

The images show that this world exists incredible anomalies

Our earth hides so many wonders and mysteries that scientists have not been able to solve so far.

The Earth has always had incredible landscapes and mysterious natural phenomena, making it difficult for even savvy scientists to explain. When even science cannot give a specific explanation of why something happens, of course it will make us feel more surprised with the natural world.

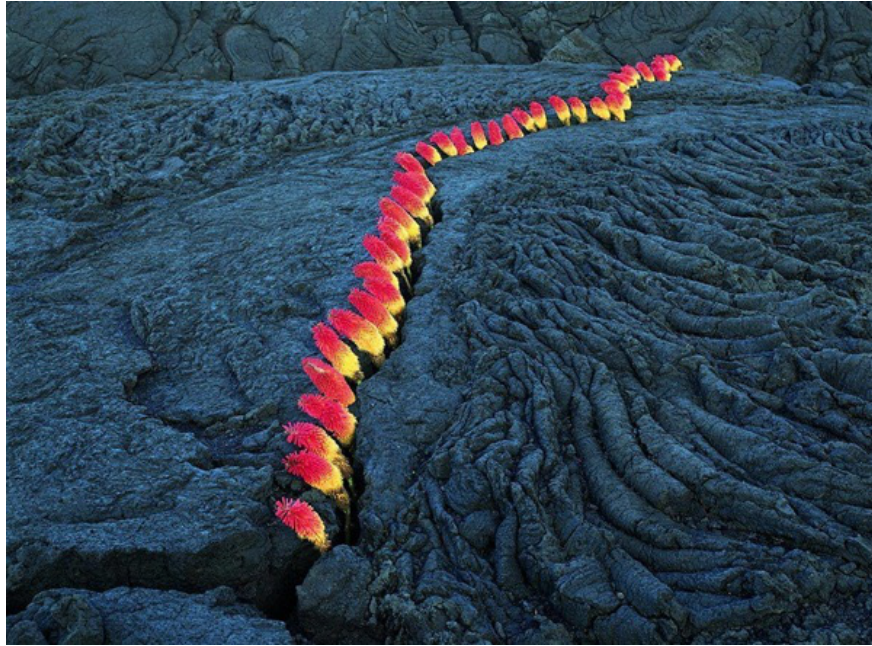

Before the answer, many people will wonder and do not know what this is. This is the heart of a blue whale. A heart of this animal can weigh up to nearly 2 kg, and of course some people can work together to carry. It weighs the equivalent of a large towing tire!

And here is the body of a blue whale, the world's largest animal, washed ashore. Not a hideous monster.

A forest in the shape of a guitar? This is not a product of "Mother Nature" but created by human hands. Pedro Ureta, 70, has spent years planting this special forest to give to his beloved wife. His wife died of cerebral aneurysm when she was 25 years old.

This is the red hot poker, also known as the trumpet flower, whose English name is Red hot poker. Until now people have not explained why these flowers can bloom between cracks of lava volcano.

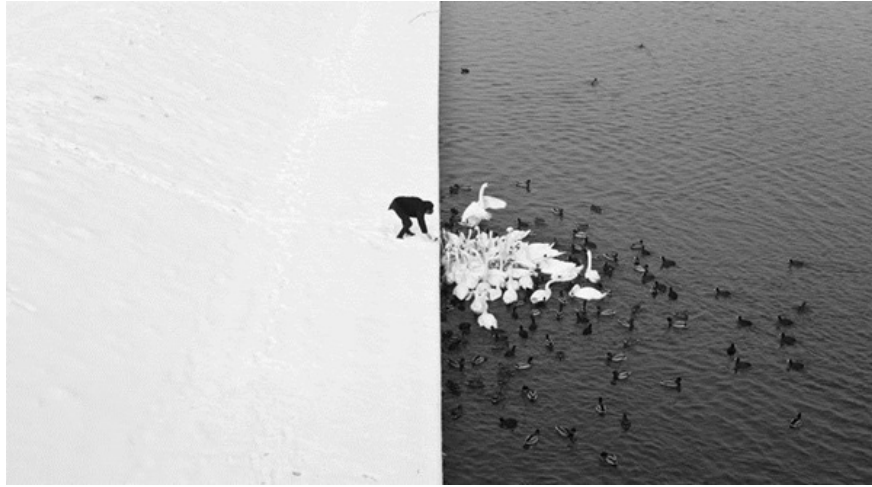

It is well known that human eyes and animals' eyes are often round. Yet there is still a goat with a rectangular eyebrow!

It may sound intimidating, but it is actually the floor of the church of Santa Maria del Fiore in Florence in Italy.

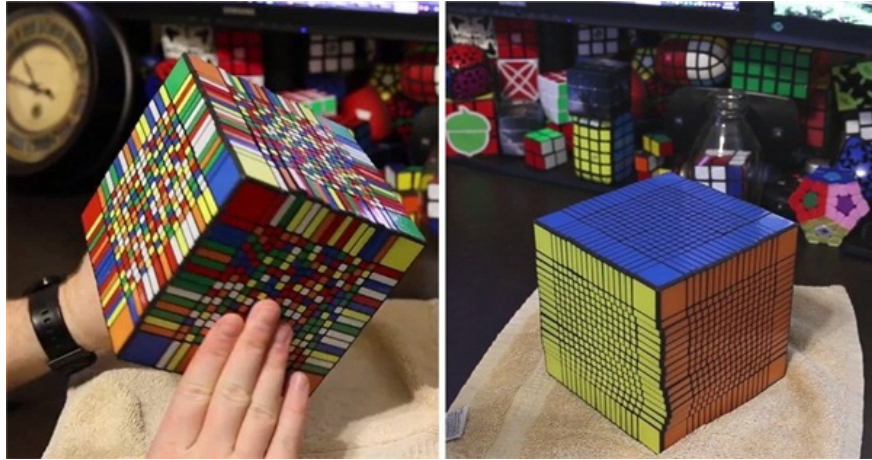

Tall ponderosa pines in the sky at Bryce Canyon National Park.

The stunning contrasting scene on one side is clear snow, on the other is a lake in Krakow, Poland.

This is a fruit called Hala that grows in Australia and the Pacific Islands.

It takes even more than 7 hours for a genius person to solve this rubik.

This is a magnified image of a caterpillar on a microscope.

Perhaps on the back of this mother spider there are millions of baby spiders.

The scene of crowded fish like ants swimming near the shore to scramble for food from tourists.

Tomato plants grow among lava on Surtsey's volcanic island.

Inside an extinct volcano in El Valle, Panama is a small town. If you travel here, go to the foot of Mount Cerro Gaital, behind the Campestre hotel. There is a strange little forest with square-shaped trees.

A resident of 60 years said that square trees are normal. The tree is clearly divided on four sides with perfectly uniform size.

This is the "apocalyptic underground tunnel" containing the seeds of humanity. It is located in a remote mountain area on an island in Spitsbergen, Norway, below a depth of 120m, has an underground tunnel built and maintained at 18° .

An unusual phenomenon occurred in Oakville, Washington, USA in August 1994. Instead of the usual raindrops, sticky, gelatinous plastic fell from the sky. The next day, dozens of people in the area contracted flu symptoms.

These clouds are mesmerizing, they are long and tubular, and they can last hundreds of kilometers in the sky. These clouds are often seen in the skies throughout Australia during the transition time from dry to rainy seasons.
