

The company announced that it could successfully hack the iPhone to 100%

DriveSavers, a company specializing in data recovery recently advertised a tool called Passcode Lockout Data Recovery with the ability to recover data from a locked smartphone, especially including the iPhone phone has a password set.

DriveSavers, a company specializing in data recovery recently advertised a tool called Passcode Lockout Data Recovery with the ability to recover data from a locked smartphone, especially including the iPhone phone has a password set.

DriveSavers said that the price for this service is \$ 3,900 per device and their goal is to target users who need to access the data stored in a family member's device. died. Depending on the circumstances, the company may require customers to provide additional documents such as court papers, death certificates or other legal documents.

Currently, there are a few companies in the world that have similar services as DriveSavers but their customers are just legal agencies.

According to DriveSavers ads, Passcode Lockout Data Recovery supports many phone companies like Huawei, Lenovo, LG or ZTE, and especially Apple. The company did not disclose the method used to unlock its iOS and Android devices.

The Verge page said that the page has not yet been able to directly verify the effectiveness of DriveSavers' Passcode Lockout Data Recovery tool because its capabilities seem to have broken the promise of iPhone data

security at all costs. Apple.

Many people doubt DriveSavers claims, because the lock on the iPhone is encrypted and so far even the FBI has not been able to bypass this security system, even Apple itself cannot access it if it is locked.

Two years ago, the FBI could not unlock the iPhone 5C of San Bernardino perpetrator in a case and they had to pay a large sum of money (rumored to be up to \$ 1 million) to buy the service. of a third party company. However, this third-party company's implementation method is no longer available because Apple has released the latest version of iOS 12.1 with many more modern security methods.
