

The easiest way to open an emoji importer on Windows 10

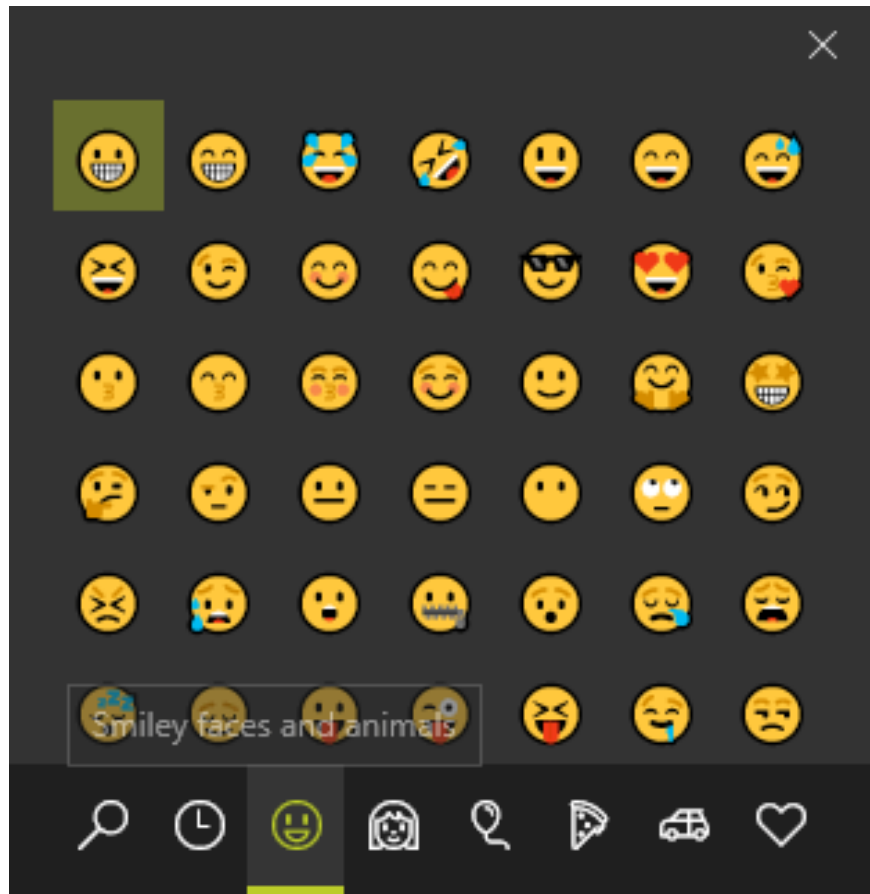

Microsoft regularly updates Windows 10, bringing many new and useful features. One of them is the divine emoji board that helps you enter emoticons into any text (social networking articles, Word documents, ...). Follow the article below to learn how to open the emoji import panel on Windows 10 Fall Creators Update, the easiest!

Microsoft regularly updates Windows 10, bringing many new and useful features. One of them is the divine emoji board that helps you enter emoticons into any text (social networking articles, Word documents, .). Follow the article below to learn how to open the emoji import panel on Windows 10 Fall Creators Update, the easiest!

1. Do you know how to use Emoji emoticons on Linux?
2. Did you know how to use emoticons on Windows 10?

How to open emoji importer on Windows 10

To open the emoji import panel on Fall Creators Update version, simply press "**Windows +.**" Or "**Windows +;**". This will open a small window containing emoticons sorted by type. Then, select the emoji to insert the text you want.

If you don't want to use an emoji board to avoid confusion with other shortcuts, you can disable it. Just a few steps in the Registry can be done.

Type **regedit** into the Start menu to open Registry Editor and navigate to the following location:

HKEY_LOCAL_MACHINE\SOFTWARE\Microsoft\InputSettings\proc_1

Here, you will need to find the value named `EnableExpressiveInputShellHotkey` located in a subdirectory. In `proc_1`, press **Ctrl + F** to search `EnableExpressiveInputShellHotkey`. Often you will find it here:

HKEY_LOCAL_MACHINE\SOFTWARE\Microsoft\InputSettings\proc_1\loc_0409\im_1

Double-click this value and change its value from 1 to 0. After you're done, you won't be able to open the emoji panel with the 2 shortcuts above.

Good luck!
