

The Google application suite stopped supporting IE 9

With Microsoft releasing IE 11, Google will also stop supporting the Google Apps suite for older versions of IE from IE 9 and below.

With Microsoft releasing IE 11, Google will also stop supporting the Google Apps suite for older versions of IE from IE 9 and below.

With Microsoft announcing **IE 11**, their latest IE browser (*through the release of **Windows 8.1***), Google also said its Google Apps suite will stop supporting IE versions from **IE 9** or below. The Google application suite is Google-developed web applications such as Gmail, Calendar, Google Drive and is considered to be quite essential applications today with many users.

The company has previously announced that " *after the latest version of a browser is released, Google Apps will stop supporting the older version 2 versions compared to the latest version* ". So, with IE 11 released, IE 9 will no longer be supported.

For **Windows 7** users, to be supported by Google Apps, they can upgrade to IE 10, and in the future upgrade to IE 11. There is still an IE 11 version for Windows 7 yet. must be the official version.
