

# The iPhone XS cremation with 10,000 matches and the ending made many people cease to suffer

HaerteTest's terrible torture is like a death sentence with the iPhone Xs.

Since its launch, iPhone Xs has experienced many painful challenges such as freezing, trying to drop from above . made by YouTube channels. And recently, Apple's newly launched iPhone over a month ago continues to undergo another horrific torture of YouTube channel HaerteTest, which is heat resistant with 10,000 burning matches.

HaerteTest is a YouTube channel that specializes in making horrific and horrendous tortures for electronic devices and objects.

HaerteTest's terrible torture is like a death sentence for the iPhone Xs. The iPhone, which was nearly burnt, could no longer retain its original shape when faced with the heat created when burning 10,000 matches. Nearly all of the internal components, the glass and the frame are burnt.

Please follow the process of the cremated iPhone Xs with 10,000 matches in the video below.

Note: This is a pretty dangerous test, you should not follow it to ensure safety and avoid unfortunate incidents that may occur.
