

The new Sony Vaio Z is revealed

The new Vaio Z appears with a very slim but unclear size. It has two colors: black and golden brown. Chiclet keyboard and shortcut keys remain the same as the previous version.

New images show that Sony has changed a lot about the design in the 2011 Vaio Z version.

After announcing the ultra-thin Vaio S 2011 with a metal case instead of plastic as before, the technology questioned what Sony would do with the 2011 Vaio Z line to continue maintaining the gap between the two. this series. Yesterday, some of the images believed to be the first generation of the Vaio Z appeared.

The new Vaio Z appears with a very slim but unclear size. It has two colors: black and golden brown. Chiclet keyboard and shortcut keys remain the same as the previous version. The device is equipped with USB 3.0 port on the right side.

There is currently no detailed information about the configuration of the new Vaio Z series.

Here are some leaked images that are supposed to be the new generation Sony Vaio Z:

The new Vaio Z seems to have a slightly thicker screen border than the old version.

The design of the upper surface has two straight lines that make a difference.

Next to the machine.

Chiclet keyboard with large navigation keys.

The shell is more likely to remain aluminum alloy.

New Sony Vaio Z photos appear yellow.

Close up of the logo.

Inside the yellow version is brown keyboard part.
