

# The Redmi Note 10 has a very good experience with a cheap smartphone in 2021

As one of the Redmi Note 10 Series smartphones from Xiaomi, the Xiaomi Redmi Note 10 is a lot of people interested in the technology and equipment not inferior to its brothers but the price. is better again

If you are looking to buy a Redmi Note 10 phone but do not know whether to buy it, the information below will help you.

## Thin and light design, beautiful, luxurious to every detail

In terms of appearance, the Xiaomi Redmi Note 10 has a design like the devices of Xiaomi in recent times, with the camera cluster looking professional and genuine. It can be said that this design I never look bored, perhaps partly due to the color coordination and layout of the cameras.

In addition, Xiaomi has made the Redmi Note 10 0.6 mm thinner, 20.2 g light, so the overall device is a lot more compact. This gives us a much more comfortable and confident grip, and is easy to put in our pockets or bags.

The one-touch fingerprint sensor integrated at the edge of the bezel helps unlock the phone quickly and feels comfortable in the hand.

On the front, Xiaomi Redmi Note 10 is equipped with a screen size of 6.43 inches. Personally, I think this size is not too big, so it looks neat and very easy to hold. Along with that is the 13 MP selfie camera punch hole design for the full-screen display, thereby providing a comfortable and enjoyable gaming and working experience.

### **Experience great entertainment with AMOLED screen and Hi-res Audio sound system**

At the price of Redmi Note 10 we usually use a cut in technology, such as the screen is an example. But this time, the company is extremely fond of when Redmi Note 10 owns an AMOLED panel for vivid blood and deep black.

The screen of Redmi Note 10 is equipped with a 6.43 inch entertainment screen, Full HD + resolution, high pixel density up to 409 ppi, providing extremely sharp display.

By equipping an AMOLED panel instead of an IPS LCD with FullHD + resolution, it is much more optimized for us to display more vivid, more vibrant colors.

If you previously bought the previous generation Redmi Note just to play games and watch movies for a long time, now you will buy Redmi Note 10 to play games but be more excited and watch movies because the screen is much nicer. a lot of.

Redmi Note 10 also offers an immersive audio experience with Hi-res Audio sound system for high volume and wide sound range, allowing you to immerse yourself in endless entertainment.

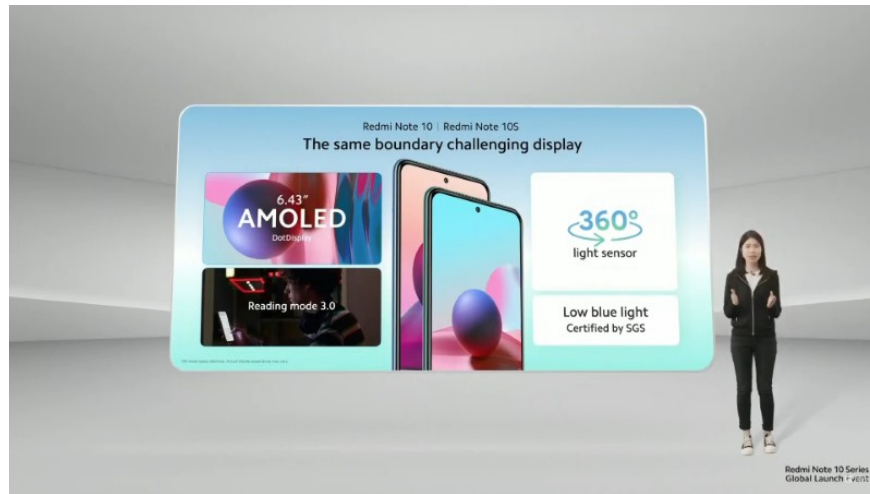

### **Snapdragon 678 with up to 5000 mAh battery promises to provide the best performance in its price range**

Performance is the next highlight of Redmi Note 10. We all know that the Redmi Note Series always gives us the most powerful performance in the price range or mid-range segment.

Redmi Note 10 is equipped with Qualcomm's Snapdragon 678 chip with 11 nm process, and Adreno 612 graphics chip. Comes with 6 GB of RAM for great multitasking capabilities, opening multiple applications at the same time. at absolutely no lag.

The 128 GB internal memory can be expanded up to 512 GB via Micro SD external memory card, giving you the freedom to use data, install many applications or heavy games.

All configurations are guaranteed by a huge capacity battery of 5,000 mAh. I think how much this is enough to satisfy us plowing movies, plowing games throughout or chatting on Facebook of all kinds.

The large capacity battery is also fully charged quickly thanks to the fast charging technology up to 33W. Thereby helping us to always use the device regularly and it only takes about 30 minutes to reach 67% and 74 minutes to fully 100% battery (according to the company announced).

### **Cluster of 4 super sharp cameras, capturing every moment**

Talking about the camera, the Redmi Note Series back here has improved a lot in quality, until the Redmi Note 10 generation, too, with the technologies and parameters that the machine is equipped with have proven it.

Xiaomi Redmi Note is equipped with a rear camera cluster with a resolution of 48 MP, supporting wide-angle photography, 8 MP ultra-wide-angle camera, for an aperture of up to 118 °. You can capture vast landscapes,

skyscrapers easily without having to move far away.

Two 2 MP cameras for measuring depth and macro photography are powerful tools for you to get unique photos at a close distance or take magic photos of deleting fonts without having to use a third app. .

The camera cluster on Redmi Note 10 is powered by intelligent AI technology, allowing you to capture every moment of your daily life with ease and full of detail.

The front camera of the device is designed in a punch-hole format with a resolution of 13 MP, fully supports AI Beautify features, wide-angle photography, font removal with many unique bokeh effects, so you are ready to share your photos. Relatives and family on social networks at any time.

## **Conclude**

It can be said that Xiaomi is gradually perfecting their product lines, bringing outstanding products with many advanced technologies. And Xiaomi Redmi Note 10 is one of the best options for users in terms of configuration, battery and imaging capabilities.

Therefore, if you are in need of a cheap smartphone then surely Xiaomi Redmi Note 10 will be one of the best options.
