The monk Thich Bon Thuan, also known by the people of **League of Legends** called GFL Bon Thuan, started launching this game in May 2014, with his strong position in the jungle and mid with champions like Jarvan IV, Nidalee. or Rengar. Was once very famous after the confession scene in the top 2 Challenge Vietnam 1 sly way, everyone must respect. Many people are not afraid to give compliment to the monk in a sword-making style such as:

'The guru-like teacher and the iron mouse is breaking through all limits .'

However, after the great success, Thich Bon Thuan had a long time of suspension in the League of Legends to hide and focus on spiritual practice. After a long time away from the virtual world, this teacher has made many

fans happy when he announced that he was returning to 'play' in season 6, even going to live stream, making them extremely excited.

Looking forward to two years, suddenly a few days ago, the League of Legends community was shocked to hear that GFL Bon Thuan infected with the Covid-19 virus was still stuck in Italy. It can be said that this is extremely scary because Italy is the country with the highest number of Covid-19 deaths worldwide, surpassing China with 3,405 cases.

The deserted net shops such as Ba Danh Pagoda lead to gamers not meeting but meeting quickly to find mobile games for entertainment.

Currently, Italy has implemented an order to isolate and block the country, ban all activities of gathering people, close many schools, businesses and people are encouraged to limit the way. However, Italy is still facing an overload of the health system due to the rapid increase in the number of cases.

In many places in Italy, the situation of patients lying both inside and outside the room is endless. A series of elderly patients must be located in the hospital corridor, not yet in turn to be treated because doctors have to prioritize other patients. All the vacant rooms of the hospital, including the meeting room, were requisitioned as a place to treat patients but it was still not enough.

Facing this situation, the monk Thich Bon Thuan and his group of friends are very confused. The posts posted on his personal page received much sympathy from the community. Accordingly, Thuan and his friends are trying every day to wait for a flight from Vietnam, where they live has closed many shops, their food is gradually exhausted and can only sneak into the shops. Underground open bar at night to buy food. After they found out they were infected, they tried to go to the hospital for a test but failed and received only a few doses of antibiotics with pain relief.

The place where Thuan is trapped is Milano - the capital of Lombardy is considered the most violent epidemic in Italy, with 366 deaths, of which 133 died in just 24 hours, and nearly 7,400 were infectious, the Italian government ordered the isolation of more than 15 million people. Overcrowding in Italy has forced doctors to 'choose patients to treat', meaning that many patients will be denied visits to hospitals in the country. In parallel, many Vietnamese know that they are ill but still have to hide and find ways to return to Vietnam because they are not treated here.

Therefore, the monk is increasingly in a state of chaos, making the League of Legends community unspeakable. He shared that he never wanted to live like now: *'Must try to come to Vietnam, if you die, you must die in Vietnam'*.

League of Legends players are still recalling the glorious period of the GFL Prosperity in cult-level climbing screens. They kept praying and hoping he would recover soon and continue with his days of glory.

However, there are also some mixed opinions that the information is fake news and more difficult to understand when recently, the personal page named Thich Bon Thuan also disappeared. this information was not true. At the end of the story, there is probably only one more time when the parties come in to confirm the information.
