Nowadays, with the continuous creation, beautiful ways of lacing more and more, instead of old laces. If you are looking for the best way to tie shoelaces, let's invite you to learn 30+ ways to tie shoelaces that the article shares below.

Here the article shares with you the most beautiful laces, invite you to follow.

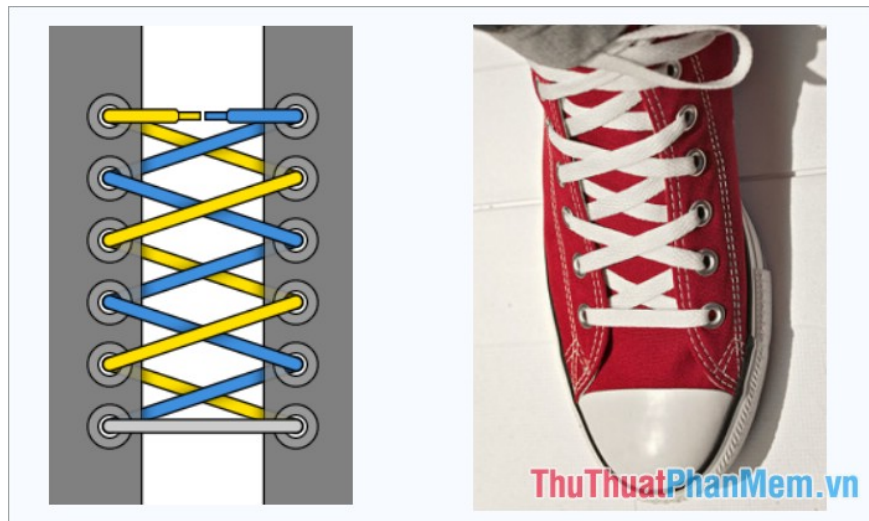

How to tie Criss Cross shoelaces

This is a popular method for tying shoes and is popular with many people to create foot comfort. You can tie shoelaces in this way as follows:

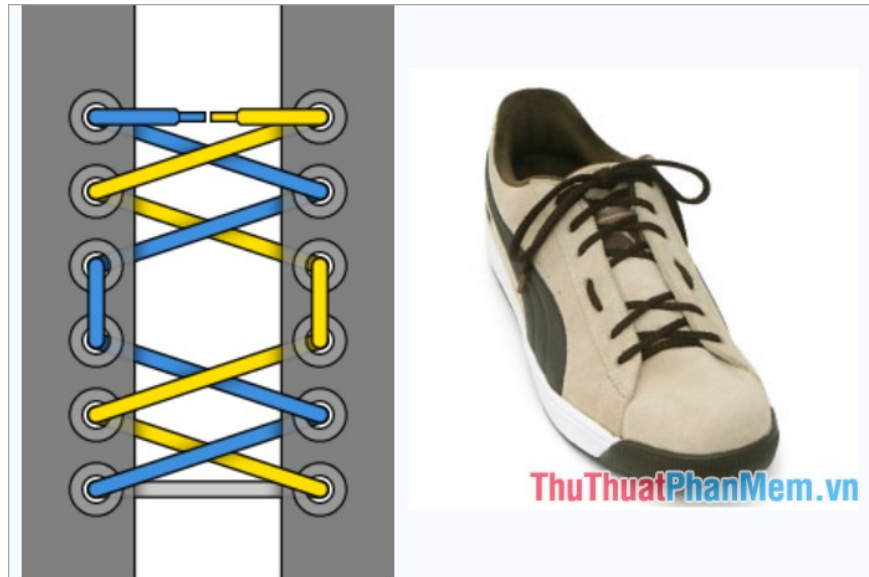

How to tie a shoelace, or a cross

This is a way to reduce friction, laces easier to tighten and loosen. Diagonal alternating straps on the outside and inside, this is also a fast and easy way to tie shoelaces.

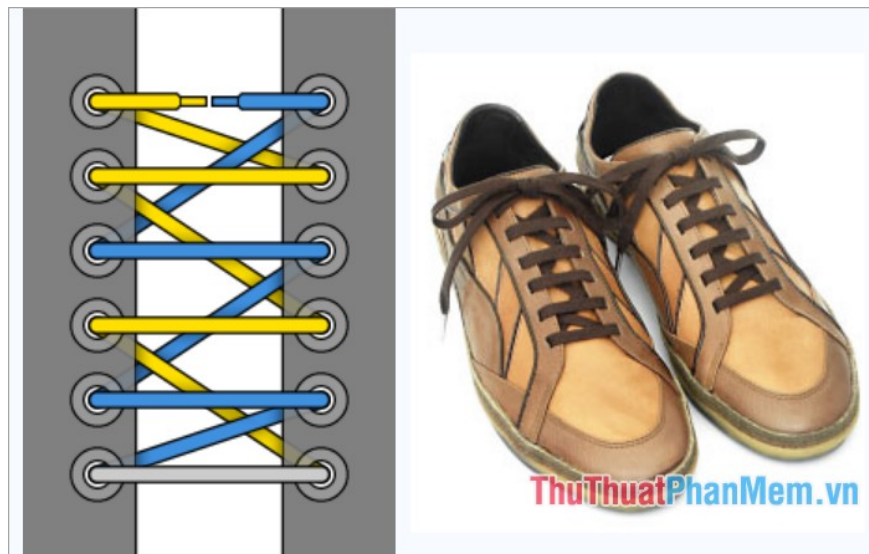

How to tie shoelaces and the distance

This is a simple variation of Criss Cross, this way of lacing shuts a diagonal line with the verticals on the outside compared to the way of lacing Criss Cross and creates a space in the middle of the lacing.

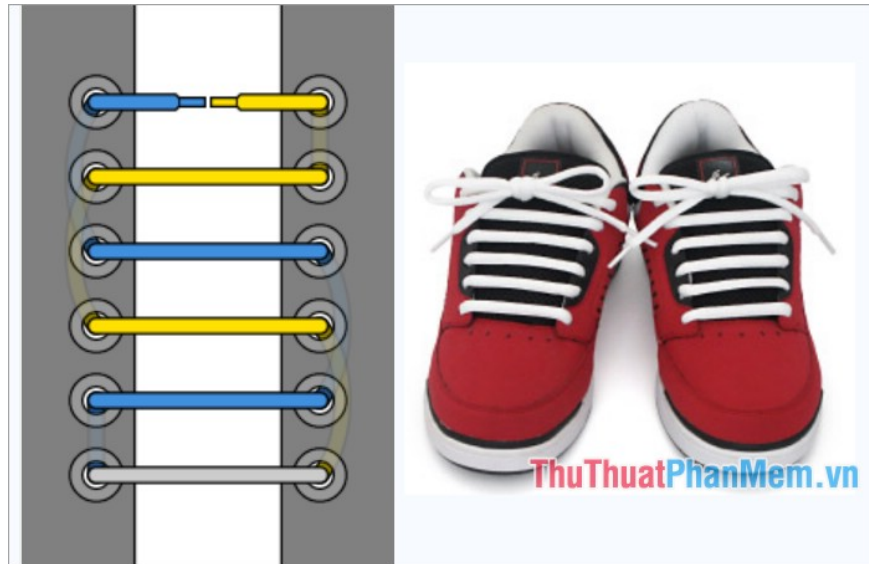

How to straighten European straight shoelaces

This is the traditional straightening method that is more common in Europe. The laces run straight on the outside and diagonally on the inside.

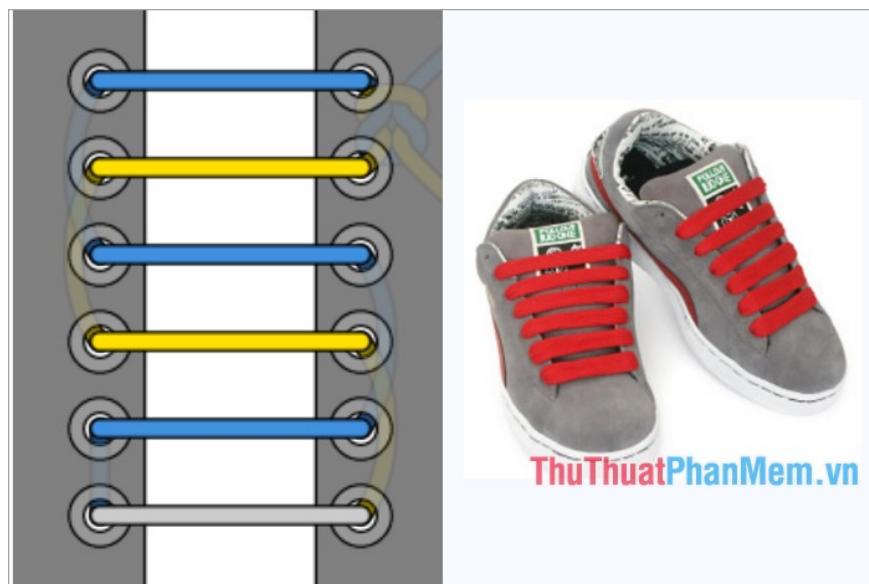

How to tie straight lacing shoes

How to tie this shoelace to remove the diagonal lines below looks more neat, let's see how to tie this shoelace in the image below.

How to tie the shoelace lacing hidden buttons

By hiding the bottleneck below, the unbroken bars of the shoe will look neat and more beautiful.

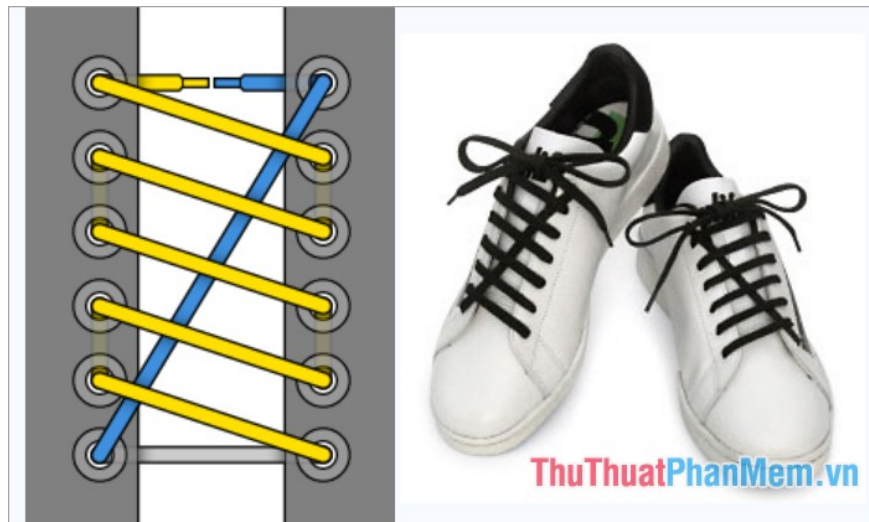

How to tie a serrated laces

This method has all the upper parts forming horizontal lines, the lower parts dragging along a steep angle, shifting the alignment of the sides.

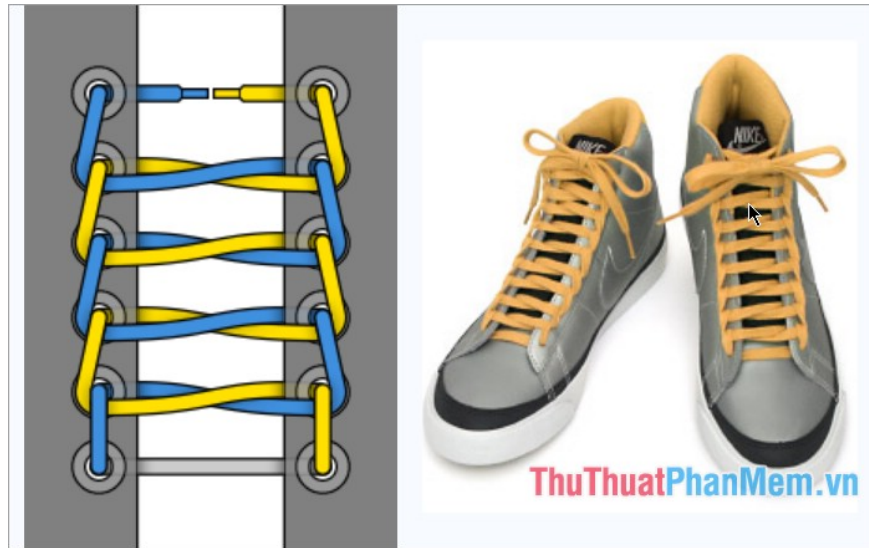

How to tie shoelaces in a lightning bolt

With this lacing, the laces run diagonally on the outside and vertically on the inside. The angled section looks like a lightning bolt. Left and right shoes can be tied together to finish a pair of shoes that will be symmetrical.

How to tie ladder shoes laces

This type of lacing ties the laces horizontally and vertically, forming a safety ladder. This is a bit hard to tighten but it holds very tight, suitable for high boots, hiking shoes, ice skates .

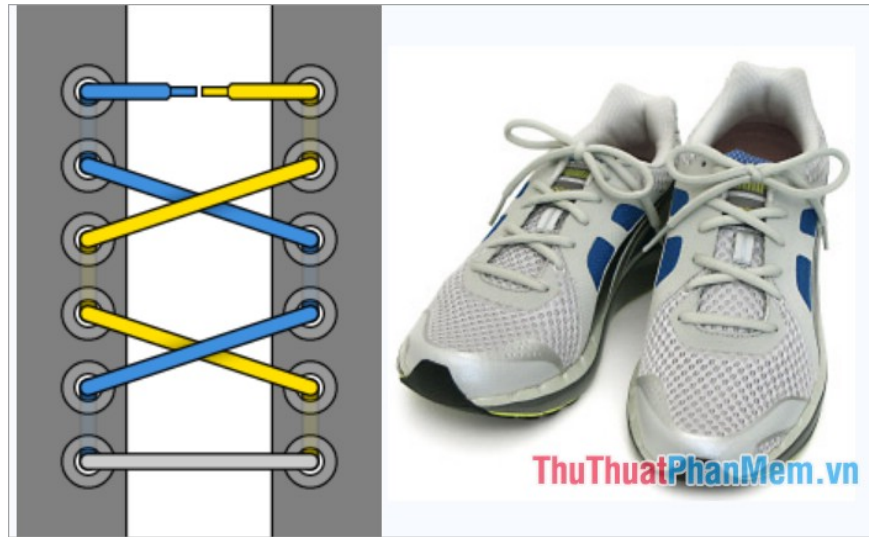

How to tie a web of spider web

In the type of spider web shoelace, the laces weave vertically and diagonally, forming a complex spider web. This is also the type that is difficult to tie, but looks nice and solid suitable for high boots, using contrast laces or high shoes with wide spacing between the two sides.

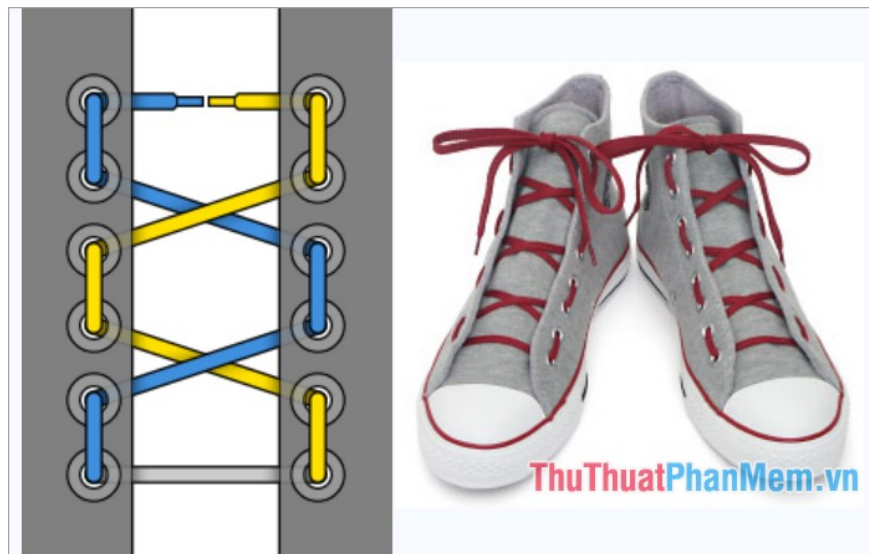

How to tie shoelaces

This method uses less shoelace because the cross straps on the outside and along the weight on the inside form a pattern like a bow.

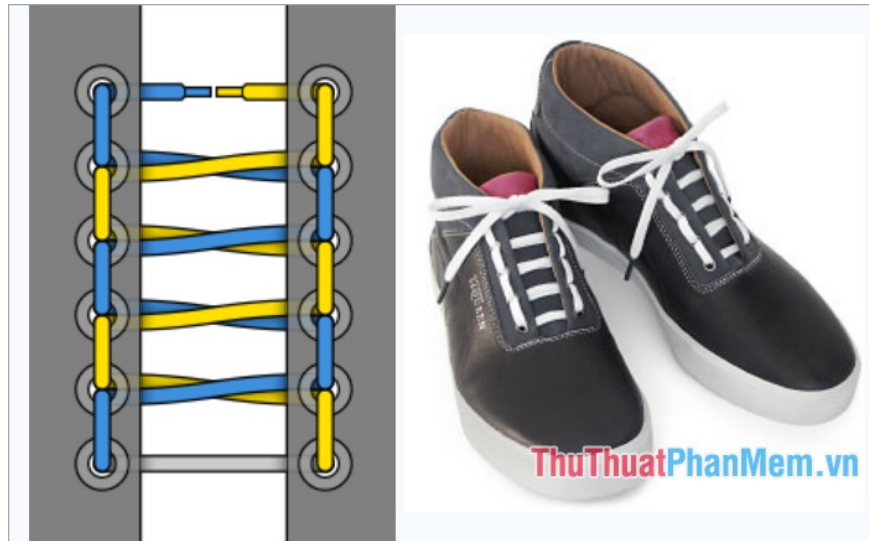

How to tie military lacing style shoelaces

This is the way of the laces commonly used on combat shoes made of thick leather, certainly not easy to bend. This way with the cross on the inside, the sides of the shoes can be more easily bent.

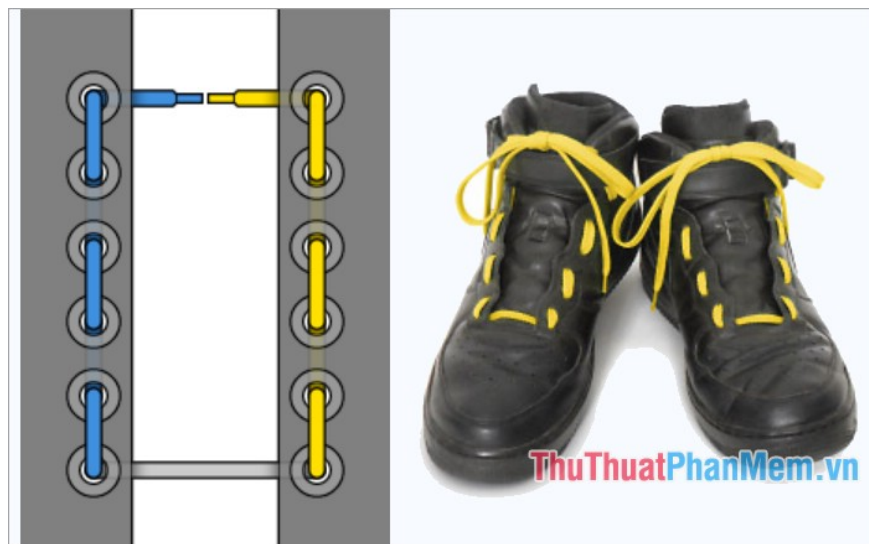

How to tie train-style shoelaces

The inner section runs straight, the outside of the shoelaces runs along like a railway track, this is a bit difficult to tighten but holds shoes tightly and looks neatly nice.

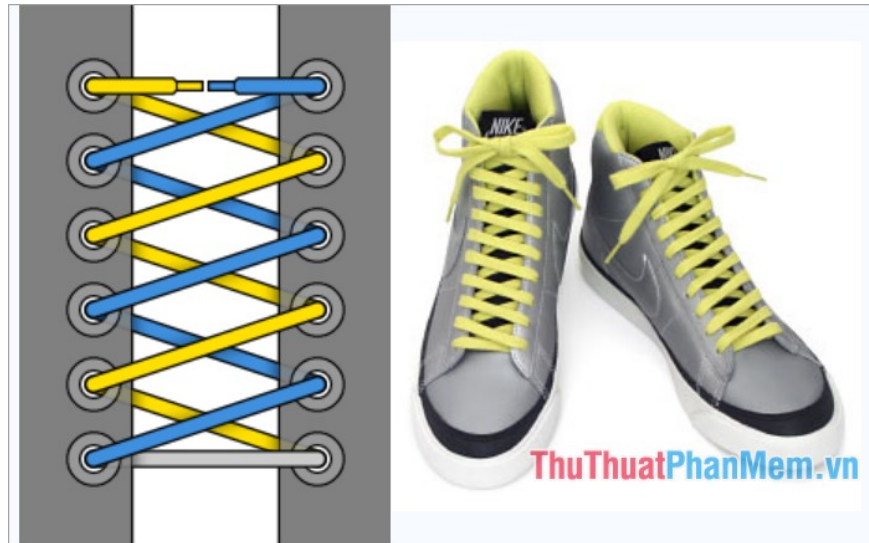

How to tie shoelaces in a street style

This method is not useful because it is uncertain, it is just a new method with laces that follow the shortest path through all shoe holes and only 2 horizontal lines start and end of shoes.

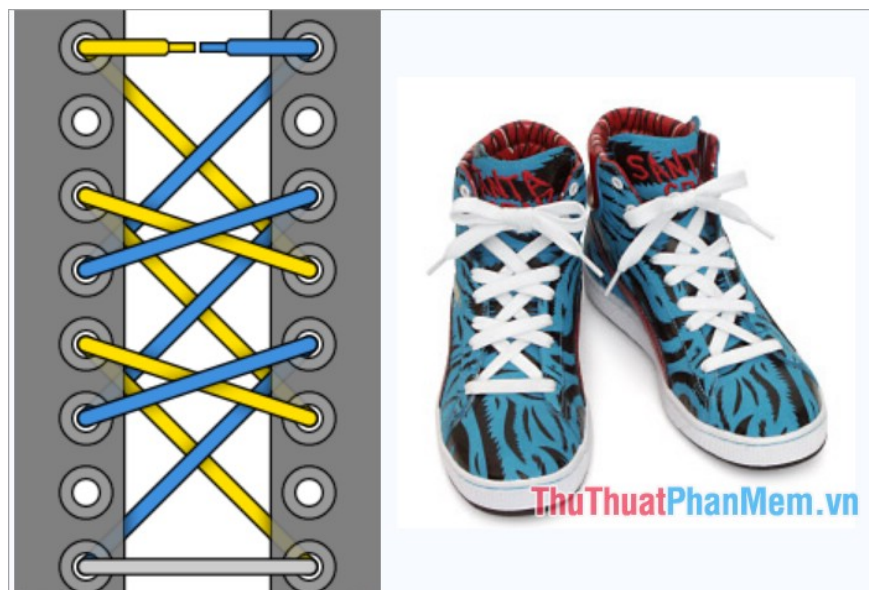

How to tie shoelaces twisted pair

This method has laces on one side and another on the inside, which is a fast, easy way to tighten and loosen shoes. Left and right shoes can be tied in the opposite direction so that the shoes are symmetrical.

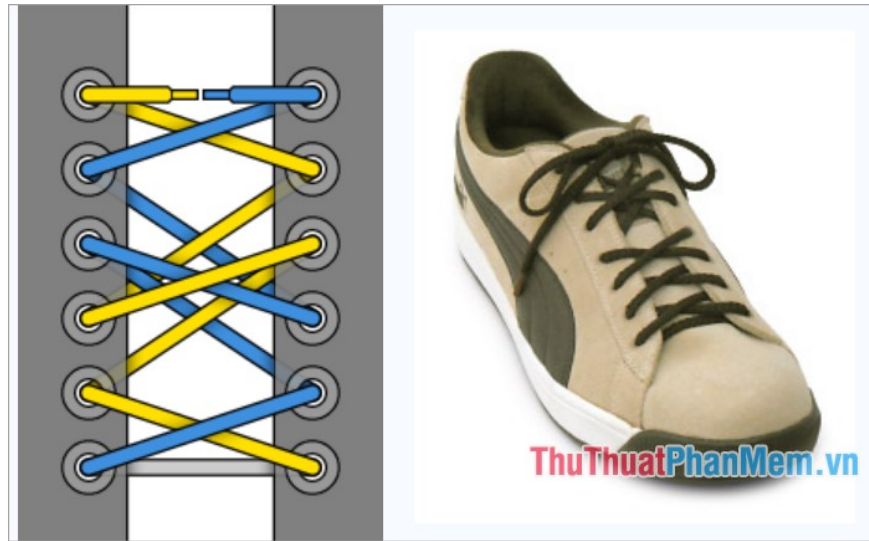

How to tie double lacing shoes

The way of double-lacing style shoelaces is created by running three steps forward (inside), one step back (outside). Although it looks very nice, it is difficult for you to tighten or loosen. Suitable for low shoes or sports shoes.

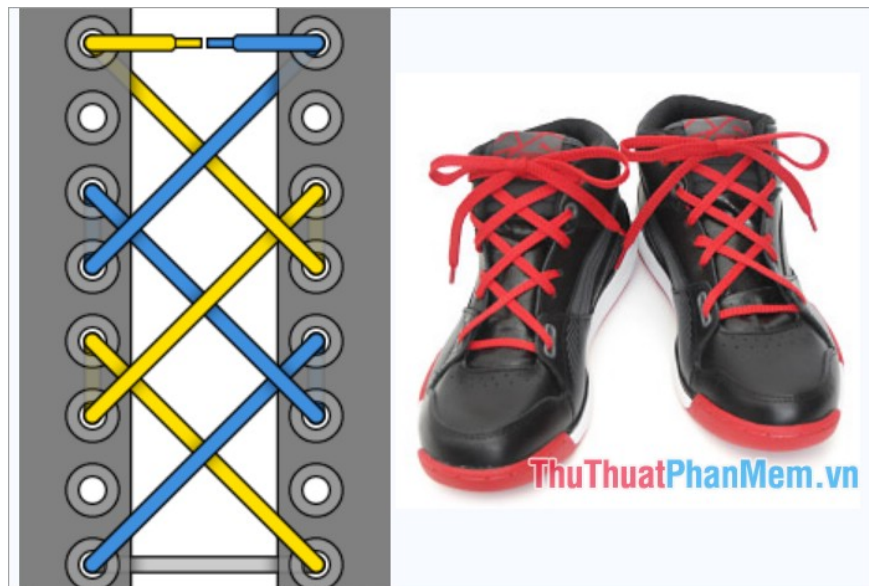

How to tie lacing style 2-1-3

This is how to tie the lacing style in the order of 2-1-3 to create a very solid part. Suitable for heavy shoes such as work shoes, boots and military shoes as well as skates and roller skates often use this laces to create stability in vigorous activities. But this type of lacing can cause the skin to be pinched, so be aware of when choosing.

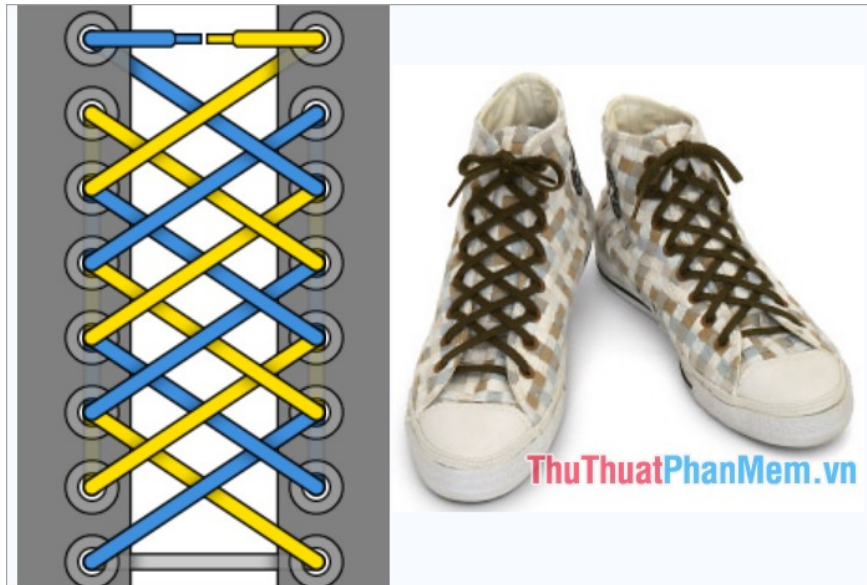

How to tie eyelet style lacing

This type of shoelace is made by running three steps forward and one step back. The result is similar to a sequence of # symbols.

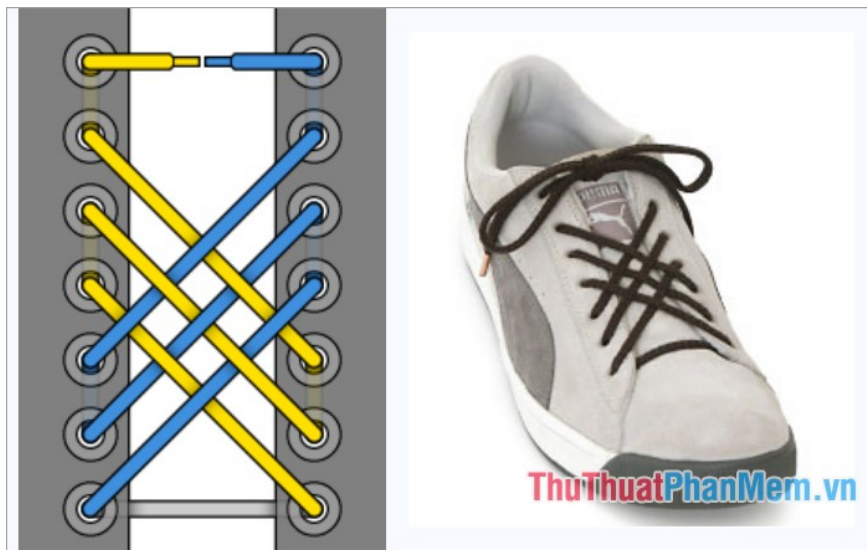

How to tie laces with mesh style

This method runs two steps forward, one step backward with twice going through the eyelet laces, looking like the meshes. This pattern looks nice and holds very tight but also very difficult to tighten.

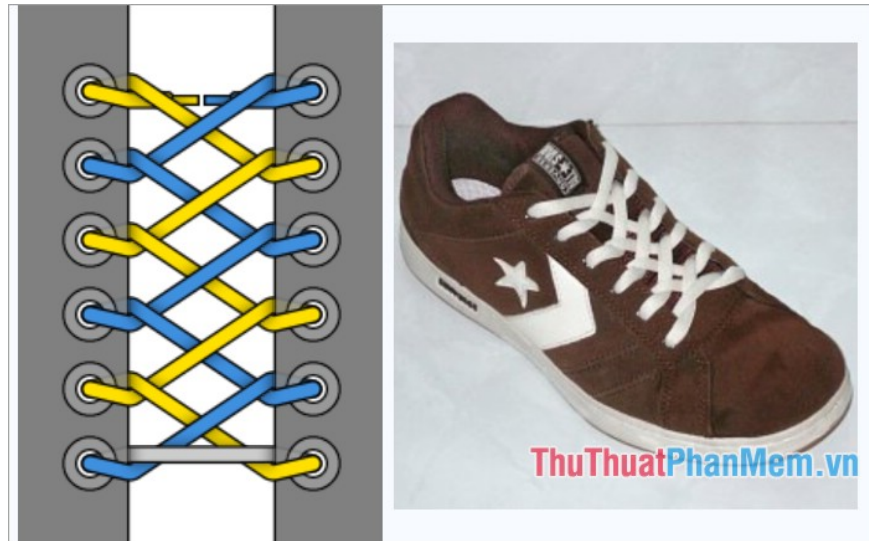

How to tie shoelace laces

This method is also quite common, forming a decorative network in the middle of the border. The straps are crossed diagonally at a steep angle, allowing them to cross each other very well.

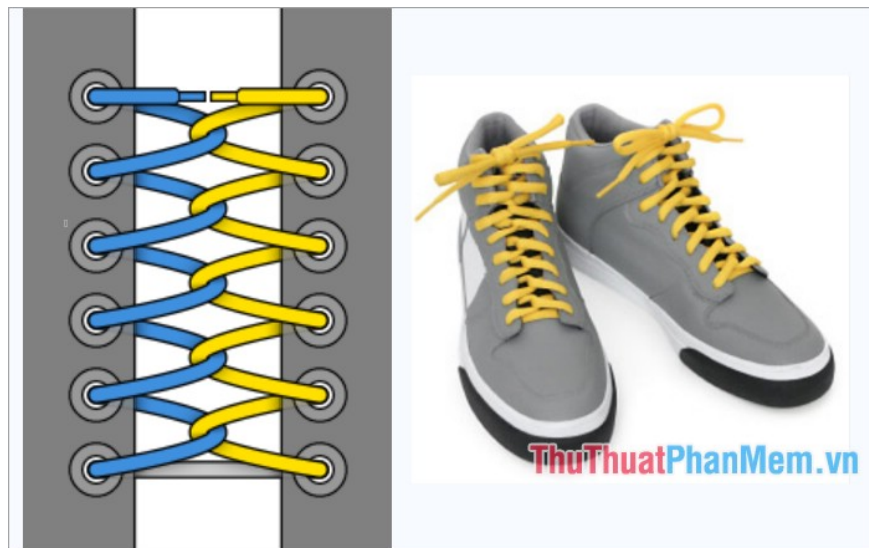

How to tie zippers

This method of fastening shoelaces locks the laces in each pair of shoelaces. This model looks quite interesting, like a zipper, suitable for very tight skates because the lower part holds while tightening.

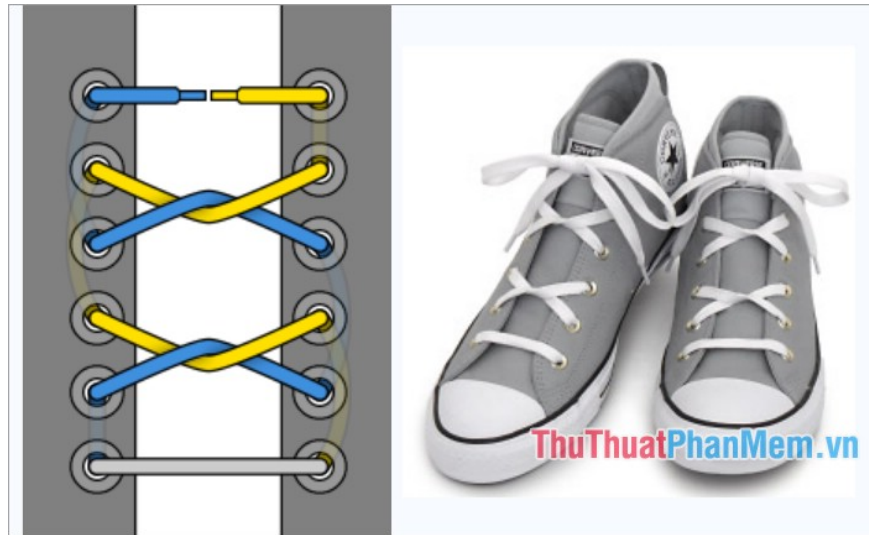

How to tie loop laces

This type of laces each side loops in the middle, like two loaves intertwined, but this type is not sure because those loops tend to move out of the middle position will not be beautiful.

How to tie valley-style shoelaces

Pairs of rows are arranged around each other, rows are made up of hills, and rows of empty rows form a valley. This type of tie is not difficult, but it is not certain.

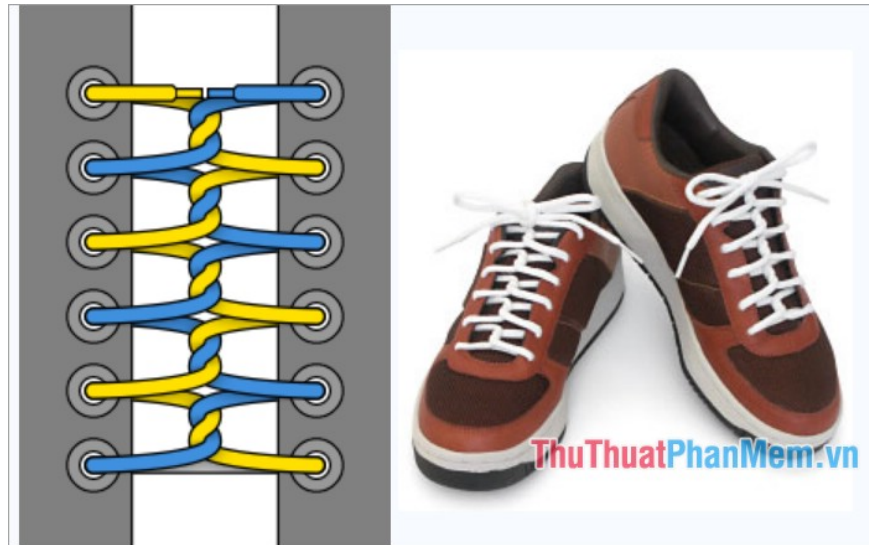

How to tie shoelaces

This method will add an excess knot at each cross that increases friction and keeps the straps firmer so it is harder to loosen the shoelaces. Suitable for tying skates, roller skates .

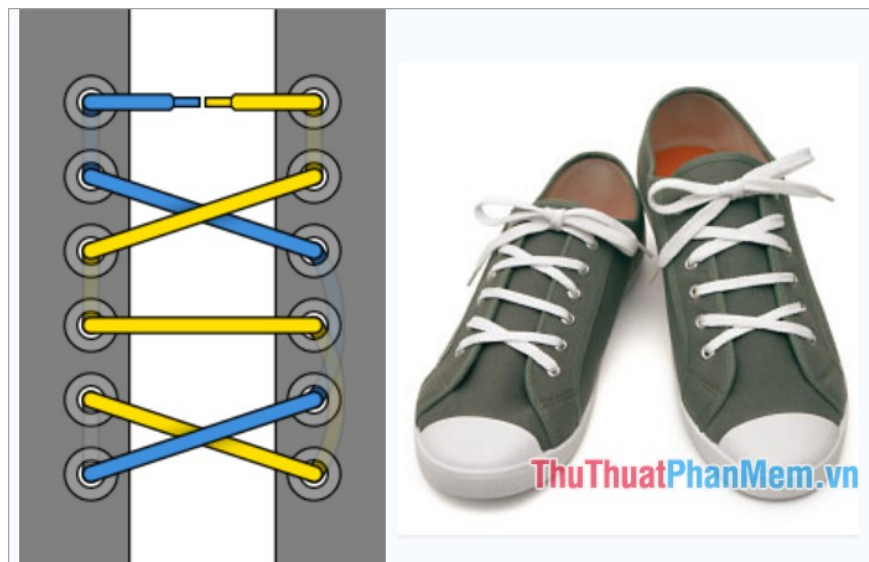

How to tie twisted shoelaces

This way the laces are twisted together with a knot along each diagonal before proceeding to the other side. This type of laces look great with thick, round shoelaces that are tight and also difficult to loosen.

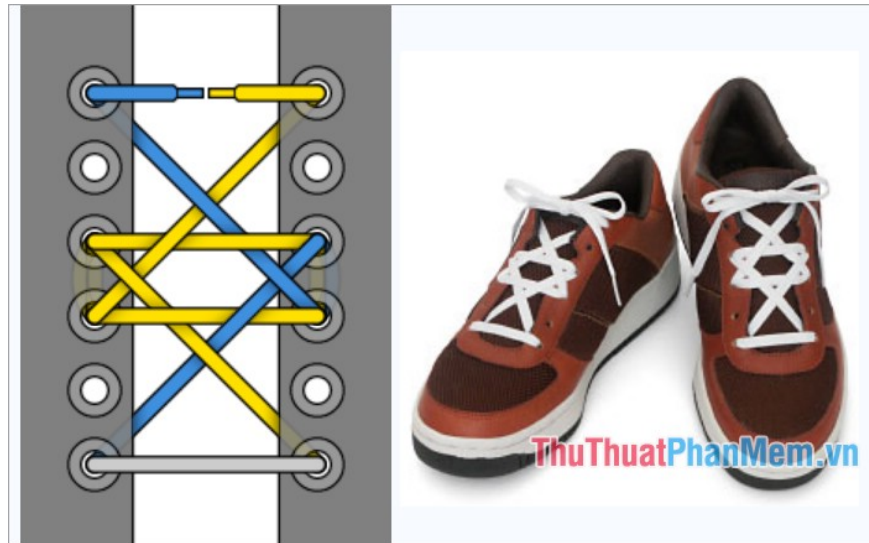

How to tie Roman lacing shoes

This style will create shapes like X and I intertwined to look like Roman numerals.

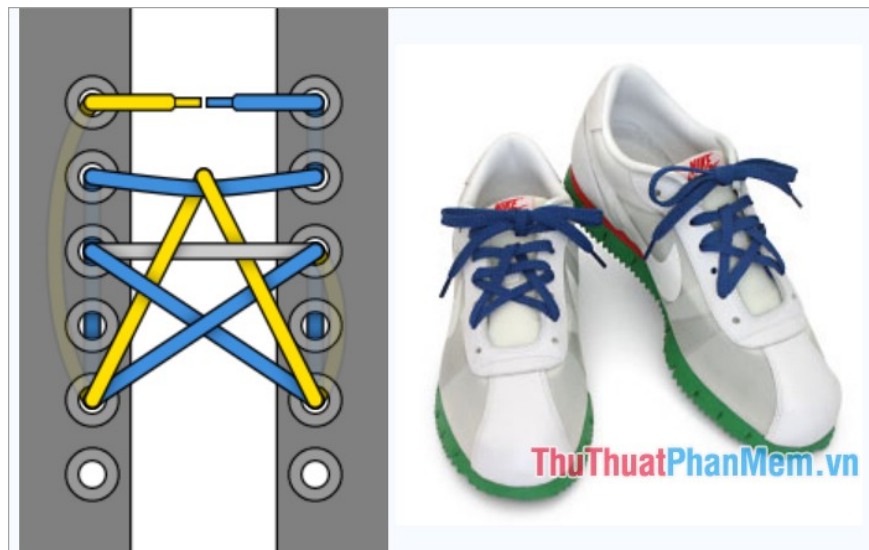

How to tie hexagonal lacing shoes

This constrictor will create a beautiful hexagon (six-pointed star), but rather loose, which does not hold.

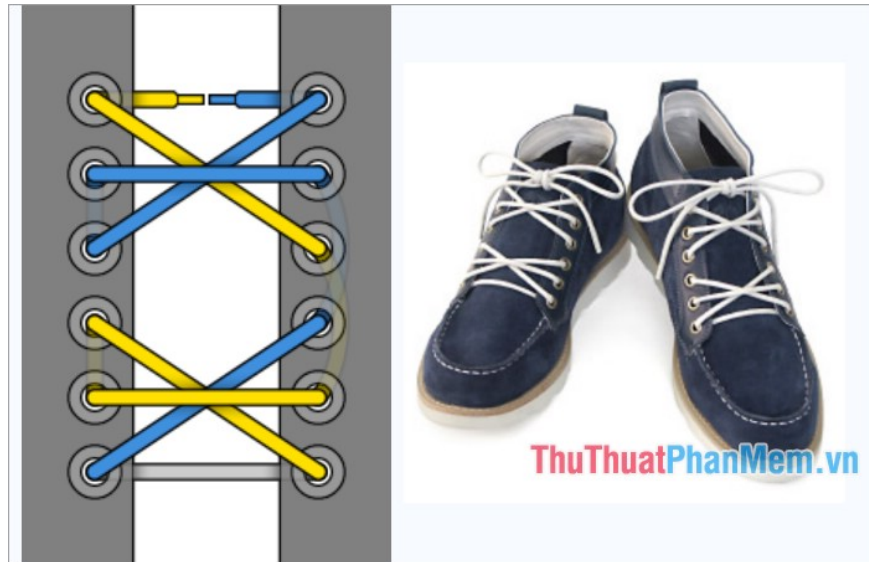

How to tie star-shaped shoelaces

How to tie this shoelace will create a beautiful and unique pentagram star, suitable for those who like to impress and stand out.

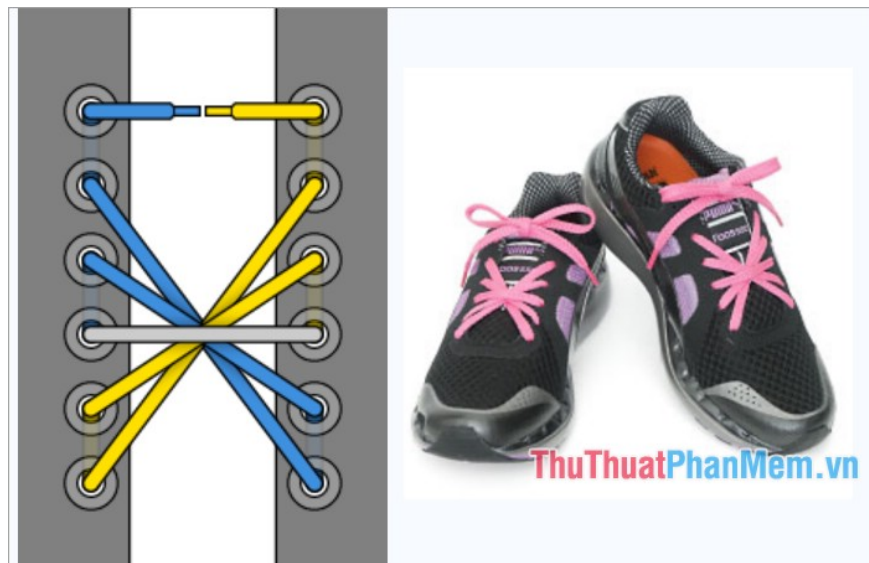

How to tie shoelaces in asterisk style

The trim set of three pairs of bands with a diagonal plus a straight section leads to a series of asterisks *. How to tie this shoelace is quite nice but difficult to tie and harder to tie.

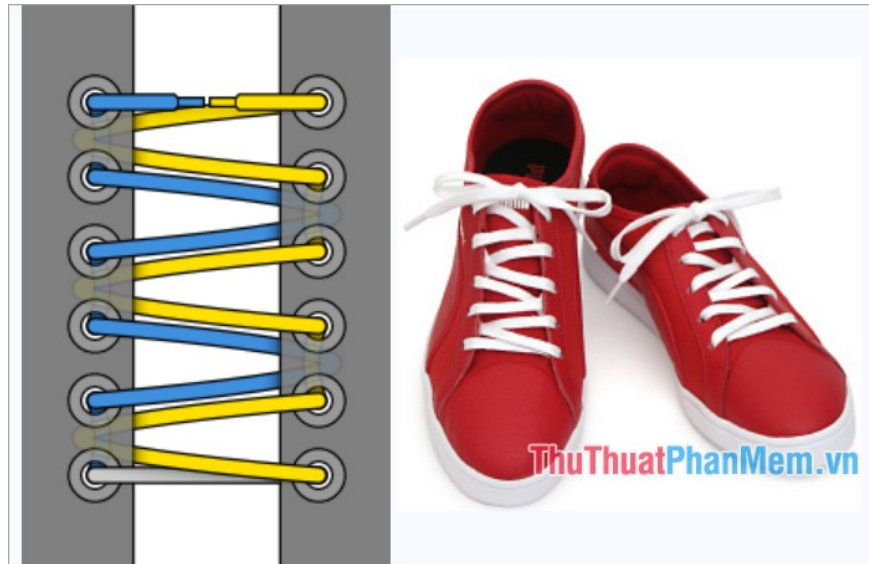

How to tie Starburst shoelaces

This way, all the longitudinal sections hidden inside and the outer diagonal lines intersecting in the middle of the shoe form a Starburst. This type has a high aesthetic but difficult to tighten and loosen.

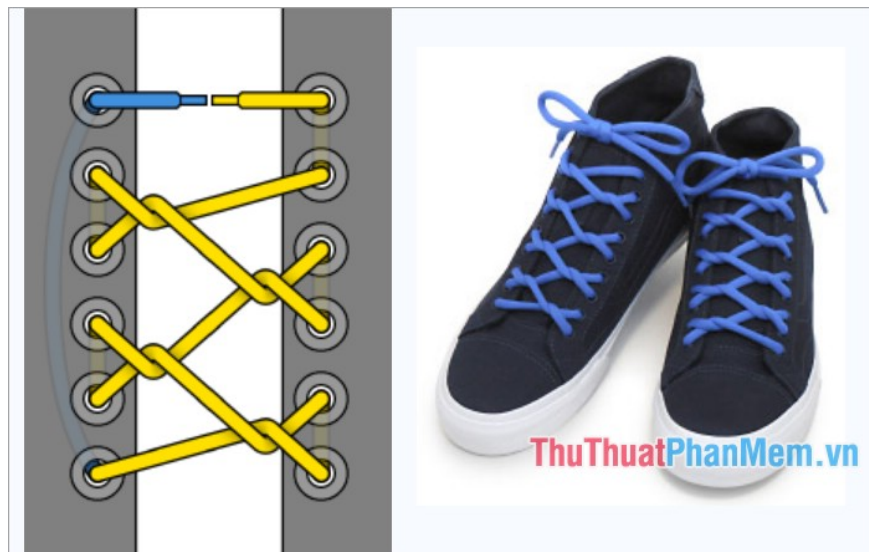

How to tie Zig Zag shoelaces

This method of alternating laces runs along the inside or around the vertical sections on the opposite side to form a winding path like the beautiful Zig Zag double line.

How to tie swirly laces

This alternates alternating left and right of the previous rows to form a decorative border like part of the fence. How to tie this shoelace nice but harder, you can see how to tie in the picture below.
