

## The new Envy 15 will be equipped with USB 3.0

HP spokeswoman Sheila Watson said the computer maker will begin shipping the Envy 15 laptop with a USB 3.0 interface during the week.

**These new models will be launched by the manufacturer right this week.**

HP spokeswoman Sheila Watson said the computer maker will begin shipping the Envy 15 laptop with a USB 3.0 interface during the week. In addition, the Envy 15 is also equipped with an ATI Mobility Radeon HD 5830 discrete graphics card that supports DirectX 11 and Intel's powerful Quad-core i7 processor. The Envy 15 model has a USB 3.0 port that was also introduced by HP at the CES technology fair last weekend.

According to HP, the USB 3.0 interface will also be available on the EliteBook line of products with 8540p, 8540w models and sold as soon as possible.

In addition to HP, Asus is also pushing to bring USB 3.0 standards into its new laptop products. The N61Jq model is likely to be the first product of the company to integrate this USB standard that will be available in the market by the end of the month.

The new USB 3.0 interface is intended to replace the " *Hi-Speed* " standard of the current USB 2.0 interface. USB 3.0 data exchange rate is 10 times USB 2.0, reaching 5 Gb per second. USB 3.0 is gradually being introduced by manufacturers into their products such as desktops, laptops, phones .
