

The most attractive user point on OPPO A91?

OPPO A91 Oriented in the mid-range segment for young people, OPPO A91 has been a smartphone that many users have been looking for in the past, simply because it has a beautiful design, quality camera and many features. Nice to accompany.

However, a beautiful design or a good camera is one thing, to talk about **OPPO A91**, there is probably a point that many users consider to be "worth the" money on this smartphone. It is the ColorOS 6 operating system, the core platform that helps bring a flagship-worthy user experience on a mid-range smartphone for less than 7 million VND.

Since the official release of ColorOS 6, OPPO has changed its operating system platform interface to better suit the youth orientation. As the name implies, the interface of ColorOS 6 is made up of vibrant, youthful and eye-catching colors. This is the characteristic of ColorOS in particular and OPPO smartphones in particular. Especially for a smartphone for young people like OPPO A91, ColorOS 6 promote its strengths in the interface.

From the main screen to the application menu or the notification bar, all are designed by OPPO to be most vivid, but still retain the sophistication in the interface, both "attracting" the user and ensuring not at all. Blindness when using.

Colorful but minimalistic interface of ColorOS 6 on OPPO A91

Beautiful interface is one thing, the ColorOS 6 platform even attracts young users with a series of extremely practical bundled features. It can be mentioned as cameras with different modes of photography, video recording (slow motion, night shooting, funny sticker shooting .) while also having separate beauty modes that allow young people to "self." "at any time without having to go through many photo editing steps.

OPPO A91 many selfie modes like this why women love it so much

Not to mention ColorOS 6 on OPPO A91 is also equipped with Game Space mode - Game space, an extremely useful mode for young people today. With this mode, users can fully control and set the performance level of the device, as well as turn off unnecessary notifications to avoid interruptions during game play. This mode will also limit the background app's access to the network to focus solely on gaming.

Game Space Mode - Game space that enables optimized gaming experience on OPPO A91

This is just focusing on the camera and gaming performance, two top factors when choosing to buy smartphones of GenZ youth, ColorOS 6 operating system on OPPO A91 also features many built-in smart features. Features

like the AI ??Ice Box, which allows to "freeze" background apps, rather than closing them; Hyper Boost, a mode that helps to improve phone management, is smarter in the use of system power or Smart Assistant, so users can search and access everything extremely quickly and conveniently. , will both help optimize your device for a superior experience.

The Smart Assistant feature helps you quickly access and search what you need

Not to mention ColorOS 6 on OPPO A91 also features extreme swipe gestures

That's how OPPO A91 is taken care of by OPPO in every way. As a smartphone for the younger generation GenZ, OPPO A91 has both a sleek design that fits the trend, has a powerful hardware in the segment, and is also optimized with software with the operating system. ColorOS has thousands of smart and practical features included. It can be said that ColorOS is the "soul" of OPPO A91, a key determinant of the user's gaming experience, and that is also the "worth" point on this smartphone that many users appreciate. .

OPPO A91 owns 2 color versions: stylish white and strong black, equipped with 8 GB RAM, 128 GB ROM, with an official price of VND 6.99 million. The product will be sold exclusively from 3/3 at Mobile World system.
