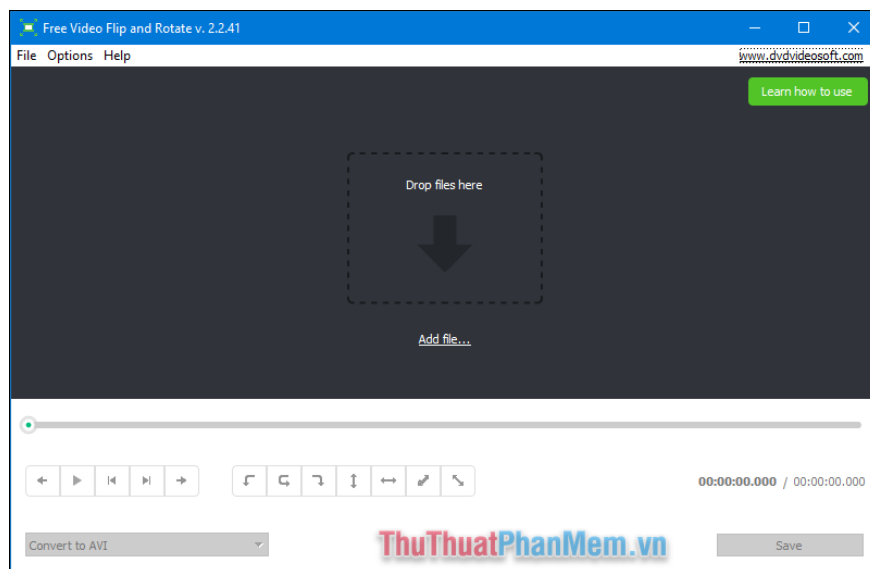

The software that Thuthuatphanmem.vn introduces to you is called **Free Video Flip and Rotate**. This is a software whose main function is to rotate and flip videos, this software possesses a fairly simple interface and easy to use. Especially this software is completely free so you will not have to worry about copyright issues.

You can download the software at the following link:

<https://www.dvdvideosoftware.com/products/dvd/Free-Video-Flip-and-Rotate.htm>

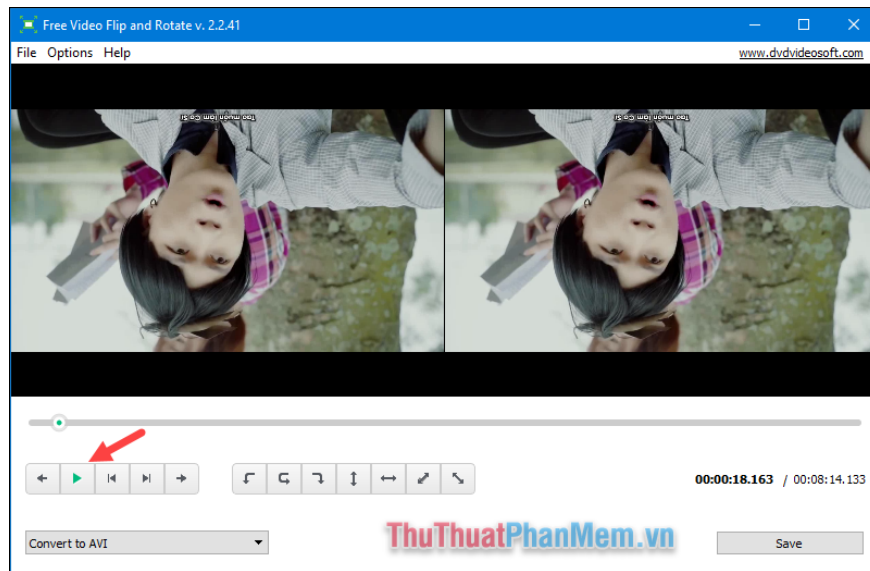

After downloading and installing the software on your computer, the installation steps are very simple, just **Next** is okay.

And here is the main interface of the software:

To rotate the video upside down, select Add file to select the tilted video in your computer.

After selecting the video you can press the Play button to preview the video.

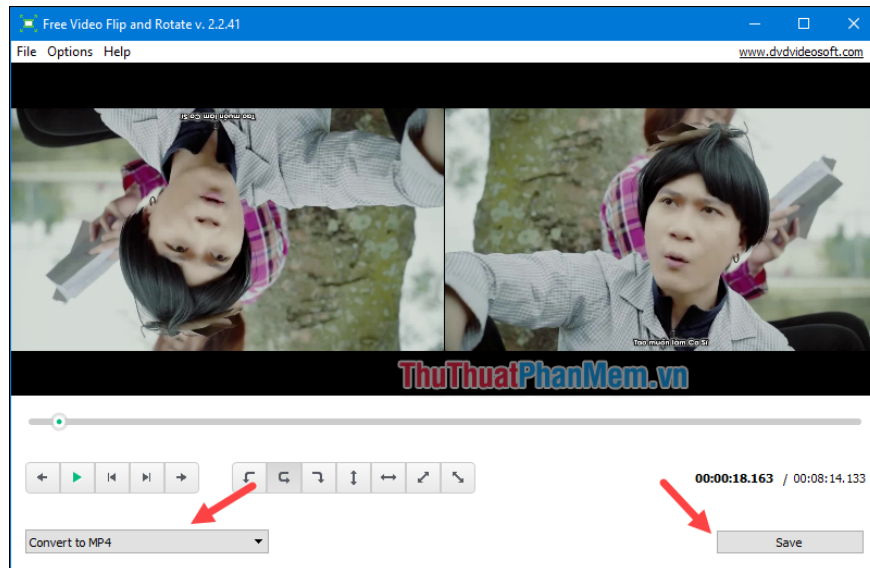

You can see the video is divided into two screens. Where the left is the original video, the right is the video after rotation.

To rotate the video, please click one of the function buttons below for the video to rotate as you like. You will see the video on the right rotate when you press the button.

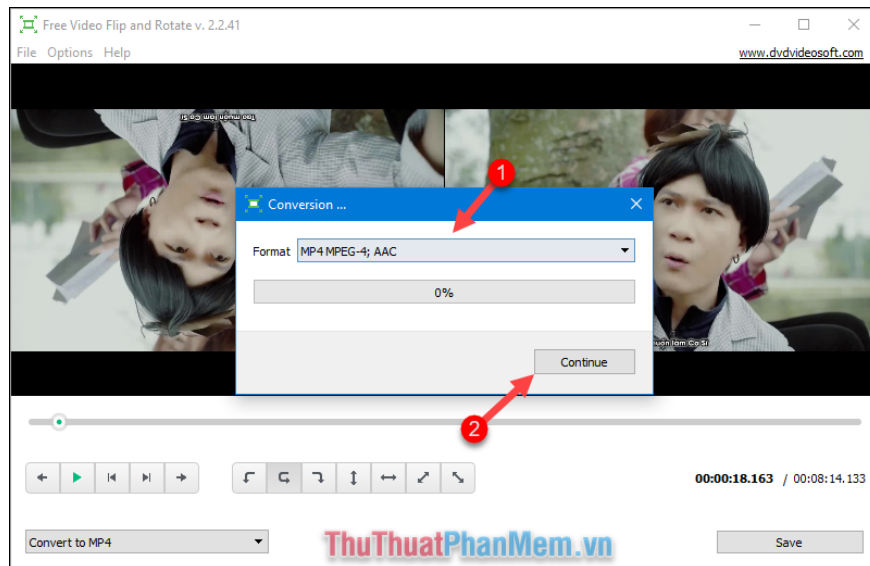

Also you can convert video formats by selecting the option in the lower left corner dialog box. Here I will format MP4.

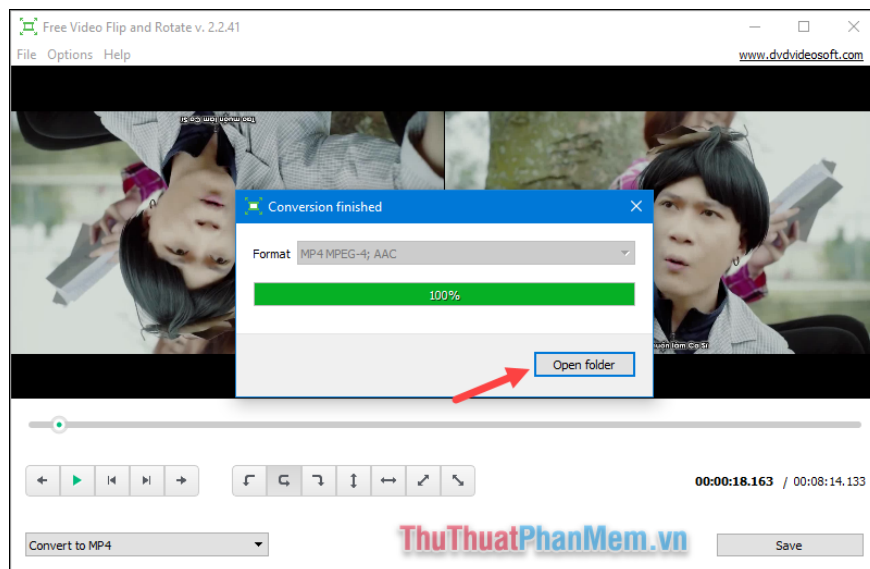

Finally click **Save** to confirm.

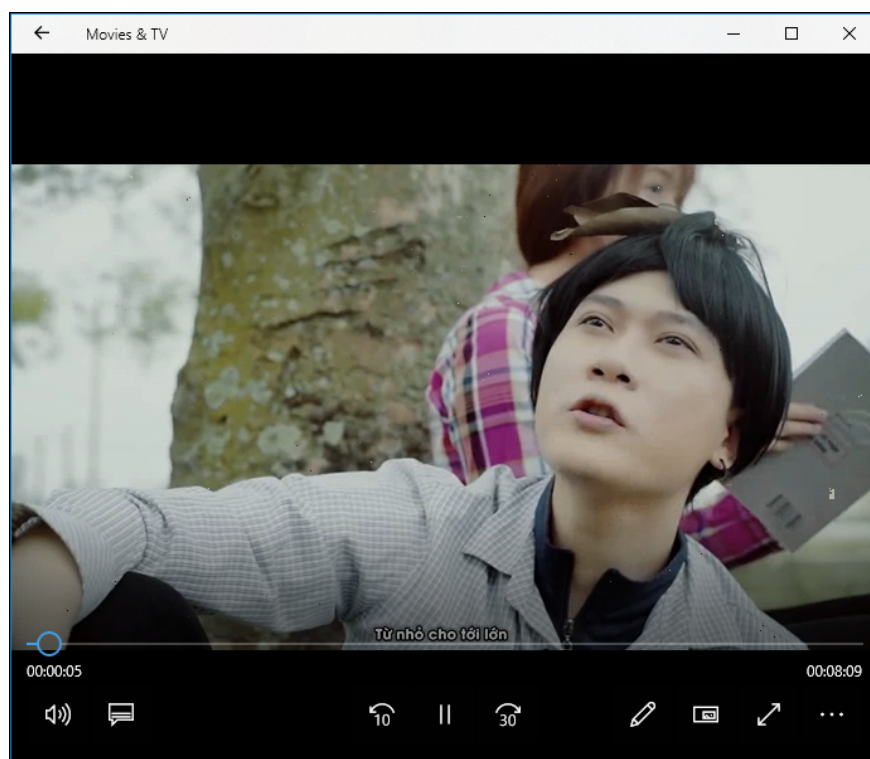

When a dialog box appears, select the video output quality and then click **Continue** .

You wait a bit for the video conversion process to take place, after the conversion is successful, click **Open Folder** to open the folder containing the video after rotation.

And we have successfully rotated the video:

So with just a few simple steps, we can rotate the video as you like using **Free Video Flip and Rotate software**. If you find a good article, please share it with your friends. Good luck.
