

The fastest guide to playing PC games on Smart TV

Want to play PC games on your Smart TV but don't know how? This article will guide you through using Steam Link to connect in just a few simple steps.

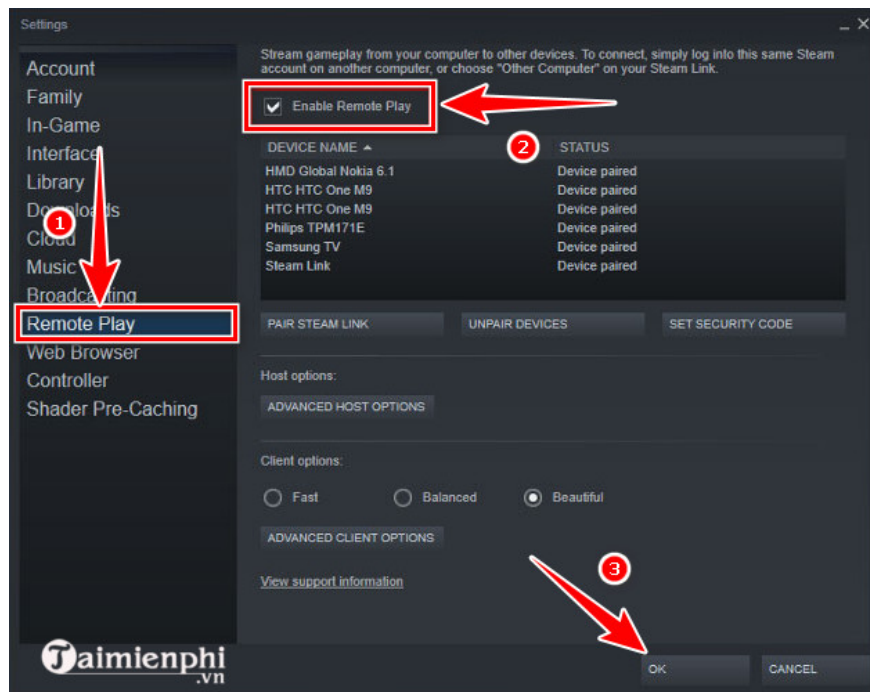

Smart TVs are getting more and more features, including PC gaming. To do this, connect your PC and Android Smart TV to the same Internet network, preferably using an Ethernet cable for more stability.

How to play PC games on Android Smart TV fastest

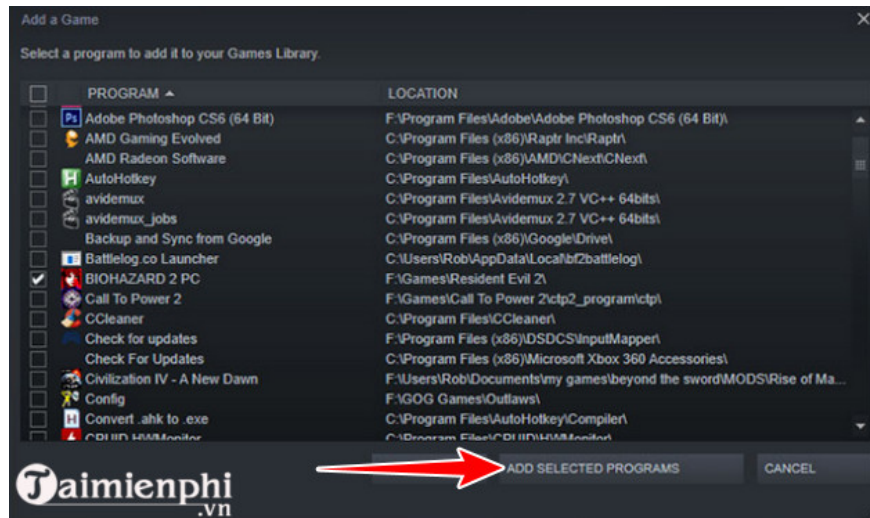

Step 1: Enable Remote Play on Steam and Steam Link

Open Steam on PC, go to **Steam => Settings => Remote Play** , check **Enable Remote Play** .

Make sure the feature is enabled, then press **OK** to finish.

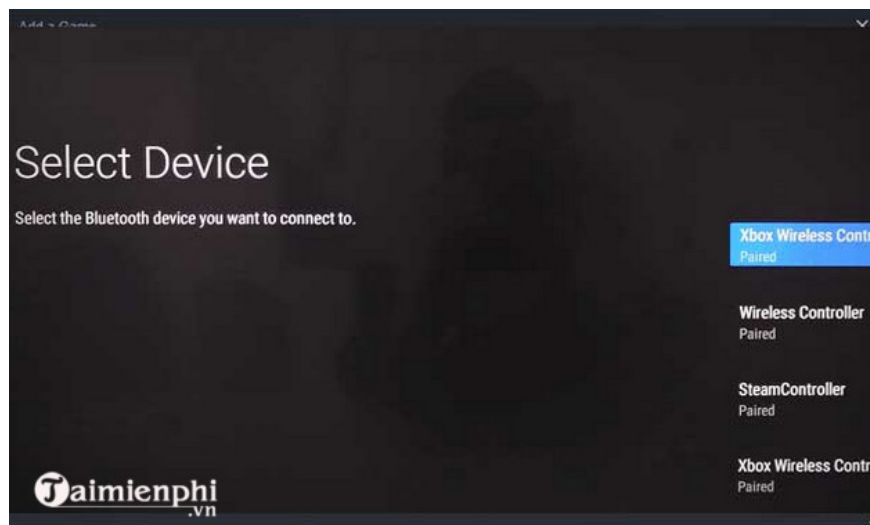

To play a game that is not on Steam, select **Add a Game** (bottom left corner) => **Add a Non-Steam Game** => select the game => **Add Selected Programs** to complete.

Step 2: Download **Steam Link** on Smart TV from the link below or search on Google Play Store, Samsung Smart Hub if needed.

- Download link for Android version: **Steam Link for Android**

Step 3: Connect the gamepad via Bluetooth. Go to **Settings** => **Bluetooth** , find and connect the controller.

Select gamepad and connect to play PC games on Smart TV easily. If it fails to connect, check the connection or use HomePlug for more stability.

In addition, you can also refer to how to **use Steam Link to play Steam games on Mobile** that Taimienphi has instructed in previous articles here. Wish you a happy new day.
