

The most anticipated things at Google I / O 2019

Next Tuesday, May 7, Google will open its annual I / O developer conference with a speech by CEO Sundar Pichai and other important executives of the company.

Next Tuesday, May 7, Google will open its annual I / O developer conference with a speech by CEO Sundar Pichai and other important executives of the company. Google I / O 2019 this year will take place within 2 days 7 and 8 May, with the participation of hundreds of developers, technology experts worldwide. Traditionally, this event is where Mountain View giant sketched and released many of the key features and improvements that are about to be applied on its key strategic products such as Android, Google Assistant and Many other important applications and services of the company next year.

However, this year is expected to be slightly different because there will be two new hardware devices. Google said it will certainly launch two new Pixel smartphones in the I / O framework 2019. This is something unprecedented because Google rarely decides to launch a new smartphone in the middle. years, ie in the middle of his usual smartphone upgrade cycle. So it is likely that these will be cheap smartphones, accounting for new segments.

Temporarily putting aside hardware devices, at this year's event, we can still look forward to hearing a lot about Google's progress in artificial intelligence, machine learning and some future technologies. other. Here are 8 most anticipated things at Google I / O 2019 this year, please consult.

1. Google opens the Android Automotive OS source for application developers

Google I / O 2019

1. PIXEL 3A and 3A XL
2. Nest Hub Max
3. Detailed evaluation information about Android Q
4. More detailed information about Stadia game play platform
5. New information about Google Assistant and Google Lens
6. Improvements to Google Photos
7. There will not be much news about Android TV and Wear OS
8. Will an impressive 'demo' be released?

PIXEL 3A and 3A XL

There has been a lot of leaked information about these two new smartphones in recent times, but it is not until the 2018 Google I / O that a new wave of information with the highest degree of authenticity appears. These are basically rumors that tell us all the necessary information about Google's upcoming mid-range Pixel phones - including selling prices. Accordingly, the Pixel 3A is expected to have a starting price of \$ 399, while the larger Pixel 3A XL with a 6-inch screen will cost starting at \$ 479.

1. Successful installation of Windows 10 ARM on Google Pixel 3XL but covered by rabbit ears

Both devices are expected to provide essentially the same photographic performance as the elder phones like Pixel 3 - which is considered one of the best camera smartphones at the moment. , while owning a much lower price. To do this, Google had to make some adjustments to cut costs in other parts of the device, such as using lower-end processors, or switching from high-end glass cover to Basic plastic shell (but still good quality), and also omitted wireless charging technology. And yes! The good news is that we will see the re-release of the 3.5mm headphone jack on PIXEL 3A and 3A XL (since when is this a good news ?!).

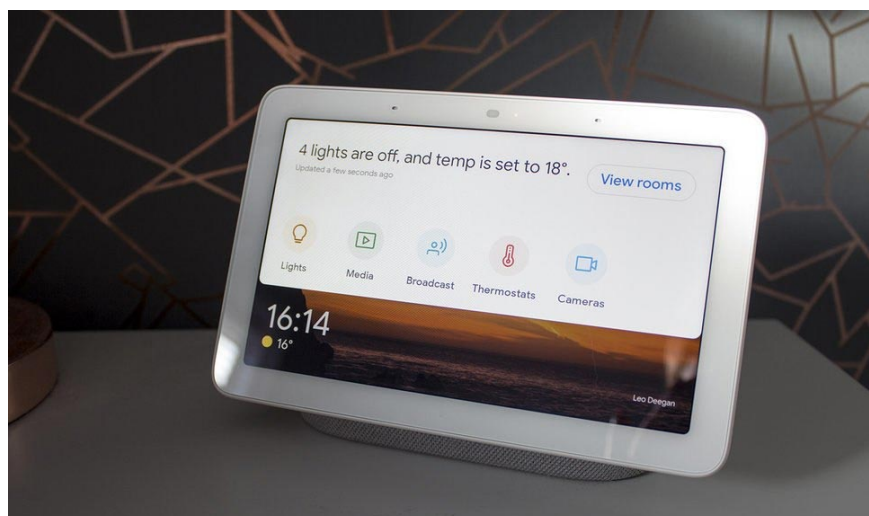

In fact, this is probably Google's most positive step in the price policy for smartphones over the years, even surpassing the OnePlus, in an effort to offer a 'punch'. have a lot of weight in mid-range and high-end smartphone segment in the middle of the current year. Each Pixel 3A and 3A XL will receive a 3-year 'incentive' for continuous software and security updates, plus many other Google 'exclusive' features such as Call Screen.

1. How are Facebook and Google using algorithms to predict your thoughts?

Nest Hub Max

Google is expected to soon reveal a larger product line, branded Nest in the company's Home Hub smart screen segment. Nest Hub Max will own a 10-inch screen and stereo speakers (stereo). In addition to the above information, Google is still quite tight-lipped about this device. We still don't know how specific Nest Hub Max specs are, except that the device will probably use the same software system that focuses much on interacting with the virtual assistant Google Assistant. , and at the same time it can provide Nest Hub Max with a more intuitive interface, available anywhere in your home. The price of the Nest Hub Max has not been disclosed yet, but it certainly won't be under \$ 150 because the predecessor 7-inch Home Hub is also being sold at this price.

1. Finally the virtual assistant Google Assistant also officially launched on May 6, after the release of the trial version

As a Nest product (along with an integrated camera), Hub Max is likely to take on additional family security features that Home Hub currently does not have. It can be considered that Nest Hub Max is a perfect combination of smart screen, smart camera and entertainment audio system suitable for a small device, and will be a card that can be brought into Great success for Google in the smart home appliance market in general this year.

Detailed evaluation information about Android Q

At the present time, we have all experienced a few beta versions, developed exclusively for Google's Android Q platform. However, according to observers, it is likely that Google will also bring many important and interesting notifications for Android Q to present on this I / O stage this year. The next major release of Android will provide users with more flexible privacy control options and options, including the ability to allow applications to only track the location of users in each school. specific case. In addition, the dark mode, the flexible color theme and the shared menu - those that are already in the first beta - will be finalized and put on the official Android Q version, thereby laying the foundation for the future of folding screen phones running on Android in general.

1. Android Q release date and device list are uploaded to Android Q

Google also seems to be working to overcome the gesture navigation feature in its Pixel phones, and there is even a sign of the appearance of a desktop mode like Samsung DeX when You plug the Pixel into the removable screen.

With the official update likely to be sent to users by the end of this summer, Google will surely have to say more about its plans for Android Q next Tuesday. Hopefully the company will also bring a new beta version. Android Q is one of Google's particularly important products this year.

1. Android operating system history through versions

More detailed information about Stadia game play platform

In late March, Google officially launched Stadia, a cloud-based gaming service at GDC 2019, and is expected to be officially launched later this year. However, the information we hold about this ambitious gaming platform is still extremely limited. In addition to some information about specifications, connectivity or processing power, Google has absolutely nothing to do with the registration fee for this service. Most likely at this year's I / O, we will see another demo of Stadia along with more specific information around this platform. However, it is also possible that Google will choose to wait until the E3 conference - an event focused on games (or even later) - to provide important information about Stadia to attract more more attention from the community.

1. Mountain View's Google Stadia and its ambition to dominate the game industry

New information about Google Assistant and Google Lens

Every year, Google often spends a lot of time to introduce the progress they have made to important software projects like Google Assistant, and gives the reason why this tool becomes a voice assistant. Saying smart can bring a better user experience than Alexa or Siri, this year I / O is probably not an exception. In addition, Google

will certainly spend quite a bit of time talking about Google Lens - a tool that helps turn the Android phone camera into a powerful computer vision tool - supposedly adding a lot of improvements. strong in the future.

1. Using Google Lens to convert images into words, find information easily

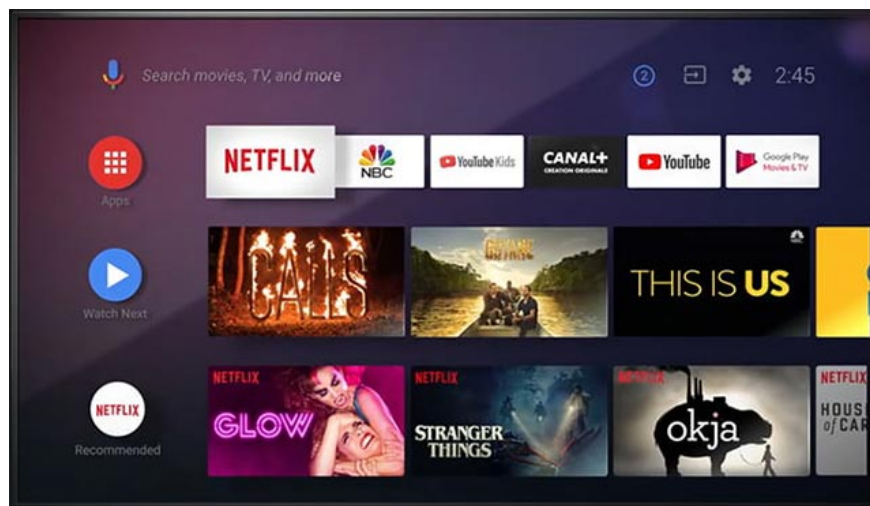

Improvements to Google Photos

Google Photos has become a popular photo management application for the past few years and Google will definitely introduce some new upgrade features for this app at I / O 2019, and these features will Also updated to Google Photos within a few weeks or at least a few months later.

There will not be much news about Android TV and Wear OS

Google obviously decided to remove quite a bit of its Wear OS news before this year's I / O. This platform is being added with some relatively notable utilities, including a feature that Google calls Tiles, allowing users to easily check forecasts, schedule appointments for the next, News headlines, etc. However, Google has said they will not spend too much time on Wear OS at the I / O stage, the code will probably replace it with another more specialized event.

Besides, there are not many suggestions about the plans that Google will deploy with Android TV this year. The best Android TV product we've seen at last year's I / O has not yet been released.

1. Google I / O 2018: Google introduces a host of new features related to Android P, Assistant Assistant, Gmail

Will an impressive 'demo' be released?

Duplex

Google AI

In the last I / O framework, Google really caught the attention of Duplex's first public performance, allowing the virtual assistant Google Assistant to make many voice calls to businesses as well as arrange schedules. and make an appointment on behalf of the user. Is it possible that at this year's event, Google could surprise the world again? Can also!
