

The first ultrabook duo to run Windows 8 from Samsung

Not only upgrading the configuration with the latest Ivy Bridge chips, the new Series 5 and Premium Series 9 from Samsung also preinstalled Microsoft's latest operating system.

Not only upgrading the configuration with the latest Ivy Bridge chips, the new Series 5 and Premium Series 9 from Samsung also preinstalled Microsoft's latest operating system.

Samsung ultrabook Series 5 and Premium Series 9 are two of the first laptop models in Vietnam to be preinstalled with Windows 8. The duo is expected to "hit" in the domestic market on October 26, coinciding with Microsoft officially introduced the new operating system.

The new Series 5 version has a strong configuration thanks to the 3rd generation Core i chip.

The ultrabook Series 5 models to be released soon will have two optional versions including an Intel Core i3-3217U processor, Intel HD Graphics 4000 graphics chip, 500 GB HDD hard drive and 24G SSD, while the remaining version is more advanced with Intel Core i5-3317U processor, Nvidia GeForce GT 620M graphics card, hybrid hard drive with capacity up to 750 GB HDD and 24G SSD. Both have 4GB of RAM, 14-inch 300-nit screen and HD standard resolution of 1,366 x 768 pixels.

The selling prices of two models of Series 5 are VND 18 and VND 22 million respectively.

Windows 8 will be an important addition to a high-end model like the Series 9.

Meanwhile, in the higher-end segment, Premium Series 9 continues to show the class for business users with powerful Intel Core i7-3517U processor, 4 GB of RAM memory, graphics chip. Intel HD Graphics 4000, SSD solid-state hard drive with 256 GB capacity. In addition, a big difference from Premium Series 9 is a 13.3-inch screen, but the resolution is up to 1,600 x 900 pixels and anti-glare technology makes good outdoor use with brightness up to 400 nit.

Premium Series 9 new version will cost 37 million VND in Vietnam.

Upgrading the configuration as well as system software but Samsung's ultrabook duo keeps the ultra-thin design as before. Series 5 Ultrabooks weigh only 1.79 kg (lighter than the average of 2.2 kg in mainstream laptops), thin 20.9 mm. Meanwhile, Premium Series 9 shows the superiority with a weight of only 1.16 kg and a thinness of 12.9 mm. Both have a rugged aluminum alloy shell, anti-fouling fingerprints that help the machine always create the elegance and style for users.

Windows 8 is gaining attention thanks to the high reviews from experts as well as developers right from the beta version. The new operating system has a "makeover" of the interface with the completely new, intuitive, easy-

to-use and eye-catching Start Screen system. The new OS device also has the ability to download and install software directly from the application store quickly and conveniently, similar to the trend on many mobile devices today.

In addition, the new operating system will support cloud computing technology as well as not to mention the ability to optimize performance, faster boot times, longer battery usage and delivery. ' *smooth*' interface if the same configuration compared to Windows 7.
