New generation OS of Apple called Mountain Lion inherited many advantages from iOS (available on iPhone, iPad) such as iCloud, iMessage or Twitter integration .

Mountain Lion has many features of iOS.

Mountain Lion (or OS X 10.8) supports iCloud online cloud service, which allows to synchronize information (contacts, documents, documents or photos .) between iPhone, iPad and any computer When users log into Apple account. In addition, it also has built-in Message tool (similar to iMessage on iOS), notification feature (Notification), Twitter social network or Game Center.

OS X 10.8 allows updating to a newer version even when the computer is in Sleep mode and optimized for the ultra-fine Retina display on the new generation MacBook Pro.

The Mountain Lion is sold next month for \$ 20 and if users buy Mac computers from June 11, it will be upgraded for free.
