

# The most outstanding computers at IFA 2013

IFA 2013, Europe's big technology exhibition took place very exciting with many new products introduced. As usual, not only is it a place to showcase mobile products, many computer manufacturers have also introduced new products at this fair.

**IFA 2013, Europe's big technology exhibition took place very exciting with many new products introduced. As usual, not only is it a place to showcase mobile products, many computer manufacturers have also introduced new products at this fair.**

It is easy to see that manufacturers still follow the trend of hybrid design between tablet and laptop. Evidence is that many hybrid models of this type have launched at the Fair. Besides, the traditional clamshell laptop is also available with AiO machines (all in one). Here are the most outstanding computer models introduced at IFA recently.

## Sony Vaio Fit

**Vaio Fit** is a hybrid laptop with a rather unique design style of Sony at IFA 2013. The machine is designed to add a hinge at the center of the upper lid to create a horizontal line from left to right. This hinge will help the screen to flip backwards, then face down on the keyboard to switch to tablet use mode. This design makes using the tablet mode without stumbling across the keyboard like IdeaPad Yoga because the keys are now hidden inside.

Vaio Fit has 3 versions with 3 screen sizes of 13.3 inches; 14 inches and 15.5 inches; in which the Vaio Fit 15A supports IPS screen Triluminos Display with a resolution of 2,880x1,620 pixels, this is the highest resolution on VAIO screen ever. The remaining models support Full HD screen of 1,920x1,080 pixels. Sony also brought the famous Triluminos Display technology and X-Reality Mobile technology from BRAVIA to this laptop line.

Other configuration parameters include Haswell chip Intel Core i5 or i7 energy saving, RAM up to 16GB, SSD hard drive up to 512 GB or 1 TB hybrid, even with optional Optimus technology discrete graphics card Nvidia.

## Sony Vaio Tap 11

There is a design similar to Microsoft Surface but **Vaio Tap 11** of Sony has a keyboard, not a flat keyboard like Surface's, for better typing. Tap 11 has an 11-inch screen, Intel Core chip, 1920 x 1080 resolution IPS screen, supports a stylus.

This is also the thinnest laptop Windows 8 tablet today. Other configuration parameters include Intel Core i5-4210Y chip with 1.5GHz speed; optional Core i7-4610Y speed of 1.7GHz; 4 GB RAM, 128 GB SSD.

## ThinkPad Yoga

ThinkPad Yoga can be considered as a product that Lenovo wants to overcome the inherent disadvantages on IdeaPad Yoga. Although there is a 360-degree folding design similar to IdeaPad Yoga, but when you flip the screen to use it in tablet mode, the cover frame around the keyboard is raised to the same level as the keys, avoiding touching these keys.

The ThinkPad Yoga has a 12.5-inch 1.920x1.080 screen with IPS background, supports pen input, 4th generation Intel Core i CPU, SSD option up to 512GB or HDD up to 1TB. It starts at **949 USD** and will be sold in November.

## **Asus Zenbook UX301**

**Zenbook UX301** is the latest high-end laptop belonging to Asus' famous Zenbook line. Machine with Gorilla Glass toughened glass layer 3 is covered with a shell to prevent good impact. The 13.3-inch screen of the device can be optionally up to full HD or up to 2,560x1,440 pixels.

Other configuration parameters include Haswell chip with two core Core i7-4558U, 512GB SSD, optional RAM, Intel Iris graphics - the strongest integrated graphics on Haswell, (optional NVIDIA GT 730M discrete graphics card), 802.11ac Wi-Fi connection.

## **HP Envy Recline**

**Envy Recline** is HP's new AiO series. The unique feature of Recline is that it has a gravity-setting design on the center of the device, allowing users to pull the touch screen off the table to work more naturally and still stand firm.

Of course, you can still adjust the angle of the screen to use it like any normal computer. Recline has two screen sizes of 23 inches and 27 inches with the highest resolution option of 1,920x1,080.

Other information about the configuration including Haswell CPU, up to 16GB RAM, 1TB HDD or 512GB HDD, 1GB NVIDIA GT 730A GPU. It has Beats Audio sound technology, supports 802.11ac Wi-Fi connectivity, and has a 27-inch version with NFC. The device is now available on HP's website for a starting price of \$ 1,349 for a 23-inch model and \$ 1,399 for a 27-inch model.
