

The Macbook Pro 13 inch is replaced with a free battery according to Apple's program

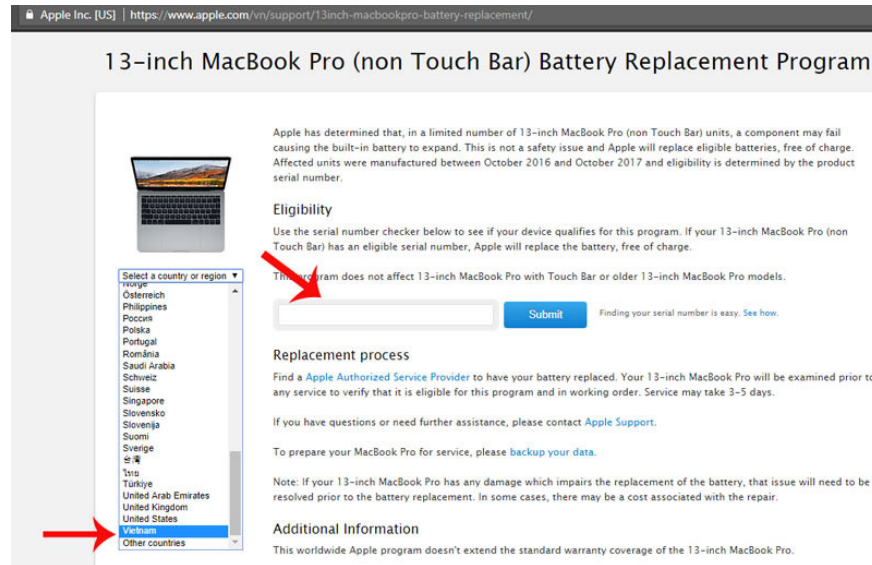

From April 20th, 2017 Macbook Pro 13 inch does not have Touchbar, production from October 2016 to October 2017 will be replaced by Apple batteries for free worldwide.

From April 20th, 2017 Macbook Pro 13 inch does not have Touchbar, production from October 2016 to October 2017 will be replaced by Apple batteries for free worldwide.

The reason for this free program deployment is due to a technical problem that led to the expansion of a computer battery from a 13-inch MacBook Pro computer model without a Touch Bar, this is the bar Touch on the keyboard of the Macbook Pro computer displays many utility shortcuts and includes Touch ID fingerprint sensor feature. The exact number of MacBook Pro machines affected by battery problems is not disclosed correctly by Apple, the company said only those computers were manufactured during the period from October 2016 to October 2017. Time to deploy a free battery replacement program for Apple's 13 inch Macbook Pro that lasts up to 5 years after the date of purchase.

To check if your device is in the free replacement area, users can access the Apple website, select the country / region, enter the serial number and press the send button. To get the serial, select the apple logo located in the left corner and click " *About this Mac* ".

If your device is eligible for a free battery replacement, bring Macbook Pro to Apple Store or its authorized Service Centers for assistance. For users who have replaced batteries before, they will be refunded.

In October last year, Apple also had a new free battery replacement program for the 15-inch Retina Macbook Pro released in mid-2012, early 2013 with broken, worn or bulging batteries.
