

## The best Windows 8 tablets today

Tablet products running Windows 8 with many advantages in design or features, in which many devices can be used as laptops after adding a keyboard.

**Tablet products running Windows 8 with many advantages in design or features, in which many devices can be used as laptops after adding a keyboard.**

### Dell XPS 10

Dell XPS 10 is a hybrid laptop device running Windows RT operating system and preinstalled with **Microsoft Office 2013** software suite . The application only runs applications from the Windows Store and cannot run applications for the **Windows 8** desktop. Two USB 3.0 ports and microSD card slot help users expand memory.

The 10.1-inch screen with 1366x768 pixel resolution is great for text editing, but is not really outstanding for movie viewing purposes. However, the cramped keyboard makes the Dell XPS 10 not very suitable for those who need a lot of editing. The device has a good battery life when attached to the keyboard dock.

### Asus VivoTab Smart ME400

With Intel processor and full Windows 8 operating system, Asus VivoTab Smart can run applications on Windows Store and desktop software. The device is also preinstalled with Microsoft Office.

VivoTab Smart is highly appreciated for its power saving and connectivity support, including NFC connectivity and connection to peripherals via Bluetooth 4.0. The rear 8 Mpx camera supports Flash and enables good quality Full HD video recording. It also has a 2 megapixel camera in front.

## **Dell Latitude 10**

The product is aimed at business people, **Dell Latitude 10** runs Windows 8, has fingerprint reader and smart card reader. The Latitude 10 has four USB ports and a number of other ports to connect to the monitor and an external keyboard, turning the Latitude 10 into a complete personal computer.

Dell Latitude 10 uses removable batteries for quite a long time. When connected to a stand, the machine can run continuously for nearly 18 hours.

The Dell Latitude 10 also supports a stylus, with an 8-megapixel rear camera supporting Flash, autofocus and 2-megapixel front camera.

## Asus Vivo Tab RT

**Asus Vivo Tab RT** runs Windows RT operating system and preinstalled Microsoft Office 2013. The 10.6-inch screen of Vivo Tab RT lacks Full HD resolution but in return, is equipped with scratch-resistant tempered glass Corning Fit Glass. The touch screen is very responsive, switching between applications quickly. The rear 8Mpx camera holder supports autofocus and Flash, Full HD video recording and 2 Mpx camera in front. Vivo Tab RT has a high quality design and 32 GB flash memory household.

## Microsoft Surface RT

As the most famous laptop hybrid tablet running Windows RT, the Surface RT has a lot of stylish color options. The machine is equipped with a strong protective shell with VaporMg material. The 10.6-inch widescreen is suitable for running two applications side by side. The Surface RT also has Touch Cover - A set of touch

keyboards with touchpad. Touch Cover attached to Surface by magnet connection and removable. Touch Cover uses pressure sensor technology to help users feel like typing on a real keyboard. The Surface RT has a bright and clear screen although the resolution is quite low.

## Samsung Ativ Tab

**Samsung Ativ Tab** 10.1 inch is equipped with powerful 1.5 GHz processor and 2 GB RAM. Brushed aluminum material provides a high-quality design feel. It comes with USB ports, microSD card slot that allows memory expansion up to 32 GB or 64 GB. Windows RT operating system works well on the touch screen, although there are a number of apps already available on Android or iOS tablets. The rear 5 megapixel camera can record 720p video, in addition to a 1.9 Mpx front camera.

## Acer Iconia W700

Acer Iconia W700 boasts a separate dock and keyboard with excellent connectivity options such as an HDMI port to connect the device to an external monitor and PC. Acer Iconia W700 owns a sharp screen and a solid aluminum body, but the plastic keyboard dock is a bit bulky and can be easily broken when put into the bag on the way. Because of these disadvantages, Acer Iconia W700 is still best suited for home use.

## **HP Envy x2**

The keyboard dock of the HP Envy x2 provides multiple connectivity ports such as HDMI ports to connect the device to an external monitor. It has an 11.6-inch screen, runs Windows 8 with a Windows Start button at the bottom. It has an 8-megapixel rear camera that supports Flash, a front webcam and Beats Audio technology for music lovers, though the speaker is a bit weak.

## **Samsung Ativ Smart PC**

**Samsung Ativ Smart PC 11.6 inch** is a hybrid laptop model running full Windows 8 operating system, with clamshell design when connected to the keyboard. The S-Pen works correctly on the touch screen. 64 GB internal memory can be expanded via microSD card slot. Ativ Smart PC also has USB, micro HDMI and Bluetooth 4.0 ports. The device has a relatively long battery life although the performance is not really high.

## **Microsoft Surface Pro**

**Microsoft Surface Pro** is one of the tablet models of today's best laptop with complete Windows 8 operating system and Core i5 processor, keyboard and protective cover. The Surface Pro runs almost all applications of the Windows desktop.

## **Lenovo IdeaPad Yoga**

**Lenovo IdeaPad Yoga** is extremely flexible. You can flip the 360-degree keyboard to use the device in multiple poses. When the device is in a position without using the keyboard, the keyboard will automatically turn off. So you can use IdeaPad Yoga's 13-inch screen like a large-sized tablet without fear of mistakenly pressing the keyboard. IdeaPad Yoga can also use 1Mpx camera to identify manual controls.

## **Samsung Ativ Smart PC Pro**

Samsung Ativ Smart PC Pro runs full Windows 8 operating system, equipped with Intel Core i5 chip. With keyboard dock is coupled with hinges, the device looks like an ultrabook. The S-pen and the right mouse button work well with the 11.6-inch screen. Smart PC Pro screen is very sharp and brilliant.

## **Sony Vaio Duo 11**

When sliding the Vaio Duo 11's 11.6 inch Full HD screen to the back, you will see the keyboard exposed. Tablets and keyboards are attached together by a hinged and inseparable hinge. Machines running Windows 8, using Intel Core i5 chips and stylus, are suitable for entrepreneurs. Vaio Duo 11 can run heavy Windows applications like Photoshop. However, the keyboard lacks a touchpad, so you must work on the touch screen or USB mouse. Sony Vaio Duo 11 has USB 3.0 port, Ethernet, HDMI, VGA port and SD card slot.

## **Dell XPS 12**

The Dell XPS 12 is a 12.5-inch laptop with a spacious keyboard and touchpad. Considering its role as a laptop, the device is quite powerful with high-speed processor, 8 GB RAM and 256 GB SSD, but considering it as a tablet, the device is slightly heavier despite the Full HD screen. .

## **Asus Taichi**

**Asus Taichi** is one of the most unique tablet designs today with 2 screens, 1 screen on the lid and an internal screen. Asus Taichi 21 offers 4 different screen modes: notebook mode (internal screen), tablet mode (external display on the lid), mirror mode (both display the same content) and 2-screen mode (the external screen is the secondary display for the internal screen). The 2-screen mode is extremely useful for entrepreneurs, as it allows displaying presentations or presenting business documents to people sitting opposite. Good speaker system helps Asus Taichi more suitable for entertainment purposes.

## **Lenovo Thinkpad Helix**

The biggest advantage of Lenovo Thinkpad Helix 11.6 inches is flexibility. You can use Thinkpad Helix as a tablet when separating the keyboard, flip the machine to turn 180 degrees to get the keyboard dock as a stand or use in laptop mode.

The Thinkpad Helix supports the Wacom stylus, which supports 3G, 4G and NFC connectivity.

# Panasonic ToughPad FZ-G1

ToughPad FZ-G1 is not sleek but attractive thanks to its high durability. The device runs Windows 8 Pro, supports a stylus that can be used as a mouse or customized according to the intended use. The ToughPad FZ-G1 is advertised to withstand falls of up to 4 meters. Core i5 processor and 4 GB RAM help start Windows 8 within 6 seconds. Removable battery for about 8 hours.
