

The prototype image shows the back of Google Pixel 3 XL completely with glass, huge rabbit ears

It seems that Google finally followed the 'design trend' of 2018, following iPhone X.

It seems that the next high-end phone from Google is about to show up, after some information and leaked images of the screen protector, we now see the prototype image of Pixel 3 XL.

XDA Developers recently released images of a device very similar to previous speculations. Prototype has a large rabbit ears, contains speaker and 2 front cameras. There is also a 'chin' on the bottom, between the chin and ears are the two front speakers. The rabbit ears are much larger than the ears of iPhone X, OnePlus 6 or LG G7. OnLeaks says that the rabbit ears of Pixel 3 XL are up to 8.1mm tall. With a regular Android phone, the normally-sized 4-meter-wide status bar on the phone will double the status bar, as on Essential Phone.

Fastboot Mode

Product revision: crosshatch EVT1.0
Bootloader version: b1c1-0.1-4768668
Baseband version:
g845-00008-180429-B-4752067
Serial number: [REDACTED]
Secure boot: NONE
NOS production: no
DRAM: 4GB Micron LPDDR4X
UFS: 128GB Micron
Device state: **unlocked**
Enter reason: error booting boot.img

Front and back of the machine

For the first time we get information about the back of Pixel 3 XL. Like Pixel 2, the phone will have a camera, fingerprint sensor and 2-tone design. The biggest change is to switch from glass to glass that XDA has confirmed with news feeders who have taken these images.

The Pixel 2 is one of the last phones to use a metal back cover. Not sure if Pixel 3 XL has wireless charging, but it is also capable. The back of the phone also has a mysterious logo that was used on previous Google prototypes.

So now, we've learned a little bit more about Google's new phone, codenamed Crosshatch, following the fish-name motif for Google devices. The prototype has 4GB of RAM and 128 GB of memory.

The bottom and the edges show buttons and jacks

The leaked image was taken from multiple corners so we can see the power, volume, USB-C plug port, SIM slot all underneath and no headphone jack.
