The most effective iPhone cleaning software and applications. To clean junk on iPhone effectively, in addition to manual methods such as clearing browsing data, restoring factory settings, etc., we can use different applications and software to clean iPhone garbage most effectively. Invite

To clean junk on iPhone effectively, in addition to manual methods such as clearing browsing data, restoring factory settings, etc., we can use different applications and software to clean iPhone garbage most effectively. Invite you to check out the article below.

For devices that have been unlocked (Jailbreak) we can use software like Clean Master, PhoneCleaner . For non-jailbroken devices, we use the software on the iPhone in combination with the software in the computer.

3uTools software

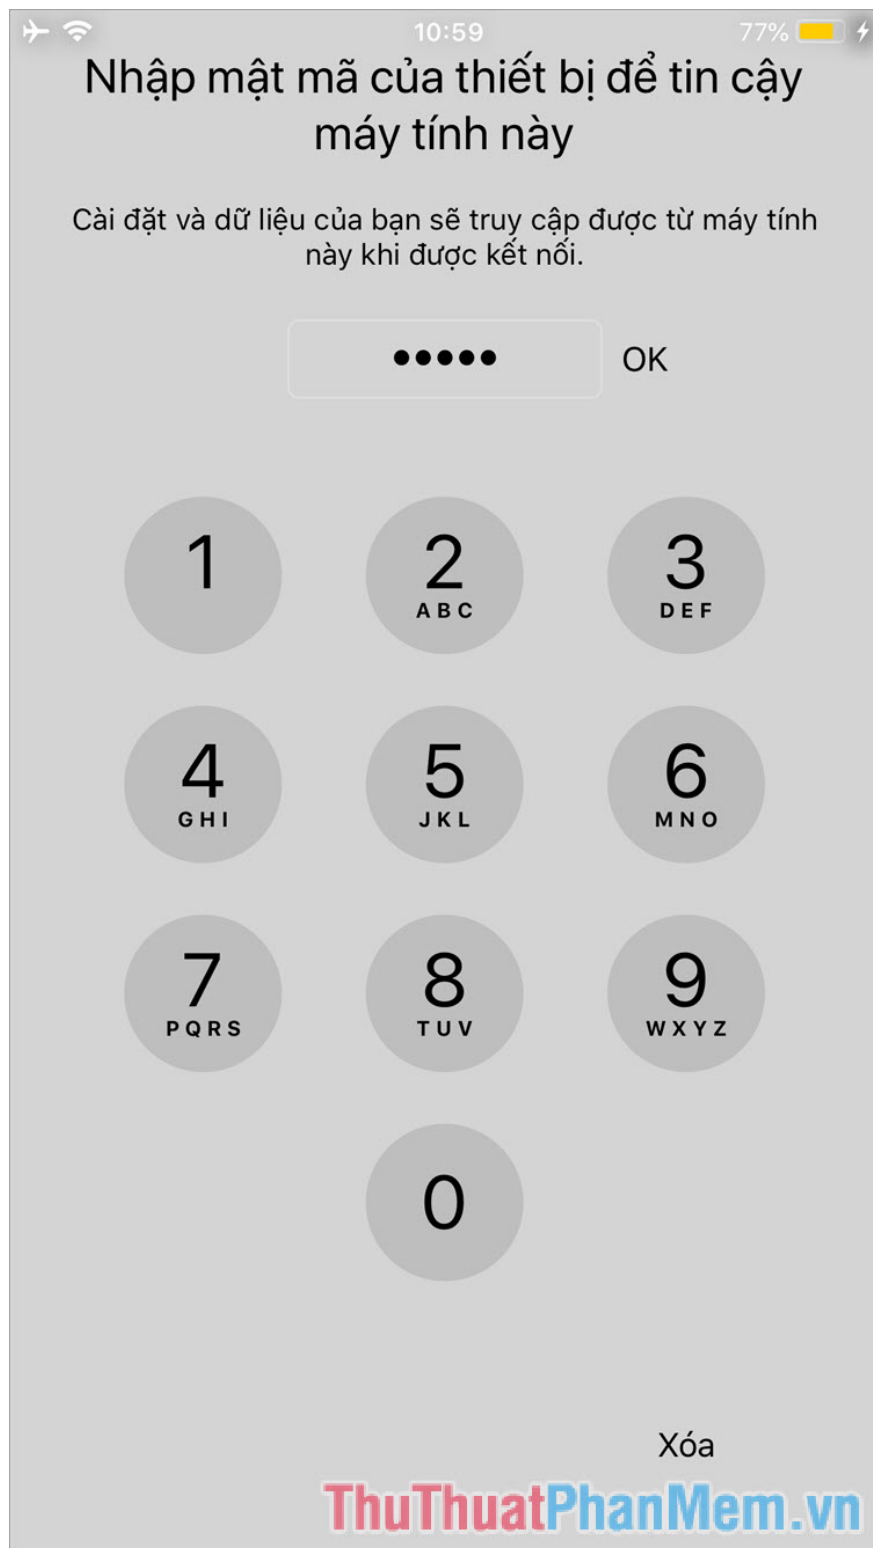

You can download 3uTools for PC at the homepage:

<http://3u.com/>

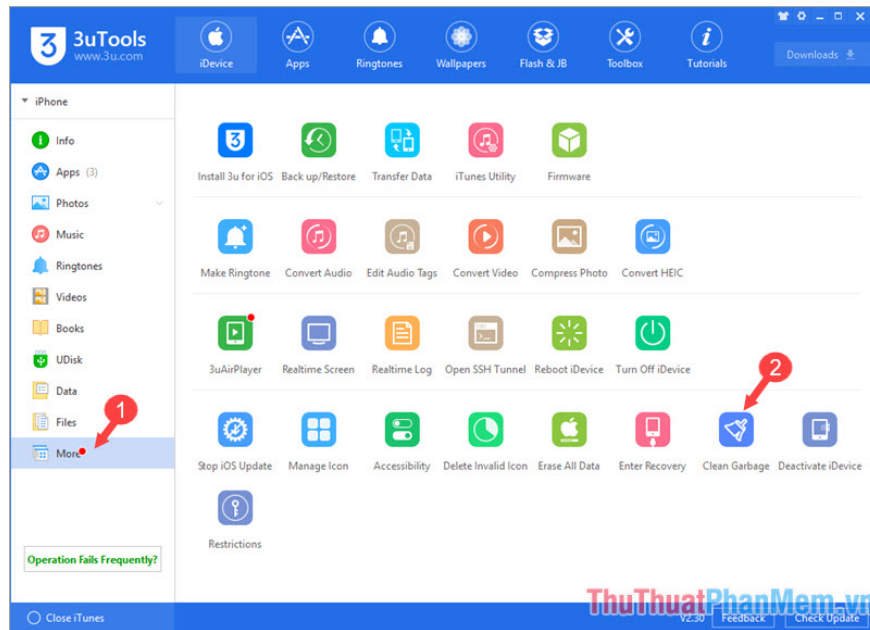

After downloading 3uTools and installing it on your computer, proceed to connect your iPhone to the computer and select **Trust** this computer.

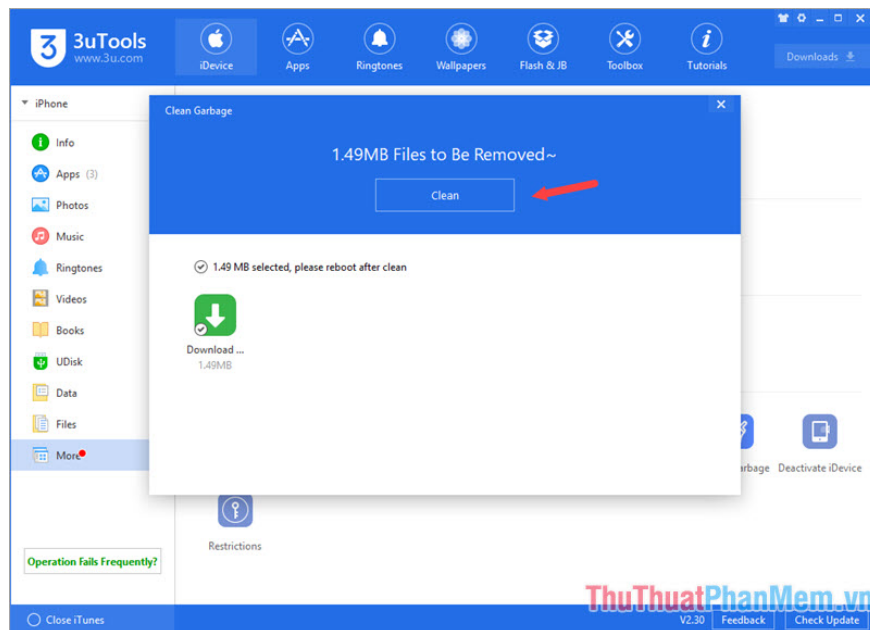

Enter the password to trust the computer. Then we can manipulate by software with the iPhone already.

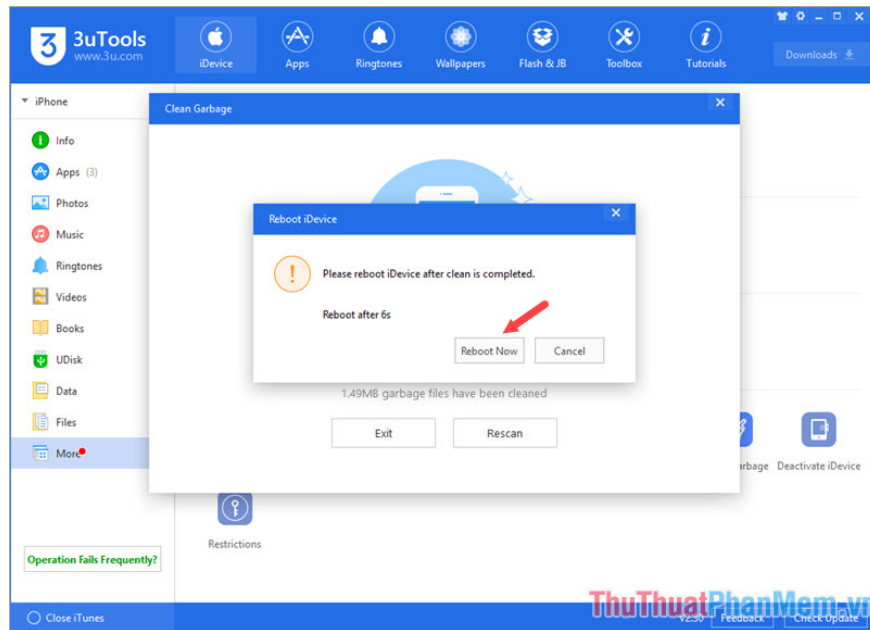

Step 1: At the main interface of the software, select **More** => **Clean Garbage** as shown below.

Step 2: After clicking on the **Clean Garbage** option , the software will scan the junk files and display the results as shown below. You tick the item to clean junk files and then click **Clean**.

Step 3: After cleaning is complete, the software will notify reboot for your iPhone, click **Reboot Now** to quickly boot iPhone.

Use the Magic Phone Cleaner software

You can download Magic Phone Cleaner directly from the App Store app store or download it via the following address:

Emails

And the feature to clean contacts without a name (**No name**), no phone number (**No phone numbers**) or no **phone numbers** and e-mail (**No number & email**).

The iOS operating system is quite stable and rarely happens as garbage on the Android operating system and therefore applications and software supporting garbage on iPhone are quite few and hardly bring positive effects. For long-term use and no memory overflow, you should use manual ways to clean junk like clearing browsing data or restoring your computer to its original state. Good luck!
