

# The first laptop has a 6 TB hard drive

Eurocom broke the hard drive capacity limit on laptops when it introduced the Travelstar 5K 1500 mobile workstation that can integrate up to 4 1.5TB capacity drives.

**Eurocom broke the hard drive capacity limit on laptops when it introduced the Travelstar 5K 1500 mobile workstation that can integrate up to 4 1.5TB capacity drives.**

Eurocom's new **mobile workstation** has two versions of **Pather 4.0** and **Pather 5D** that support 3D screens. These two models have the same design and allow users to customize the configuration.

Machine has many configuration options. *(Photo: Notebookcheck).*

Products are equipped with 17.3 inch screen HD resolution. Users can choose from either a glossy or non-glossy screen mirror. For processors, customers can choose Intel Core i7-3970X Extreme chips or Xeon E5-2600.

The maximum RAM memory this computer model supports is 32 GB with four DDR3 RAM slots. For graphics cards, the manufacturer offers options Nvidia Quadro K5000M, K4000M, K3000M and K2000M.

Types of drives that this model supports include SSD, hybrid drive and HDD. **Travelstar 5K 1500** weighs about 5.5 kg. The dimensions of the machine are 425.7x290.5x58.67 mm. The thickness of the device can be up to 63 mm depending on the configuration.

Currently, the selling price and release date of the product have not been announced.
