

The 'nightmare' of the iPhone 14 Pro Max revealed before the launch date, the expected price 'threatened' the Galaxy S23 Ultra

The rival smartphone model of the iPhone 14 Pro Max and Galaxy S23 Ultra will be officially launched on May 24 with an extremely attractive price.

The technology world has recently started receiving notifications about the launch of the Oppo Reno 10 product line, of which the most anticipated version is Oppo Reno 10 Pro +. Accordingly, the smartphone in the same range as the Galaxy S23 Ultra and iPhone 14 Pro Max will be officially launched on May 24. Right now, images and information about the configuration of this model have been introduced by OPPO.

The Chinese technology giant said that Reno 10 Pro + is the most advanced model currently and will be equipped with a Qualcomm Snapdragon 8+ Gen 1 processor combined with up to 16 GB of LPDDR5 RAM and 512 GB of UFS 3.1 memory. Moreover, OPPO also revealed a 4,700mAh battery that will come with the device with 100W fast charging support. The chip of OPPO Reno 10 Pro + launched late last year with formidable performance compared to the A16 Bionic chip on the iPhone 14 Pro Max.

OPPO has also confirmed the screen specifications for the Reno 10 series. These upcoming models will feature ProXDR displays that support 120Hz refresh rate along with 1.07 billion colors.

These panels will even include a maximum brightness of 1400 nits. Based on our previous report, we also know that the base Reno 10 model will have a 64-megapixel triple camera setup. Notably, you can even check out our roundup of the Reno 10 series of smartphones.

On the other hand, the Reno 10 Pro is expected to have a 50-megapixel triple camera setup (combined with an 8-megapixel ultra-wide-angle lens, a 32-megapixel telephoto lens) while the Reno 10 Pro+ will also have a similar camera module. same but with 64 megapixel periscope lenses.

With this series of impressive parameters, OPPO Reno 10 Pro + will probably follow in the footsteps of Reno 9 Pro + and cost from only 12,790,000 a price that Galaxy S23 Ultra or iPhone 14 Pro Max can hardly compete with.
