

# The best webcam models 2018

Today, as you can see, all-in-one laptops or computers are integrated with a mini webcam. However, it is fair to say that these webcams are of poor quality, even on high-end devices.

Today, as you can see, all-in-one laptops or computers are integrated with a mini webcam. However, it is fair to say that these webcams are of poor quality, even on high-end devices. Moreover, for those who often have to work permanently in the office with a desktop computer, a removable webcam is still an essential device. Considering the current webcam market, sometimes because of the popularity of the built-in webcam, users don't know or imagine that these devices are about to no longer live. However, the world of webcams is still very large, and even inferior to other devices. So what do we expect from a webcam that can be considered good?

The answer will depend largely on what you intend to do with this device. Are you a streamer, broadcast live stream on youtube and Facebook every night with thousands of fans? Or simply use it to chat, make video calls with friends and partners? However, no matter what your purpose is, a must-have factor for a removable webcam is to give better image quality than the built-in webcam. In addition, the form, style, features and convenience of use are also factors that we need to consider. In short, if you are looking to buy the best webcam to make video calls through Google Hangouts or Skype, we have here a list of the best webcams on the market in 2018, right here. So sit back, prepare a cup of tea, relax and choose for yourself the most suitable device!

1. How to adjust the location of the webcam when Live Stream Video on Facebook

## The best webcam

1. Logitech C922 Pro Stream - Price from VND 1,950,000

2. Razer Kiyo - Price from VND 2,990,000
3. Microsoft LifeCam HD-3000 - Price from VND 1,250,000
4. Mevo - Price from VND 4,000,000
5. Microsoft LifeCam Studio - Price from VND 2,300,000
6. Logitech Brio - Price from 5,000,000 VND
7. Senz3D Creative Labs - Price from VND 4,000,000
8. Logitech C930e - Price from VND 2,100,000
9. AUSDOM 1080P HD - Price from 600,000 VND

## **Logitech C922 Pro Stream - Price from VND 1,950,000**

Resolution: 1080p | Features: Font deletion, automatic low light calibration, 720 / 60fps when stream, auto focus, auto-weighting.

Advantages:

1. Able to work well in low light conditions.
2. Support for removing fonts.
3. Give 720 / 60fps video quality when streaming.

Defect:

1. The design is not much different from the old C920.
2. There is no RealSense technology

*\* RealSense is a technology that allows users to interact with a computer (desktop or laptop) through body gestures, including two hands, faces, and gestures.*

Logitech C922 Pro Stream is Logitech's latest webcam. Although the design is quite similar to the predecessor C920, but thanks to this, the C922 still retains its inherent luxurious looks. In addition, as the name suggests, the C922 pro delivers the right quality with a high-end web camera, promising not to disappoint gamers with full HD 1080p recording quality. It can also automatically adjust to the best in all lighting environments to be able to ensure image detail for the streamer. The font removal feature also helps to highlight portraits, making the

streamer stand out more clearly on the frame.

## **Razer Kiyo - Price from VND 2,990,000**

Resolution: 1080p | Features: Led face lighting, compatible with OBS and Xsplit stream software

Advantages:

1. Convenient lighting
2. Easy to use

Defect:

1. Price is quite high

Not only is the design unique, Razer Kiyo is also one of the best webcams for streaming-related tasks (live stream) - a very popular gadget today. Saying Razer Kiyo is a device that is dedicated to streamer users is not wrong because it almost omits all the high-end features commonly found on devices of the same price and only focuses on what is considered important. It is important for the streamer, which is good image quality and the ability to balance light highlights the details. A direct circular light on this device ensures that you won't have to spend too much time adjusting the lighting accordingly, simply plugging and running.

## **Microsoft LifeCam HD-3000 - Price from VND 1,250,000**

Resolution: 720p |Features: Automatic color correction, active noise removal.

Advantages:

1. Good price
2. Good design

Defect:

1. Only supports the maximum resolution of 720p HD

If you need a low-cost, well-designed device that satisfies the needs for Skype, Messenger, Facebook or AOL, the Microsoft LifeCam HD-3000 is a device worth considering, giving you performance on price. very good. You don't get 1080p video at this price, but you'll get very advanced features like automatic color correction, a one-way noise reduction microphone and smartly designed stand, to fit in. laptop and desktop computer. In summary, this is a device with good price-performance, suitable for many users.

**Mevo - Price from VND 4,000,000**

Resolution: 2160p |Features: 4K recording, compatible with mobile devices, live video editing and audio, Bluetooth 4.1.

Advantages:

1. High mobility
2. Compatible with many different devices

Defect:

1. Price is not good

If you are a regular live stream or make money from live stream, Mevo is a very rewarding webcam. In addition, if you are interested in mobile capabilities, such as playing live video from anywhere (with mobile network connection) with high quality, there is no product on the market that is suitable than Mevo. This is because the device has a very smart design, just like a miniature can, to maximize mobility. While the price is quite high, the high-end features equipped on Mevo are also noticeable, such as the ability to record videos at high quality, and Bluetooth 4.1, giving users the experience only available on High-end equipment.

## **Microsoft LifeCam Studio - Price from VND 2,300,000**

Resolution: 1080p |Features: Color correction, hi-fi microphone, integrated Skype

Advantages:

1. Wide rotation angle
2. Wideband microphone for better sound quality

Defect:

1. High selling price
2. Design is only suitable for working environment in enterprises

Targeted at professional users who use large screen devices, the LifeCam Studio has a familiar combination of full HD 1080p video recording capability and support for making live video calls. in 720p resolution. In addition, this device is also capable of rotating 360 degrees and can be mounted on a tripod. It's also worth mentioning the very good autofocus feature of LifeCam Studio. As its name suggests, the webcam actually carries the features of a studio device, with a broadband microphone that provides clear recording and Microsoft's TrueColor system that changes the exposure. flexible way, for the video quality is always optimal. It can be said that Microsoft LifeCam Studio is a great choice for seminars or business presentations.

## **Logitech Brio - Price from 5,000,000 VND**

Resolution: 2160p | Features: 4K movie recording, 5X Zoom, Windows Hello, HDR

Advantages:

1. 4k UHD resolution
2. Compatible with Windows Hello

Defect:

1. Price is quite high

During the product launch, Logitech's representative said that the Logitech Brio's mission was to bring the 4k quality closer to the user, and indeed, the webcam has done a good job. assigned. With stunning 2160p resolution and HDR compatibility, Logitech Brio Webcam has finally brought 4K HDR performance to the webcam world which is quite tedious. In addition, it is also very compatible with Windows Hello. And speaking of convenience in use, it is impossible not to mention Logitech Brio's design. The product is equipped with a flexible rack, allowing you to position it wherever you want. It can be said that this is one of the most comprehensive webcams on the market today.

## **Senz3D Creative Labs - Price from VND 4,000,000**

Resolution: 1080p |Features: Font removal, low light editing, Windows compatibility Cortana and Hello, face detection.

Advantages:

1. Compatible with Windows Cortana and Hello
2. Support for removing fonts

Defect:

1. Price is quite high

Creative may not be the first brand you think of when looking for the best webcam, but with the Creative Labs Senz3D model, your thoughts will also change. Saying this is a webcam of the future is not exaggerated by the trendy features that it is equipped with. High-tech 3D scanner and face recognition technology promises to bring users fascinating experiences in both AR functions and even gaming. Should also mention the ability to remove fonts and good compatibility with Windows Cortana and Hello. Creative Labs Senz3D is not a cheap technology toy, but what it gives users is really 'worth the money'.

## **Logitech C930e - Price from VND 2,100,000**

Resolution: 1080p |Features: Integrated processor on circuit board, Zeiss lens, wide angle lens.

Advantages:

1. There are integrated processors on the circuit board
2. Wide rotation angle

Defect:

1. High prices, users can choose the 920 only slightly worse but the price is much better.

C930e is claimed to be Logitech's most advanced HD webcam and it is also one of the most expensive webcams on the market. However, speaking of which is true because unlike traditional webcams, which rely on a PC to perform heavy tasks, the Logitech C930e can completely do 'delicious' tasks from a single task. Simple to complex like video encoding, thereby providing better video quality due to the integrated processing chip. The wide angle of up to 90 degrees is convenient for many situations, for example, if the streamer wants to rotate handcam both mouse and keyboard manipulation, it is not difficult for C930e. This also means that it is suitable for working in videoconferencing and business presentations, and of course video calls, live streams from personal computers as well. In addition to webcam functions, the C930e can also be used as a mini camcorder in small space situations, or the need for frequent travel. So the Logitech C930e is a very reliable camera.

## **AUSDOM 1080P HD - Price from 600,000 VND**

Resolution: 1080p |Features: Built-in microphone with noise reduction, light enhancement technology, flexible design

Advantages:

1. Full HD resolution
2. Cheap

Defect:

1. Manual focus

If you are looking for a full HD webcam at a price that can only be found on regular HD products, this is the device for you. AUSDOM can record videos with resolutions up to 1080P full HD while still supporting 12MP still images. In addition, features such as active noise cancellation and light balance are also 'money-eating' elements on this device. Without autofocus will be a small but acceptable disadvantage. And it is important that the product is too good for the user.

Above are the webcam samples that are considered the most outstanding on the market according to each criteria and price segment, wish you find yourself a product like that!
