In the process of using Bluestacks you may face Bluestacks failure with server failure: BlueStacks Failed to Connect to Server. No App Found. Please check your Internet Connection and Try Again. In the article below, Network Administrator will show you how to fix this error.

In the process of using Bluestacks you may face a failed Bluestacks connection to the server: " *BlueStacks Failed to Connect to Server. No App Found. Please check your Internet Connection and Try Again* ". In the article below, Network Administrator will show you how to fix this error.

Fix the Bluestack error connecting to the server failed

1. Disable the antivirus program temporarily

- If using antivirus programs, proceed to disable those antivirus programs.
- Open Bluestacks and sync Bluestacks to your Google account.
- Activate antivirus programs.

2. Edit Bluestacks permissions

Follow the steps below to fix Bluestacks errors:

- First access **C: Program Files (x86)**.
- Right-click the **Bluestacks** folder.
- Select **Properties** .
- Select the **Security tab** .
- Click the **Edit** button.
- Here, select the username on your system.
- Check **Allow** for **Full control** item.

- Click **OK** . Then select **OK** again.

3. Install the application via Apk

If you still face Bluestacks errors, you can download the application's Apk file and install it directly on the system.

Refer to some of the following articles:

1. Play Android games on Windows with BlueStacks
2. 4 ways to run Android apps on your computer
3. BlueStacks adds 750,000 Android applications to the MAC
