How do I find the answer to Wordle?

If you're having trouble finding the answer to today's Wordle, there are a few simple steps to complete it if you already know how to find the answer.

1. Start by choosing a word that you can guess from the alphabet chart.
2. Remove the vowel letters (A, E, I, O, U).
3. Focus on using common letters (S, R, L, T).

Don't forget that a letter highlighted in yellow can still appear twice. The game won't give you any indication of how many times that letter has appeared.

What word should I use as the starting word for my Wordle?

Wordle consists of five-letter words; you just need to find the vowel letters first, as this will help you figure out the word you're about to guess. For example, "AUDIO" is pretty good, although there aren't many words ending in "O".

OUIJA is another common word, but since it includes the letter J, it's not a common consonant. Therefore, it's not a word you should think of first. Some of the best examples to start with are 'CRANE'. Other studies have concluded that words like 'SOARE', 'IRATE', and 'ALTER' are all good choices.

Wordle was created by Josh Wardle, initially as a project for his partner, as they enjoyed playing word guessing games together. Since then, Wardle has sold the hit game to The New York Times, and it has since become one of the most popular games currently available.
