

The biggest mistake in Bill Gates' life

Bill Gates is considered a great person in the technology world, who inspires many generations of young people later. In his time of leadership, with his talent, his genius vision, he brought Microsoft to the top and almost without a worthy opponent. But making people who do not have the wrong time, and Bill Gates also can not escape that natural law.

As a talented and visionary leader, Bill Gates has built a powerful Microsoft empire today.

Bill Gates is considered a great person in the technology world, who inspires many generations of young people later. In his time of leadership, with his talent, his genius vision, he brought Microsoft to the top and almost without a worthy opponent. But making someone who doesn't have a mistake, and Bill Gates cannot escape that natural law:

1. Conscious to the law

As the creator of a software empire today, Bill Gates is also the target of many copyright-related lawsuits.

' The lawsuit between the United States and Microsoft is a strange civil war. Specifically, on May 18, 1998, the Justice Department and 20 states in the United States sued the country's pet company with allegations of illegal competition . '

2. Bill Gates dislikes open source

His business line is always against this. Try looking at Android, the open source nature has helped this operating system rise and compete with iOS. Android is based on Linux, so many years ago Linux has always been one of the main open source objects attacked by Bill Gates.

3. Don't take care of Windows

Windows operating system has helped Bill Gates become the richest person in the world for many consecutive years. But the later this operating system got more criticism. Perhaps he did not take good care of his most precious child, especially in later times.

4. Bill Gates let Windows Mobile grow

This proves that he has exhausted creativity for the mobile operating system. If you build a non-Windows operating system, it may be different.

5. Bill Gates abandoned DOS

This is a very stable and promising operating system. Previously, MS-DOS once dominated on simple machines because of its ability to operate efficiently and consume less resources, if he continued to maintain and develop this operating system, it would most likely help. for Microsoft.

6. Bill Gates is not interested in cloud computing technology

Because he holds the monopoly of Windows. However, this is one of his biggest mistakes.

7. Bill Gates allows Windows Millenium to launch the market

This operating system is a testament to the lack of talent and brainpower at Microsoft, its weakness has frustrated users.

8. Bill Gates underestimates the search feature

Look at Google now see. In fact Bill Gates was interested in this array in the late 90s, but his mistake was to give up it soon.

9. Microsoft Zune is a mistake

A family of wealth is pouring into this device, but the profits are not absorbed. John Biggs on Crunchgear had an article entitled ' **Who killed Microsoft?** 'A reader answered - ' *Not me, I'm a Zune fanboy, I don't like iDevices. But my girlfriend uses iPod Touch, and now we spend time with iTunes, what else can I do?* '

10. Xbox is too expensive

For a console game, Xbox is too expensive and users will be looking for a cheaper console. This is why the Xbox has to cut prices to compete with Sony's PS3 and Nintendo's Wii.
