

The first Ultrabook running Windows 8 will sell in Vietnam at the end of the month

The high-end Toshiba Portégé Z930 with Core i7 chips sold later this month will be preinstalled with the latest operating system from Microsoft.

The high-end Toshiba Portégé Z930 with Core i7 chips sold later this month will be preinstalled with the latest operating system from Microsoft.

The Z930 has a magnesium alloy case but weighs only 1.12 kg.

According to Toshiba Vietnam, the company will sell the new Z930 model at the same time as the official Windows 8 operating system released worldwide on October 26. This is Toshiba's most advanced ultrabook with many high-end equipment, high configuration and ultra-light and lightweight design. However, Japanese manufacturers have not announced specific prices for the model to be sold later this month.

The upcoming Portégé Z930 Toshiba version is heavily configured with an Intel Core i7-3667U 2 GHz (Ivy Bridge) processor, 6 GB RAM (including 2 GB "on-board" and 4 GB add), 128 GB SSD solid-state hard drive, Intel HM76 chipset. It has a 13.3-inch screen and is the world's lightest ultrabook at this size (weighing 1.12 kg) with a thickness of only 15.9 mm and a sturdy magnesium alloy shell.

The design is 15.9 mm thin and quite fully connected.

In addition, this product also has a fingerprint recognition slot, a 1.3 Megapixel webcam and a TPM security chip. Battery life of the device is recommended by the company up to 8 hours continuously. The Z930 has a full HDMI connector, 2 USB 2.0 ports, a USB 3.0 port with charging feature when the device is turned off, a memory card reader, Wi-Fi standard, Bluetooth 4.0 and a high-speed LAN port.

Toshiba Z930 first appeared in Vietnam in late June and sold more than a month later. This product is warranted for 3 years in the Asian market.
