

# The cause of error codes and failures on air conditioning, air conditioning Sumikura

TipsMake.com's article will provide the air conditioner error code, Sumikura air conditioner as well as the most common errors on this device.

Air conditioner, air conditioner Sumikura is a product line from Malaysia and is very popular in Vietnam market. As with many other air conditioners, this device may also have problems during operation. In order to help you find the cause and make a timely correction, TipsMake.com offers the most common **air conditioning error code, Sumikura** .

## Sumikura air conditioner code, air conditioner

### Error code F1 (error code 11)

Error name: Error of temperature sensor tube (plastic)

Cause: Broken room temperature sensor, circuit board error, sensor wrong position or sensor line is not connected.

### F2 error code (error code 12)

Fault name: Error sensor copper pipe indoor unit

Cause: The indoor unit pipe sensor is broken, the indoor unit circuit board fails, the sensor is set to the wrong position or the sensor cable is not connected.

### F3 error code (error code 13)

Error name: Sensor error of outdoor unit pipe

Cause: Missing sensor of outdoor unit pipe, circuit board error, sensor wrong position or sensor wire is not connected.

### F4 error code

Fault name: Error on indoor unit fan

Cause: The temperature sensor of the indoor unit is broken, the indoor circuit board is broken, the motor is cold, the motor wire fan or low voltage is broken (below 180 V).

### **Error code P3**

Fault name: Freeze protection error

Cause: Road sensor with broken indoor unit, indoor circuit board fault or cold system leaking gas.

### **Error code P2**

Error name: Room temperature error is too hot

Cause: Capacitor of the indoor unit fan and capacitor of damaged outdoor unit; damaged motor fan indoor unit and outdoor unit; Damage sensor pipeline indoor unit.

### **E3 error code**

Error name: Sumikura conditioner reports E3 error as a power failure.

Cause: Open circuit, broken CB, damaged control board on the indoor unit

### **E4 error code**

Error name: Remote error lost effect.

Cause: Sumikura Air Conditioner reports E4 error may be caused by remote failure or low battery, out of battery or board receiving signal on the indoor unit is broken.

### **Error code E5**

Error name: The error of the wind blows from the indoor unit with bad smell.

Cause: Due to mold in the indoor unit; The indoor unit drain pipe directly connected to the toilet or gas drain system without steam trap, causing the bad smell in the exhaust pipe or the gas pit to go back to the indoor unit to create bad smell; Cold gas leaked.

### **Error code E6**

Error name: The indoor unit error is watery, frost or snow.

Cause: Because the drain hose is blocked or lost; the indoor unit is too dirty; the indoor unit has a number of gaps too big (the wire is the manufacturer's fault); The indoor unit fan does not rotate or spin slowly.

### **E7 error code**

Error name: Air conditioner error is cold or not cold.

Cause: Because the operation mode adjustment on the control is not correct (for example, if you are controlling the Dry, Fan, Heat mode, of course the air conditioner will not be cold) or the air conditioner will deflate.

### **Error code E9**

Error name: Error in wind blowing out outdoor unit is not hot.

Cause: Because the outdoor unit fan does not rotate or turn slowly; compressor does not run; wrong mode on remote; outdoor unit has a problem or lack of gas.

Hopefully , **the air-conditioned error codes and Sumikura cylinder** that we shared above will help you. Please contact META.vn for advice and order all kinds of genuine, cheap Sumikura air conditioners.
