2. How to use the Clipboard Master to save files and documents to the Clipboard
3. 7 apps make it easier to select text when copying on Android

## Summary of clipboard management application

### 1. Ditto

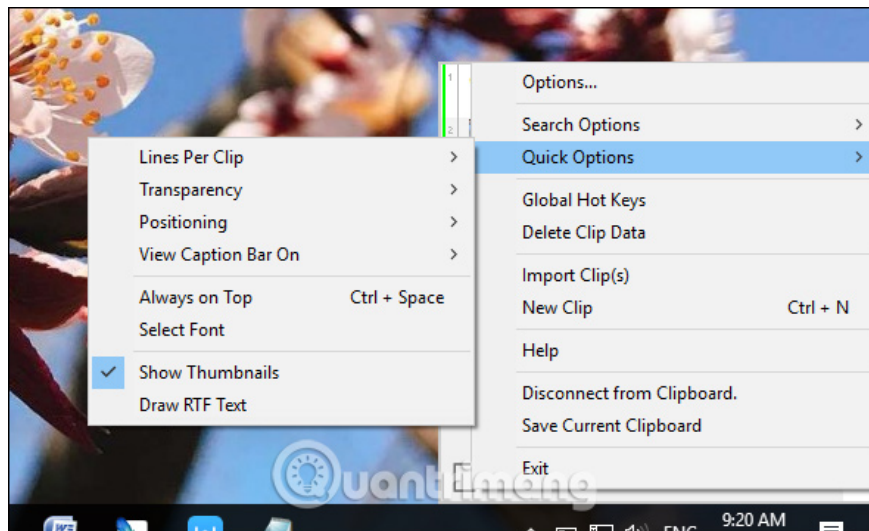

1. <https://sourceforge.net/projects/ditto-cp/>

The Ditto tool supports storing different text, images, and HTML content, and you can create shortcuts for each of them. In addition, the tool has some additional features such as choosing to save the content with all uppercase letters or all lowercase letters, giving priority to displaying saved content, .

In the Clipboard interface, there is a search bar to search for saved content.

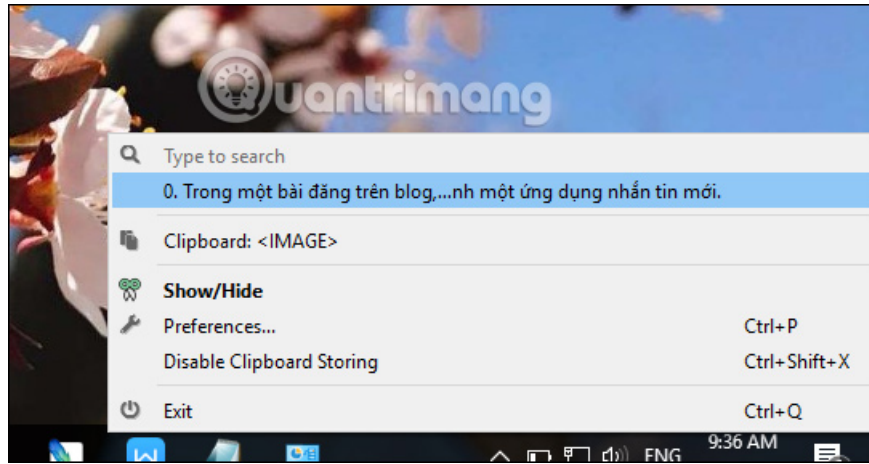

Size of the clipboard box can enlarge or shrink, edit content with available editor. The optional parts in the tool's settings have a lot to change the settings.

## 2. CopyQ

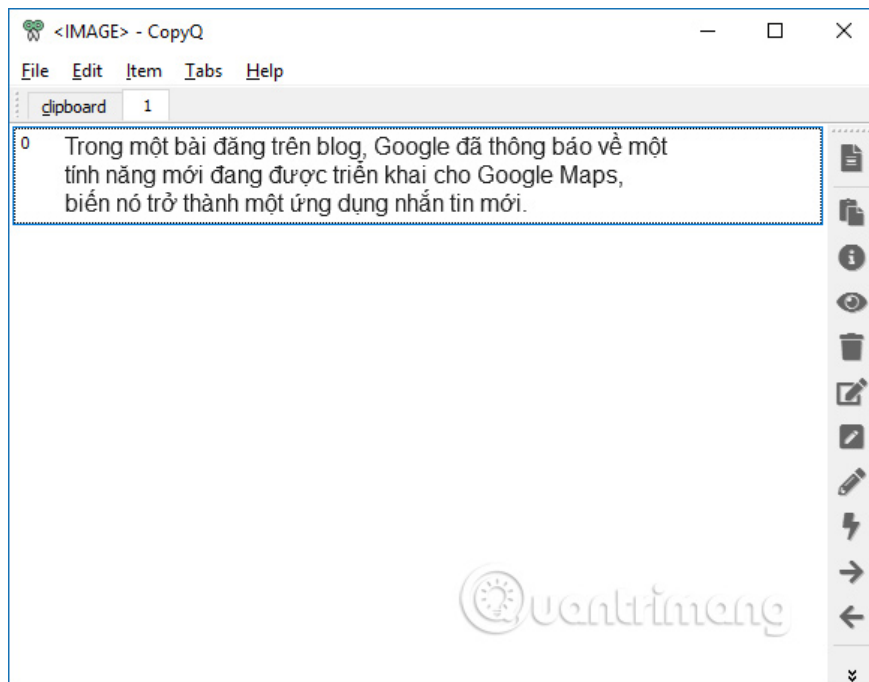

1. <http://hluk.github.io/CopyQ/>

CopyQ also allows storing various types of content such as text, HTML, images, . and has its own clipboard manager to preview in the system tray.

CopyQ's interface supports many tools in the process of saving and managing content. In particular, you can create multiple content management tabs. Thus users can be divided into multiple content tabs by multiple topics for easy management.

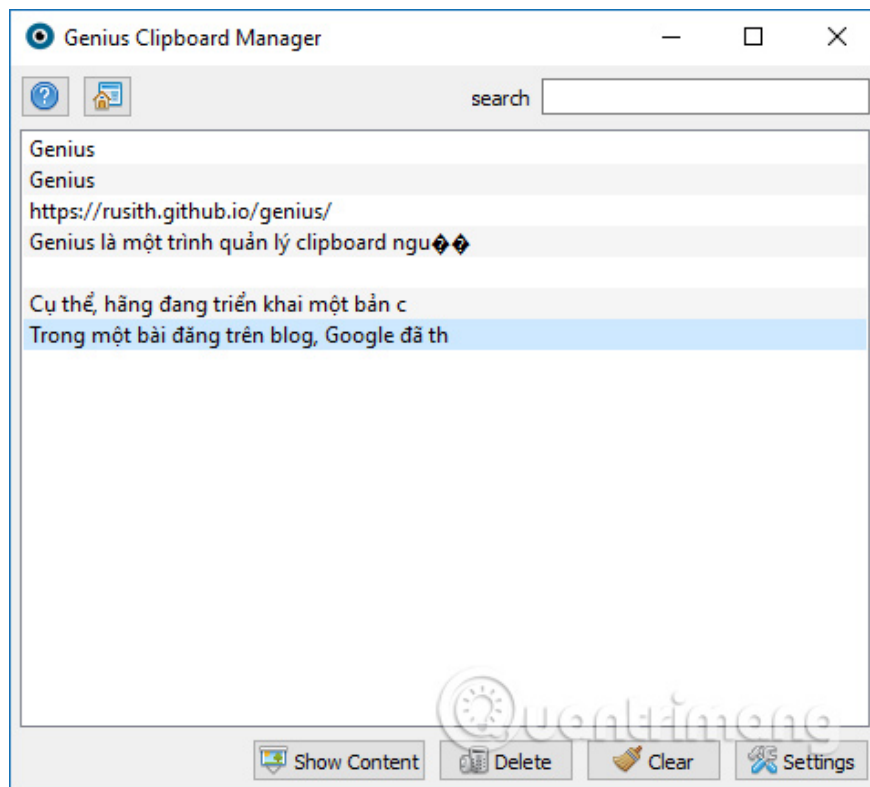

In addition, the menu bar above also supports various features and customizations.

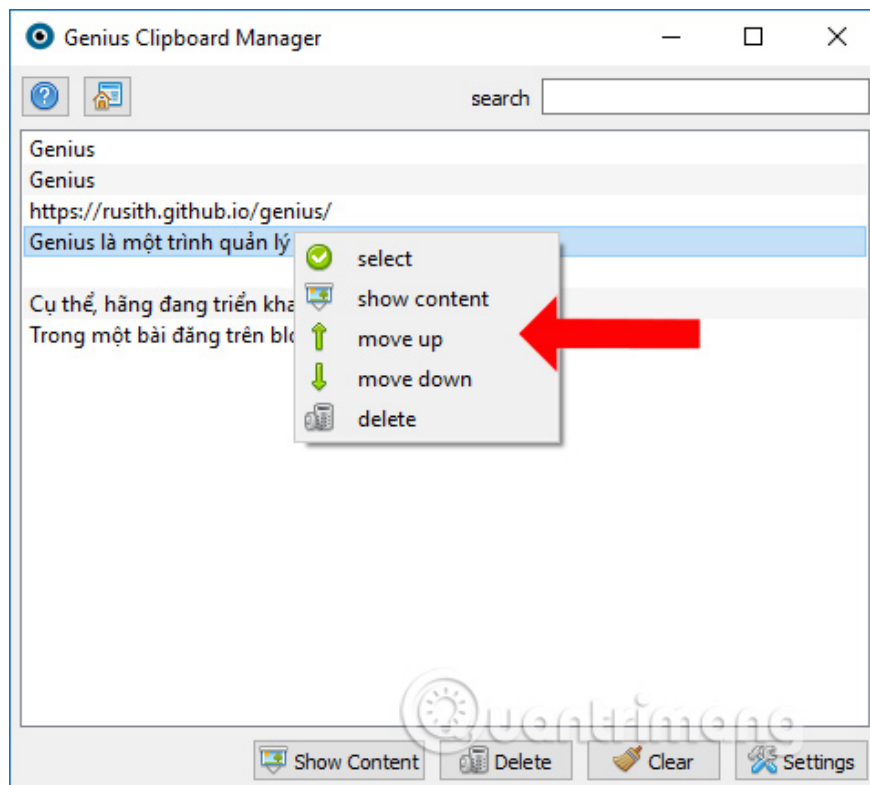

### 3. Genius

1. <https://rusith.github.io/genius/>

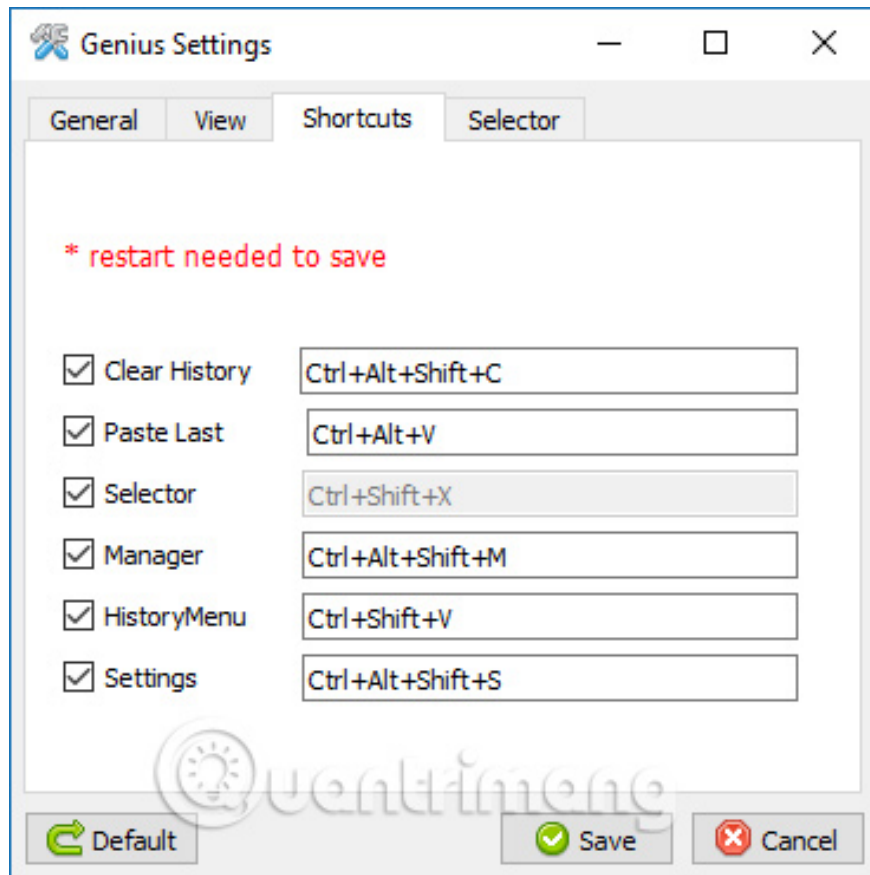

Genius is the clipboard manager similar to the above tools, which supports up to about 100 content entries. The tool only supports storing text content, so it is limited compared to the 2 tools above.

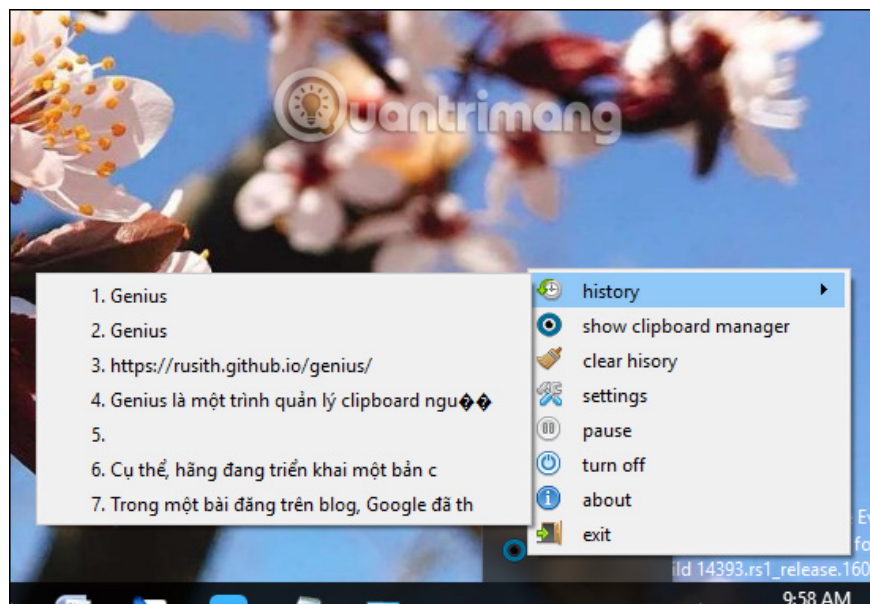

In the list of stored content, right-clicking on the content will display additional options such as moving, deleting, . as shown below.

The **Settings** section of Genius will have shortcuts for assigning tasks when copying content.

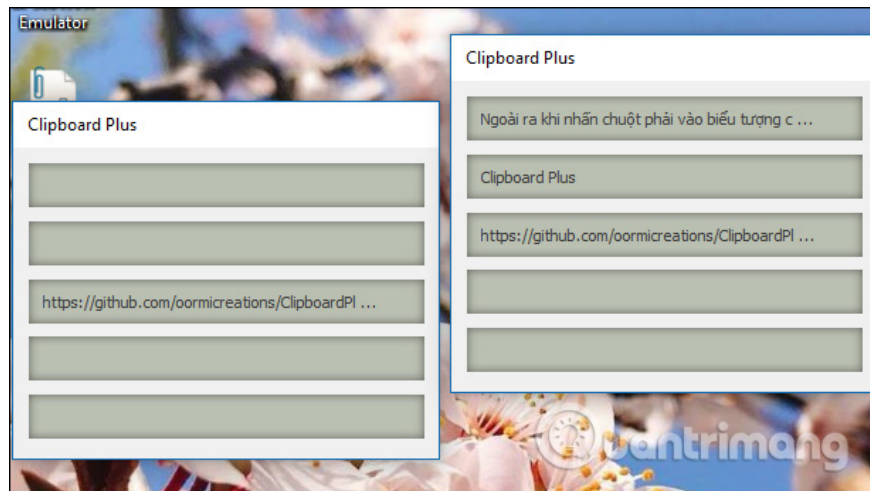

Also, right-clicking on the tool icon Genius will display a list of optional items. If you click the History section will display the history of the content saved on the tool.

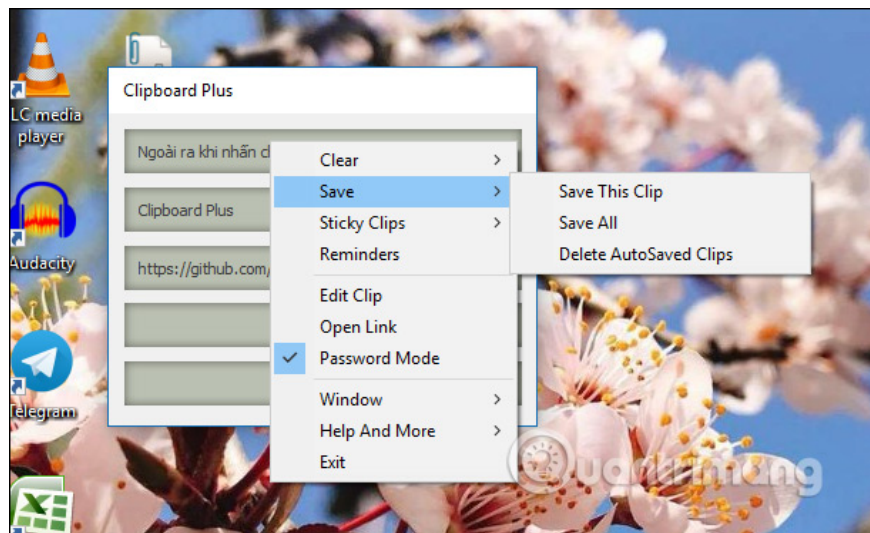

#### 4. Clipboard Plus

1. <https://github.com/oormicreations/ClipboardPlus/releases>

Clipboard Plus's interface is very simple and extremely basic, there are not many options to save and edit the contents in the clipboard like the 3 tools above.

When right-clicking on the contents in the clipboard, we will have the option to save 1 content or all content into txt file, open the link with the system's default browser, .

Above are some clipboard management tools on the computer. If users need a tool with many features, then choose Ditto or CopyQ. With Clipboard Plus, the ability to save and manage content is still limited compared to the first two tools.
