 3. How to review the dashcam with 3G / 4G connection

How to review the live dashcam

In fact, the camera that monitors your journey is a recording device and it has a display available. Therefore, you can watch live video recorded on the screen of the cam itself, stored in the memory card of the device. This is the simplest, most convenient way that can help you review the dashcam quickly without the need for any transmission equipment.

Very simple, you just need to launch the dashcam. Then, it will be in recording mode, you press the OK button to pause the recording. Then press MODE key and move and stop in playback mode, press OK. At this time, the images, videos are in the camera will be played back directly.

However, this way has a small limitation is not high mobility. You can only view the dash cam at the cam position in the vehicle. If you want to see it somewhere else or share it for everyone to see, it's really inconvenient. So, let's move on to option 2, although it takes a bit of effort but promises to bring interesting experiences.

How to review the indirect camera

As mentioned above, the way to view live view cameras has a downside is not mobility. Surely the driver will find it inconvenient to want to stop the car, iced tea, slash the wind and watch videos on cam, or simply want to review the video more clearly. Therefore, to overcome this, you can choose to view the indirect camera again. It is understood simply because a number of supported devices, you can review the videos stored on devices such as smartphones, computers, tap or even LCD TV .

This will be done on the internal storage thanks to the wire. Put simply, this link is the port corresponding to the support facilities you want to see.

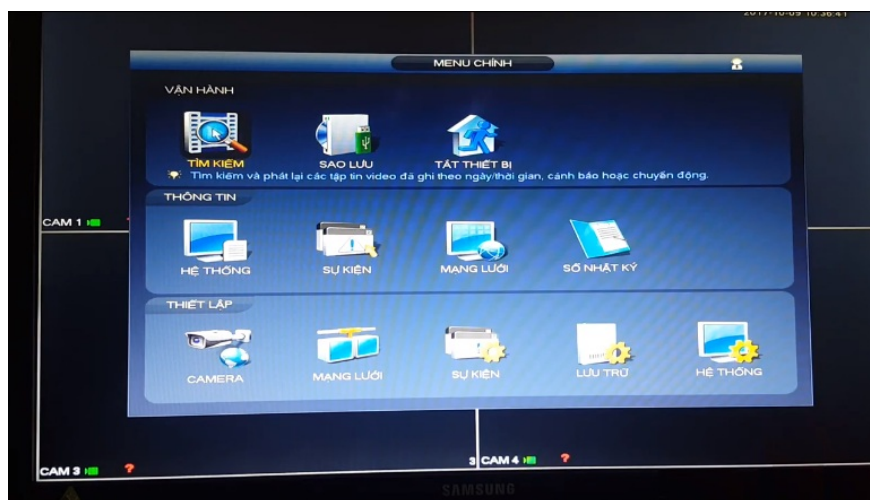

1. How to review the dashcam on the phone

In case you want to review the dashcam on your smartphone, you need to buy a card reader that supports reading the memory card on the dashcam. Then, remove the dashcam's memory card to the card reader device, then plug in the phone. So you can review the video on your phone 1 compact. However, you need to check that the card reader device that supports your phone!

2. How to review the journey camera on LCD TV, LED TV .

If you want to review the dash cam on LCD TVs, LED TVs, . you just need to connect the device through the HDMI output ports that have been installed on the dashcam and start watching again. However, make sure that your travel cam is equipped with this connector!

3. How to watch videos on the dashcam with 3G / 4G connection

In addition, more quickly, if your dashcam is a new model that supports 3G or 4G connectivity, it is very simple, just follow these steps:

1. Step 1: Download some dashcam management software applications on your phone, such as CarAssits.
2. Step 2: Connect your phone to the wifi network of the dashcam
3. Step 3: Go to DVR
4. Step 4: Go to Remove File, select Locked File / Loop File, then select the video to watch (or download).

Thus, with simple ways, you can review the videos stored on the car dashcam anywhere, at breaks or hanging out with family and relatives.

Hopefully, through a few simple suggestions above, you will have more useful experiences when using the journey camera, especially watching memorable videos on the journey along with your beloved family. .
