

The policy of using Vietnamobile's new SIM card after being 'whistled' by the Telecommunications Department

Under the new policy adopted from March 8, 2018, Saint SIM users will have to consume a minimum of 20,000 VND / month to continue to maintain great incentives.

After being requested by the Telecommunications Department to explain the SIM card package, a huge data preference package is loved by many people, Vietnamobile has started to adjust the Policy of using SIM SIM. Under the new policy adopted from March 8, 2018, Saint SIM users will have to consume a minimum of 20,000 VND / month to continue to maintain great incentives.

Thus, customers who are using the SIM card can still use it normally. The only thing to keep in mind is to maintain this great incentive, the minimum cost of 20,000 VND / month must be incurred. If consumption is less than 20,000 VND, the promotion will be stopped.

Currently, Vietnamobile is still conducting explanatory and reporting steps at the request of the Telecommunications Department. Whether or not the SIM SIM card package violates the legal regulations on management of telecommunications charges has not been released.
