

The HP series of computers running Windows 8 is ready to be released

HP is poised to launch a new series of portable computers to install Microsoft Windows 8 operating system and high-end digital technology applications to satisfy a wide range of user needs.

HP is poised to launch a new series of portable computers to install Microsoft Windows 8 operating system and high-end digital technology applications to satisfy a wide range of user needs.

HP computer series using Windows 8 are ready to launch Vietnam market

Welcoming the event that Microsoft will officially release the latest operating system Windows 8 at the end of October 2012, HP is rushing to market many new models of Ultrabook and Sleekbook laptops with pre-installed operating system. This is a stylish design, strong configuration, long battery life .

Specifically, HP ENVY computers will have dv4-5201TU, dv4-5201TX, dv6-7201TU, dv6-7205TX, m6-1101TX . with high performance, stylish design and reasonable price.

All are equipped with the latest generation processors from Intel Core, high-end discrete graphics cards, large storage hard drives with full connectivity ports, easy extraction . Sleekbook computers also have webcams. High resolution, numeric keypad helps increase computing performance and communication interaction.

Not only that, HP also equips the Ultrabook and Sleekbook series with Windows 8 to install more attractive accessories. For example, the HP Universal Power Adapter 90W power charger allows compatibility to charge many mobile devices at the same time as HP computers; HP Touch to Pair Mouse wireless mouse products

enable quick interaction with computers via bluetooth connectivity, the HP X6000 wireless mouse with HP Exact Track Technology proprietary technology works on most surfaces .

According to the latest information from HP, immediately after Windows 8 is released, the above-mentioned new computers will be distributed to Vietnam market with the most suitable price policy and warranty. HP expects to achieve breakthrough achievements, satisfying the diverse needs of consumers of all ages and access to digital technology.

In fact, 2012 is considered an impressive year of HP computer brand, when from the beginning of the year until now, the company has received many reputable awards to appreciate quality and consumer effects from computer lines. New notebooks like Ultrabook models and especially Sleekbook thin, light, fashionable products and integrates its latest technologies.

Further commenting on the Windows 8 operating system's opportunity, HP representative said that with this operating system, the user's ability to interact will increase markedly, not only through auxiliary peripheral devices (such as mouse, keyboard .) but also on the touch screen and other types of devices for tablets.
