

## The outstanding laptops sold in June 2013

The market received models at prices below 13 million VND but light and thin designs and sturdy metal frames like Asus K46CA or Dell Vostro V5460.

**The market received models at prices below 13 million VND but light and thin designs and sturdy metal frames like Asus K46CA or Dell Vostro V5460.**

No "terrible" models will be sold in June but the models in the affordable segment are still very attractive. This is the time when Intel's Haswell chip has been launched and ready to be available in the market, so the old chip laptop has started to drop. To own models with Core i5 chips, users now only have to spend about 13 to over 14 million dong. While models like K46CA or Dell Vostro V5460 look slimmer than 20 cm, the price is less than 13 million VND.

**Below are the outstanding laptop models sold out this month:**

### Asus K46CA

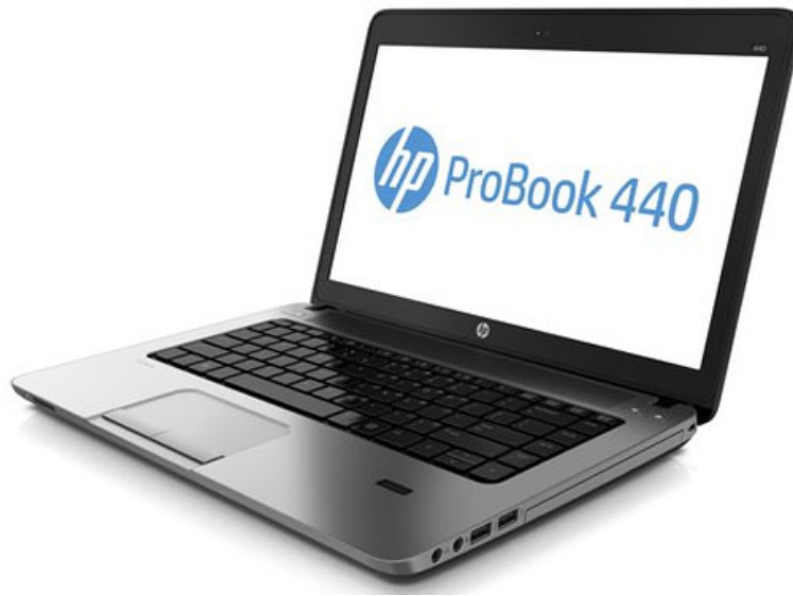

Asus K46CA has a slim but cheap design.

**The K46** is a mid-range model, but has a 21mm slim design and a rugged alloy shell. Although the weight is not particularly special, 2.1 kg is still one of the most attractive options in the market price range.

The new K46 model sold this month is codenamed K46CA-WX129, configured with Intel Core i5-3337U processor with 1.8 GHz speed, 4 GB RAM, 500 GB hard drive, Intel HD graphics chip. Graphics 4000. The device uses a 14-inch screen with a resolution of 1,366x768 pixels, a 4-cell battery for a reported use of 5.5 hours.

**K46CA-WX129** has a reference price of **VND 13.8 million**.

## **HP ProBook 440 and 450**

Metal frame and polished finish on the ProBook 440.

HP this month continues to market two more mid-range models, the ProBook 440 and 450. The 450 model alone has three different configurations. The main difference in 440 and 450 is the 14-inch and 15.6-inch screen sizes respectively.

2013 **ProBook 440** version uses Core i5-3230M chip with 2.6 GHz speed, 4 GB RAM, 750 GB hard drive, Intel HD Graphics 4000 graphics chip. The machine has a weight of 2.5 kg thin 25 mm. Reference price of **VND 15.2 million**.

Meanwhile, the most advanced **ProBook 450** model has a strong configuration with a 2.2 GHz Core i7-3632QM chip, 8GB of RAM, 750 GB hard drive, AMD Radeon HD 8750M graphics card with 2 GB VRAM capacity. The weight of the product is 2.4 kg and has a reference price of **VND 22 million**.

The other two 450 models also use 4 GB RAM, 750 GB hard drive, but a version with an integrated Intel HD Graphics 4000 chip costs VND 15.6 million while the other version uses the AMD Radeon HD 8750M card for a price of 16. , VND 7 million.

## **Toshiba Satellite L830**

Toshiba Satellite L830 white version.

**Satellite L830** is one of the few mid-range models in the market with a compact size of 13.3 inches. This model has a rather " *plump* " style and some colors are suitable for women. The weight of the machine is 1.9 kg.

Version sold this month has a good configuration but attractive selling price is only **12.6 million**. L830 uses Core i5-3337M chip with 1.8 GHz speed, 2 GB RAM and 640 GB hard drive and AMD Radeon 7650M graphics chip.

## **Dell Vostro V5460**

Dell Vostro V5460.

At prices below 13 million, but **Dell Vostro V5460** still cause much attention with slim design not inferior to ultrabook. The body thickness reaches 1.8 cm, the thickest spot is 2.1 cm and weighs 1.54 kg, suitable for users who frequently move.

The configuration of the product is also quite good with the 2.5 GHz Core i3-3120M chip, 4 GB RAM, 500 GB hard drive and Intel HD Graphics 4000 graphics chip. V5460 uses 14 inch screen resolution of 1,366 x 768 pixels.

Reference price of the machine is **12.3 million**.
