

The brand new way to use Opera One

Opera One browser is a completely new browser with new technologies integrated with the browser, changing the interface to bring new experiences and smoother interaction when using the browser.

In particular, Opera One upgraded the tab grouping feature called Tab Islands for users to manage tabs on the browser more effectively. Here are the basic instructions for using the Opera One browser.

Instructions for using Opera One browser

Step 1:

First of all, download Opera One browser according to the link below and then proceed to install it on your computer as usual.

Step 5:

The left side is a sidebar with many different utilities, especially ChatSonic and ChatGPT so that users can immediately use these two tools.

To be able to use ChatGPT or ChatSonic tools, users need to have an account to log in to these two services.

Step 6:

The tab grouping feature, also known as Tab Islands, is designed and operated effectively to make it easier for us to manage common domain tabs. Each tab island is represented by a different colored vertical line. When clicking on that vertical line, the tabs contained in that tab island show and hide.
