

## The most sexy laptops today

The following laptops are like supermodels, they are fragile, sexy but still able to meet the needs of their owners.

**Not as powerful as gaming computers, not as good as laptops for tech connoisseurs. The following laptops are like supermodels, they are fragile, sexy but still able to meet the needs of their owners.**

### 1. Apple MacBook Air (1.6GHz, 2GB, 13.3-inch Core 2 Duo processor)

Apple's 'Supermodel' MacBook Air made the tech world seem to be feverish, and the MacBook Air design was extremely fragile and impressive. The air is incredibly thin - the thickest spot is only 1.9cm, and the sleek aluminum chassis of the laptop offers a luxurious, glamorous look for Apple 'pride'.

The device's touchpad can be controlled by gestures. However, in exchange for this incredible slenderness, Air had to sacrifice some important features, such as integrated optical drive, FireWire port and Ethernet port.

Apple MacBook Air is priced at 2,250 USD.

## **2. ASUS U2E (1.06GHz Core 2 Duo U7500 Processor, 1.5GB RAM)**

The stylish Asus U2E is leather-covered on this surface that will definitely add options for those who need to buy a laptop as a jewelry. Machine weighs only 1.27kg; 11 inch wide screen with a resolution of 1366 x 768 pixels; Support HDMI port to connect to TV and FireWire port. The most outstanding feature of Asus U2E is that it has a stylish and beautiful design and has 2 colors for you to choose (black, brown).

Unfortunately, the keyboard of the device is quite difficult to use.

U2E is the most expensive laptop of Asus today. Selling price in Vietnam is about 42 million dong.

### **3. IdeaPad U110 (1.6GHz Core 2 Duo L7500 Processor, 2GB RAM)**

The most impressive feature of IdeaPad U110 is the beautiful design with eye-catching red color and the body is decorated with many outstanding patterns. Perhaps this is a feature that has not yet appeared in Lenovo computers.

Another impressive point is its keyboard, glossy and mesmerizing. Very polished and completely different from the previous Lenovo laptop keyboard. Looking closely at each key we can see that it seems to stand out more than all the other keys. The keys are designed to be larger than ultraportable computers with the same 11.1-inch screen. However, the space of the device is quite small, so it is difficult to use.

The inside of the body is more gorgeous with fancy decorative patterns. IdeaPad U110 will appeal to all consumers, including men and beautiful ladies.

IdeaPad U110 has an 11.1-inch screen, 64GB SSD drive or a 1.8-inch 100GB hard drive, Intel Core 2 Duo CPU processor with 1.8 GHz or higher speed, 2GB RAM and a webcam Face recognition function.

Unfortunately, the U110 does not have an integrated optical drive, does not support HSDPA / 3G connectivity, the screen is sometimes very reflective, the keyboard is easily scratched. Fixed machine configuration does not allow upgrades.

#### **4. Fujitsu LifeBook U2010 (Intel Atom Z530 Processor 1.6GHZ, 1GB RAM)**

Perhaps LifeBook U2010 is the world's smallest tablet PC tablet, making it easy for users to navigate in the smallest bags. U2010 has a sleek, sexy look and is especially easy to twist and bend the screen.

LifeBook U2010 is equipped with 1.6GHZ Intel Atom Z530 chip, 1GB RAM.

U2010 has very interesting features, like notes, recording. And the machine also has many shortcuts to assign programs. The screen has a high resolution, displays crisp images, is able to recognize handwriting better than previous versions.

Price: 1,242 USD.

#### **5. Sony VAIO VGN-TZ38GN / X (1.33GHz Core 2 Duo U7700 Processor, 2GB RAM)**

VAIO TZ is the best 'top' ultraportable laptop from Sony and VGN-TZ38GN / X is the most prominent model among them.

The most impressive feature of the VGN-TZ38GN / X is its battery life of up to 12 hours of continuous use. And, with a weight of only 1kg, Sony's laptop still has a DVD player, fingerprint sensor, TPM security chip.

However, its price is not pleasant at all - \$ 2,900.
