## 19. Cups convert water into wine

© delivery.acm.org

**Vocktail** , created by scientists from Singapore, is a cup that can change the taste and color of drinks inside the glass. This device is connected to a mobile application that allows you to control the amount of liquid adjustment settings.

## 18. "Smart" glasses

© Wue Smart Glasses / Kickstarter

There are lots of interesting things about **the Vue glasses** : being able to make calls, listen to music, be ' *guides* ', integrate step counter and calorie counter. The important thing is that they have " *Find my glasses* " function, so you don't need to spend a lot of time to find your glasses.

The Vue looks like other regular glasses ( *also has the option of glazing* ) but they are controlled by the touch system and have a special feature of wireless charging.

## 17. Automatic toothbrush

© Amabrush / Kickstarter

**Amabrush** helps to brush your teeth much better than regular brushes and its operation takes only 10 seconds. You just need to put the Amabrush automatic toothbrush in the mouth, then connect the device to the smartphone via Bluetooth.

## 16. Speech transfer device becomes text

© senstone

**Senstone** can be attached to clothes or worn on the neck like a pendant. With just one button, the device starts translating into text with 97% accuracy. It is the dream of most students and students: you will not need to copy the material yourself. This device can "understand" 12 languages around the world.

## 15. Alarm carpet

© Ruggie / Kickstarter

**Ruggie** alarm mats for those who can't wake up with an alarm clock. To deactivate the alarm, you must step on it with both feet for 3 seconds. This is enough time for your brain to cope with the "horror" of waking up and starting a new day.

## 14. Cake printer

© Pancakebot

**PancakeBot** can create a variety of cakes with any shape, from flower shapes to favorite cartoon characters. In the future, children can make breakfast on their own.

## 13. Water filter bottle

© LifeStraw

**LifeStraw** water filter eliminates 99.9% of bacteria and 96.2% of harmful viruses. Initially, it was made for those who live in developing countries without enough clean water.

However, now this device becomes more popular with travelers who love traveling around the world. You can use this device to drink water directly from rivers or lakes. It can be helpful when you are unsure about the quality of the water you are drinking.

## 12. Packaging change color if inner product expires

© Braskem / Youtube

A company called **Braskem** cooperates with US and Brazilian scientists to create a plastic that can change color depending on the ?? level. It is used to produce packaging for easily damaged foods. Soon we can find fresh milk in the supermarket by ourselves.

## 11. Display on the windshield

© Carloudy / Facebook

**Carloudy** exchanges navigation information with a smartphone or any other Bluetooth device. Images are transmitted directly to the windshield without disturbing the driver. The device is controlled by voice commands, allowing the driver to keep their hands on the steering wheel.

## 10. "Smart" jacket

© Smart Parka / Kickstarter

**Smart Parka** is a 'dream' product for people who constantly lose gloves, as they are integrated into "smart" jackets with towels and hats. The length of the shirt is subject to change and there are many utility pockets inside. In addition, the jacket is attached with an internal name card, which is useful if your jacket is lost or stolen. Of course, it is very warm because the special product was launched for Canada's cold winter.

## 9. "Pocket" cinema

© Nebula Capsule / Indiegogo

This device looks like a soda can but is used as a **projector with wireless speakers** . You can use it wherever you want: on the bedroom ceiling or on the wall. This device operates continuously for 2.5 hours in cinema mode and 40 hours in speaker mode.

## 8. Waterproof jacket
