

The series of photos shows the natural world with many things we don't know

Here are some strange animals that show the natural world is full of amazing things that make us go from surprise to surprise and sometimes even a little fear.

Here are some strange animals that show the natural world is full of amazing things that make us go from surprise to surprise and sometimes even a little fear.

1. A Jerboa gerbil with long and big ears like rabbits. This rodent lives in the desert regions of Mongolia and China. They have incredible speed, can run up to 24 km / h if chased.

2. The red-faced bat uses its fins as legs to move. This exotic fish lives mainly in the sea area of ??Galapagos Island, Ecuador, a depth of 100m below sea level.

3. Saiga antelope stands out with an oversized long nose. This is one of the oldest mammals and a noble antelope, listed as critically endangered.

4. Crested ostriches can reach as high as 1m², living in the islands of New Guinea and Northeast Australia. Like other ostriches, this animal has wings but cannot fly.

5. Narrow-headed tortoises, which live in South Asia, they only land when they need to lay their eggs.

6. Yellow-nosed snub-nosed monkey with an orange-yellow coat and a pale green face. This primate is an endemic species that lives mainly in central and southwestern China.

7. Kori is the heaviest flying bird in the world. When mature, the male can be 70-120 cm tall and weighs an average of 13.5 kg.

8. A Crabronidae bee is transporting the mud to build a nest.

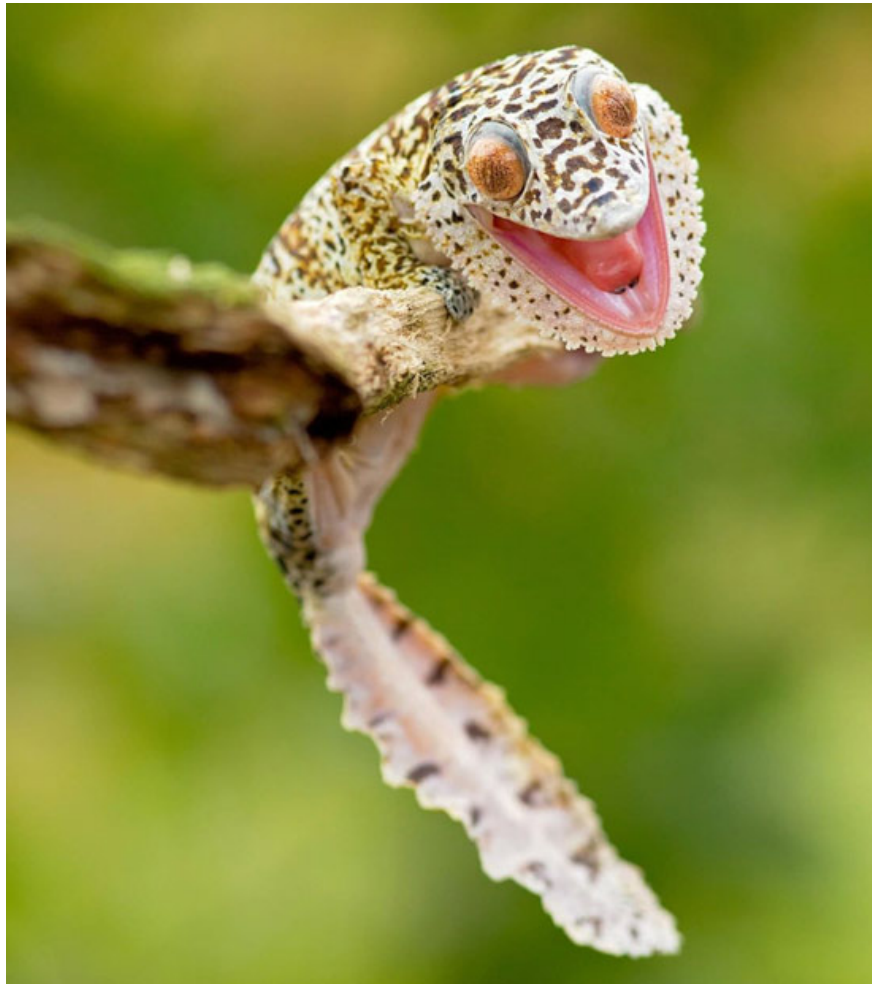

9. Sagehen's pheasant stands out with two yellow bags on her neck. The male will try to expand to the size of these 2 bags when flirting with the female. This is the largest pheasant species in North America.

10. This proboscis monkey only appears in Borneo island, Indonesia.

11. Satan tailed gecko with weird smile. The eyes of geckos are very large and have a special structure that helps them to hunt in the dark.

12. A Persian cat with its coat grows more than usual due to its hypertrichosis or werewolf syndrome.
