

The experience video series showcases all the new features on Galaxy S9 and S9 +

Although there are not many changes in design, the Galaxy S9 and S9 + duo impress strongly for technology lovers by owning many exciting new features.

Galaxy S9 and S9 + duo has been released in the framework of MWC 2018. Although there are not many changes in design, the Galaxy S9 and S9 + duo impress strongly for technology lovers by possessing many features New exciting, especially powerful improvements on camera.

First of all, the camera keeps change the aperture between the $f / 1.5$ and $f / 2.4$ values, enabling users to take photos in all environmental and lighting conditions, including low light.

Galaxy S9 with an aperture of only $f / 1.5$ can produce 28% better light than the Galaxy S8 with an aperture of $f / 1.7$.

Like the Note8, Galaxy S9 + is equipped with dual cameras including wide-angle and telephoto cameras and optical anti-shake technology (OIS) on both cameras.

This new generation Galaxy duo uses Exynos 9810 chip that integrates the ability to handle AI. This allows users to enable the AR Emoji feature to create emoji based on actual facial expressions. In addition, the camera on Galaxy S9 and S9 + also has the ability to record Super Slow-motion video with a frame rate of 960fps.

The Galaxy S9 and S9 + duo also have other great features thanks to the powerful improvements in Bixby, stereo speakers with the support of technology from AKG and Dolby Atmos.

To learn more about these new features, please watch the following series of experiences on Galaxy S9 and S9 + below.
