

The face of 10 laptop 'genuine' worth buying the most today

The year 2014 saw the strong development of Chromebooks as well as Apple's leading position, and earlier this year Dell also took the opportunity to release the first laptop to use its Broadwell chip.

Let's join us on 10 laptops that are worth 'rice bowl money' that you can buy today.

The year 2014 saw the strong development of Chromebooks as well as Apple's leading position, and earlier this year Dell also took the opportunity to release the first laptop to use its Broadwell chip.

1. Macbook Air

A masterpiece, there is not anything to blame for this product, its luxurious, ultra-thin and light design, over 10 hours of battery life, and no need to talk about performance. This is truly the leader in the laptop market. Perhaps it will take a long time to have another device that is enough to match the Macbook Air, except for itself.

Reference price : USD 899 for the lowest version.

2. Macbook Pro

The giant Apple seems to be dominating everything, from phones to computers to their products. The second position on this list is the Macbook Pro, if the Macbook Air is a bit small for your needs, spend a little more to get a bigger, more beautiful screen. , more connection ports, more robust configuration.

Reference price : USD 1299 for the lowest version.

3. Dell XPS 13

Dell's newest child is favored by Intel's fifth-generation processor - Broadwell and the touchscreen with a resolution of up to 3,200 x 1,800 pixels. The manufacturer guarantees that the XPS 13 battery life can be up to 12 hours. This is a great choice for those who love Windows but want something similar to the Macbook Air.

Reference price : 799 USD for the lowest version.

4. Lenovo Thinkpad X240

At the 4th position, it is one of the best business-class laptops today. Because of the entrepreneurial line, X240 does not have the same appearance as the first 3 locations, it still has only 1 black color like other brothers named Thinkpad, slightly thick edges and screen resolution only. is 1,366 x 768 pixels. However, the keyboard

of the machine is really worth using and durability has been confirmed for a long time, in addition the manufacturer also offers a lot of configurations for customers to choose according to individual needs.

Reference price : 845 USD for the lowest version.

5. Toshiba Chromebook 2

The latest Chromebook from the Japanese manufacturer is highly appreciated by the beautiful display, extremely good battery life and extremely attractive price. If you are looking for a cheap laptop for office work, you should not ignore this product.

Reference price : 250 USD for the lowest version.

6. Dell Inspiron 17 5000 Series

Another machine came from Dell. This is not a laptop for those who want to use the latest technology, but this device has a very reasonable price that comes with enough configuration for the general user.

Reference price : USD 499 for the lowest version.

7. HP Stream

If you don't want to spend too much money on a computer running Windows, HP Stream is the best choice. Although the price is only 200 USD, this kid is still capable of helping users solve most of the office work today. However, their screens and sounds are a disaster.

Reference price : 200 USD for the lowest version.

8. Acer Chromebook 13 inches

Because it is a low-cost computer, Chromebooks are often unconcerned about configuration but the Acer Chromebook 13 is different. They are equipped with a 13 inch Full HD screen. Besides the extremely healthy battery life of this device will also make many people have to spend almost to 'pick up' it.

Reference price : 292 USD for the lowest version

9. Asus ROG G751JT

This is the only representative gaming laptop on our list. Asus ROG GT751JT is considered the best gaming laptop today, they are really a 'monster'. Terrible configuration, beautiful design, extremely durable, can easily 'weigh' every game running high setting today.

Reference price : 1,749 USD

10. Lenovo Yoga 3 Pro

Yoga 3 Pro is currently the thinnest, lightest laptop of the Lenovo family. This 2-in-1 machine has a beautiful screen with flexible hinges that help them switch from laptop status to tablet and vice versa. However, Yoga 3 Pro has a huge weakness that is low battery life.

Reference price : 1,269 USD
