3. Log in to Facebook using your username
4. Some errors that prevent users from logging into Facebook

How to log in to Facebook using Gmail

By logging into Facebook using Gmail, you can access your social media account quickly and conveniently. Simply go to the Facebook login page or open the Facebook app on your phone, then enter your Gmail address and password, and press Log in – you're done.

1. Log in to Facebook on your computer.

Step 1: From your web browser, go to <http://facebook.com> or click [HERE](#)

- **Note:** To perform this trick, you need a Facebook account. Refer to how to **register for Facebook** here.

>> **If accessing Facebook.com is blocked, see how to access Facebook .**

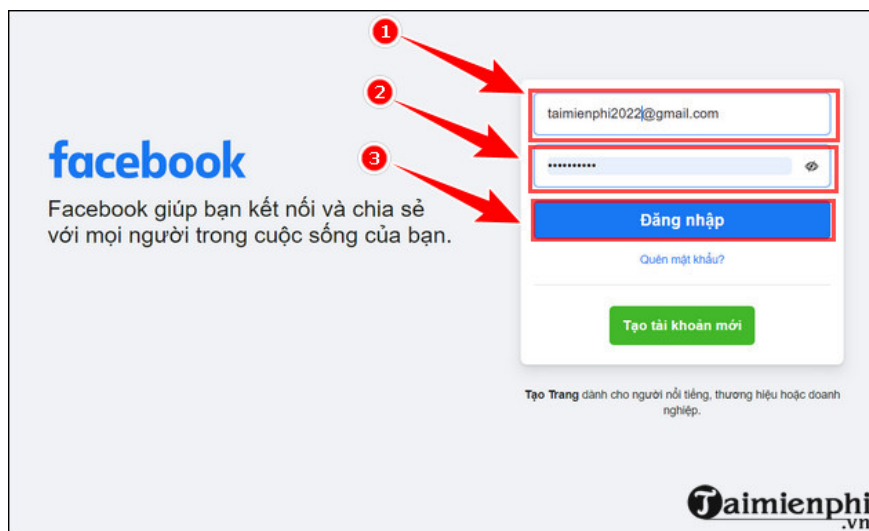

Step 2: The Facebook homepage appears. **Fill in all the required information** in the blank fields => click **Log in** .

- **As shown in the image:**

+ **Position 1:** Enter your Gmail account (the account you used to register for Facebook): You need to enter your Gmail information completely (including the extension, for example, @gmail.com)

+ **Position 2:** Enter your **Facebook login** password

+ **Position 3:** After entering your Gmail address and Facebook password, click **Log in**

Facebook login interface using Gmail on Windows and Mac computers.

2. Log in to Facebook on your Android phone.

For Android devices, you first need to install the Facebook app on your phone. It's lightweight, compatible with many operating systems, and you just need to access the link below and select install.

- Download: **Facebook for Android**

Step 1: After installing the latest version of Facebook on your Android device, **open the Facebook app** .

Step 2: Enter **your Gmail address** and **password** (Facebook password) => press **Log in** .

Log in to your Facebook account using Gmail on your phone.

3. Log in to Facebook on iOS, iPhone

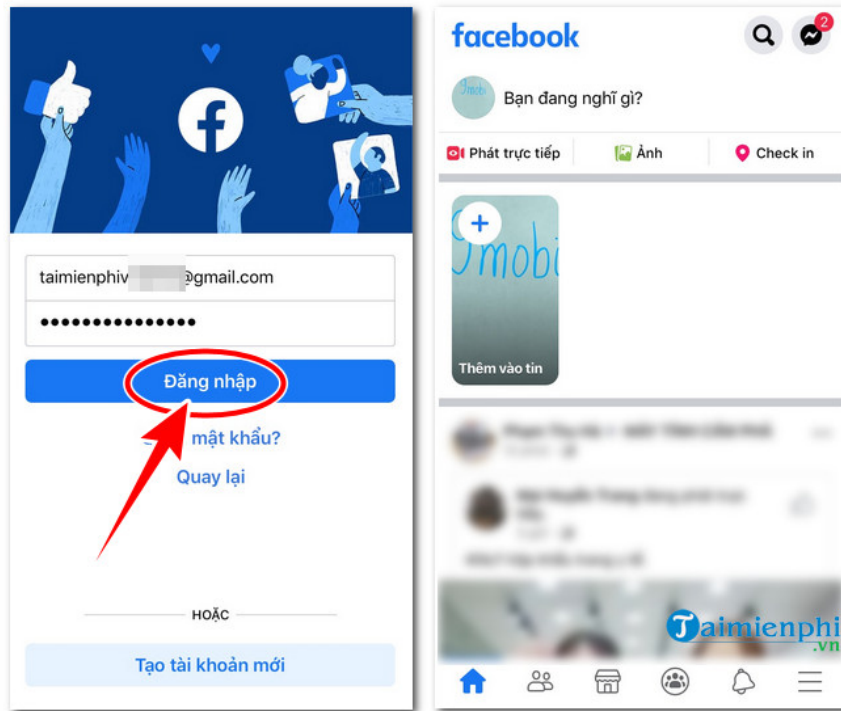

Similar to Android, you first need to install the Facebook app on your iOS device. Prioritize the latest version for a smoother login process. The latest version often adds new features and functionalities that users can customize to their personal style.

- Download: **Facebook for iPhone**

Step 1: Open the Facebook app via the FB icon on your device's home screen.

Step 2: Fill in all the required information, including your **Gmail** and **Facebook password** , then select the **"Log In"** button .

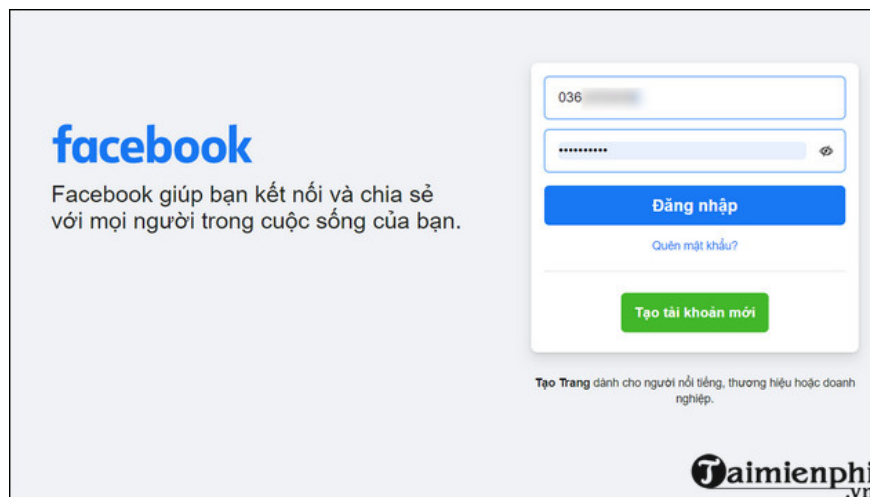

- And now you can freely browse Facebook on your phone using your Gmail account.

The interface after logging into Facebook on iOS is slightly different from Android, but the functionality is the same.

How to log in to Facebook using your phone number

Logging in using your phone number is similar to logging into Facebook using Gmail. You need to enter your registered (or linked) phone number, password, and click **Log in** to use Facebook.

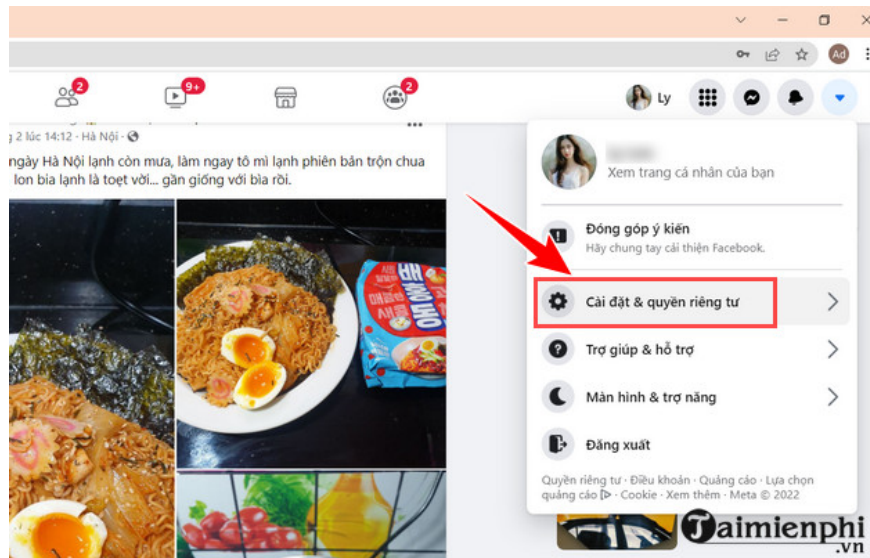

* If you haven't activated Facebook login using your phone number, you need to log back into Facebook using Gmail and then follow these instructions to activate this option.

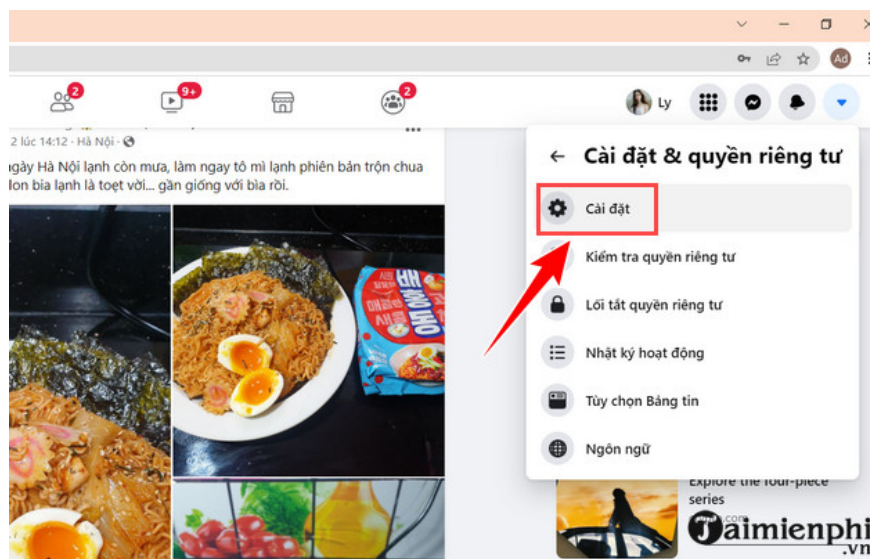

1. Add a phone number to log in to Facebook on the old interface.

For new Facebook users, the interface hasn't been changed yet, and the method for adding a phone number to log in will be different from the new interface. Therefore, if your Facebook interface is old (not yet updated or redesigned), you need to:

Step 1: From your Facebook profile page, click the downward-pointing **triangle** icon => Select **Settings & Privacy** .

Step 2: Here, select the **Settings** option .

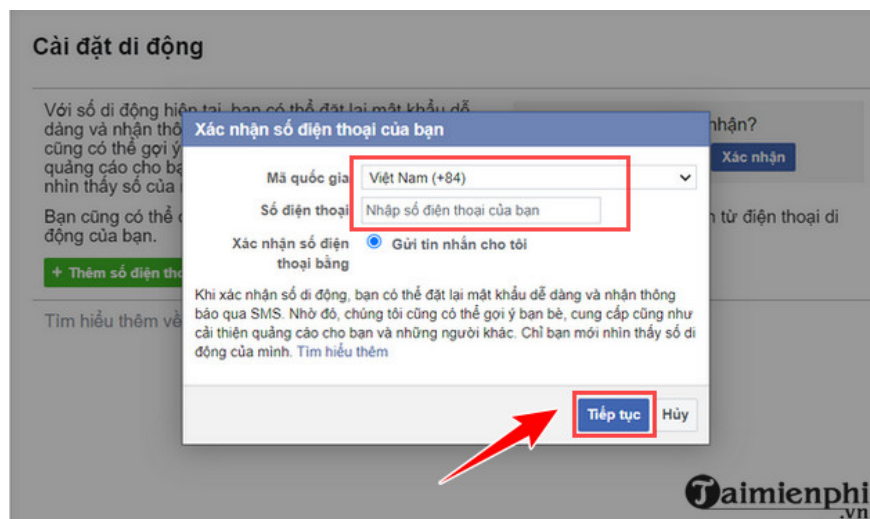

Step 3: Click on **Mobile** , then select **Add a Mobile** (add phone number).

Add a phone number to use for future Facebook logins using your phone number.

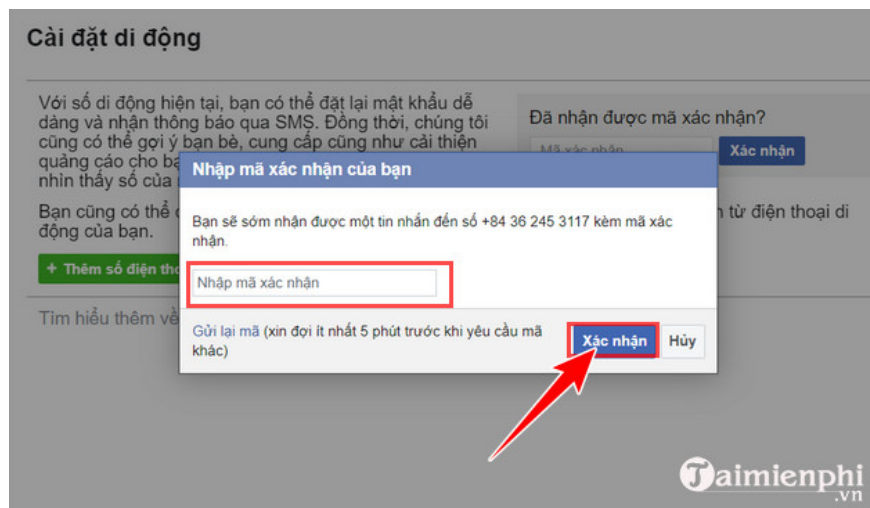

Step 4: Here, simply select your **country code** and **enter your phone number** so Facebook can send a verification message to that number.

- The code will be sent to your phone immediately.

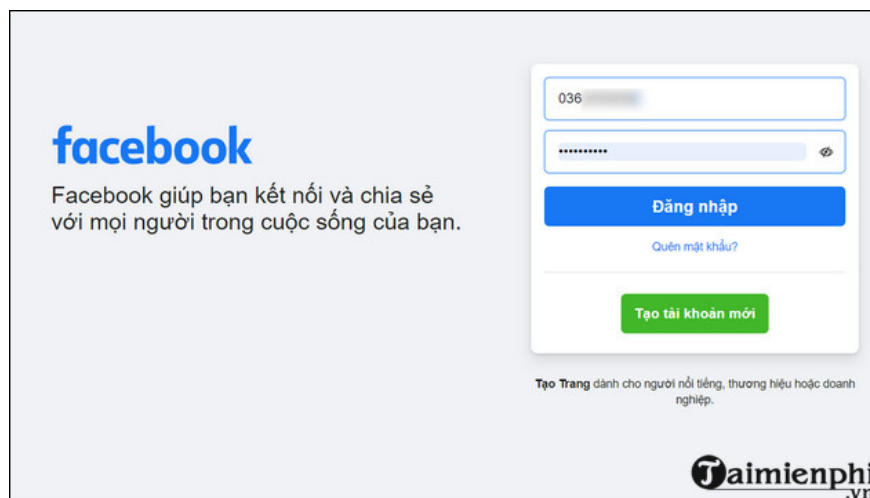

- Take that code and confirm it in the box => select **Accept**

Step 5: Simply save the settings.

Step 6: Finally, **log out of Facebook** and then return to the **Facebook login** page . Now you can log in to Facebook with your phone number.

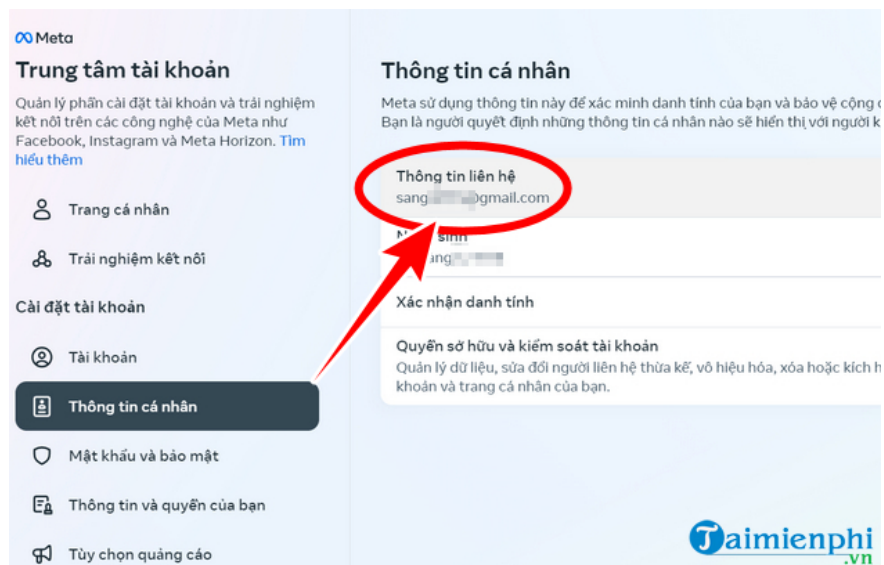

Log in to Facebook using the phone number you just linked.

2. Add your phone number to log in to Facebook on the new interface.

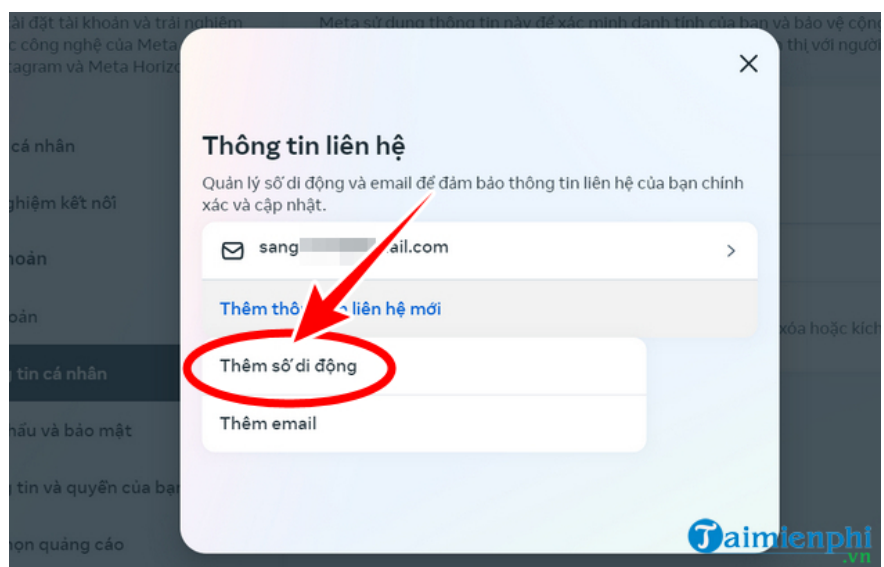

Facebook is currently the most widely used social media platform in the world, so Meta is constantly updating and refreshing its interface with many useful features. You can add or link your phone number to your Gmail account for more convenient Facebook login.

Step 1: Log in to Facebook using Gmail and click directly on **this link**.

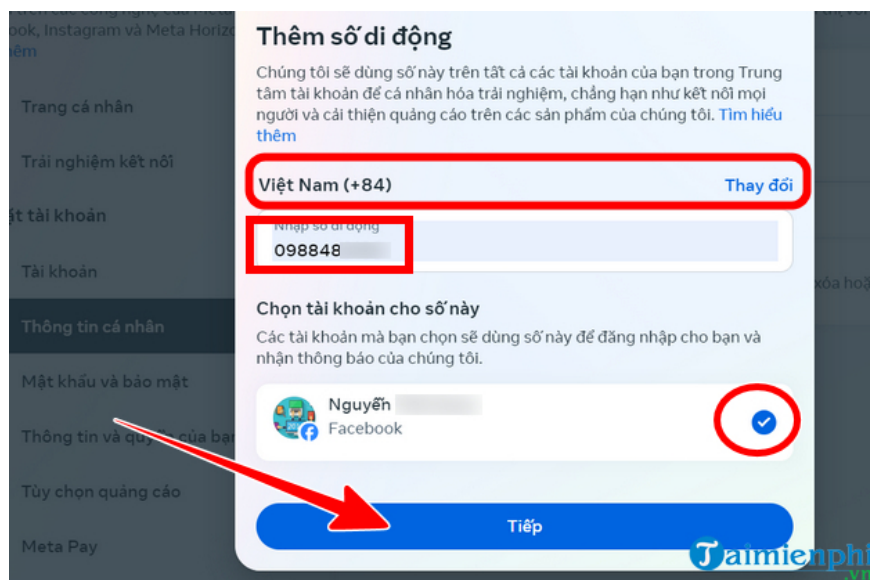

Step 2: On the **Account Center** page , select **Personal Information** => **Contact Information** on the right side.

Step 3: Next, select **Add mobile number** .

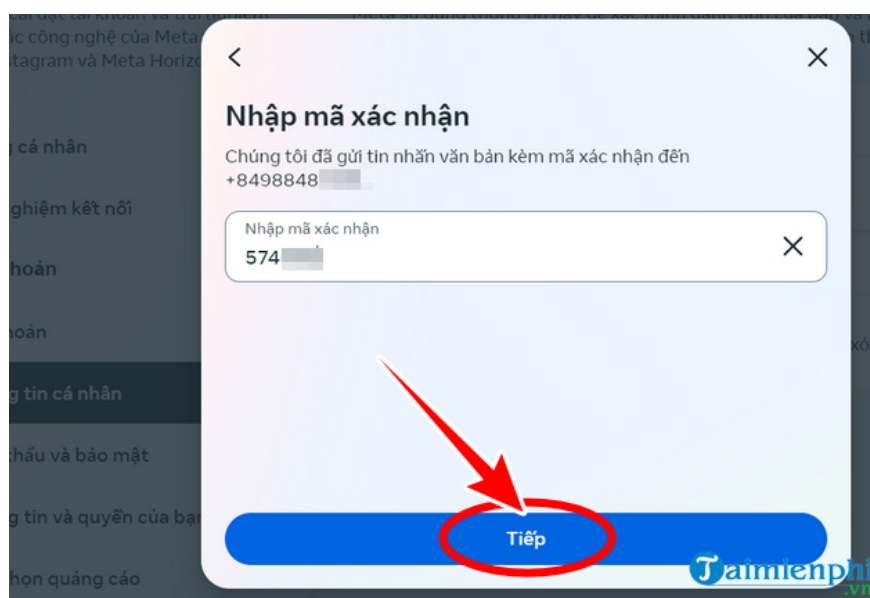

Step 4: Select your current **country** of residence => enter **your mobile phone number** in the blank field => select **the Facebook account** you want to use your phone number to log in to => press **Next** .

Step 5: A **verification code** will now be sent to your phone number. Enter it in the " **Enter verification code**" field and press " **Next**" .

- From now on, you can use that phone number to log in to Facebook.

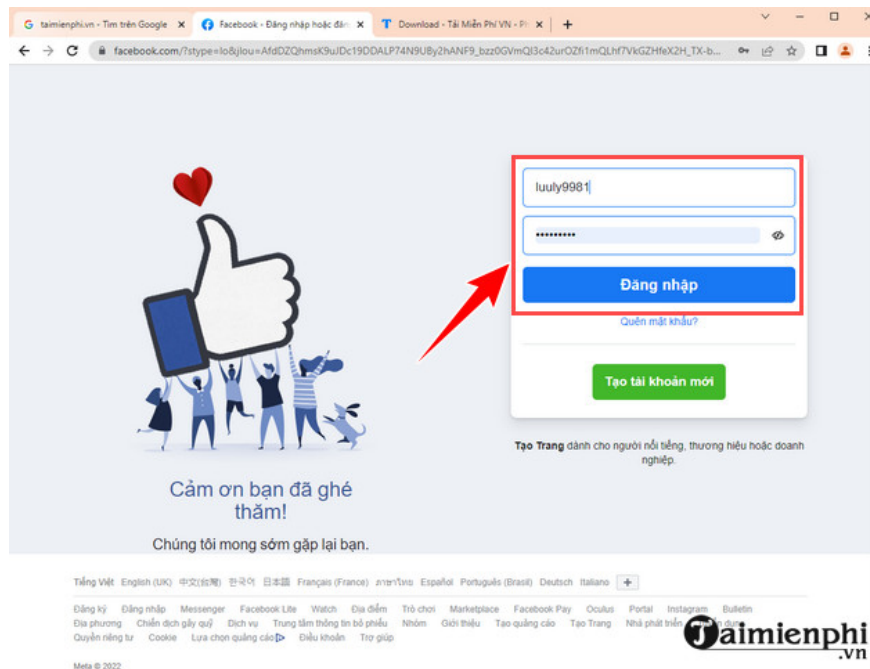

How to log in to Facebook using your username

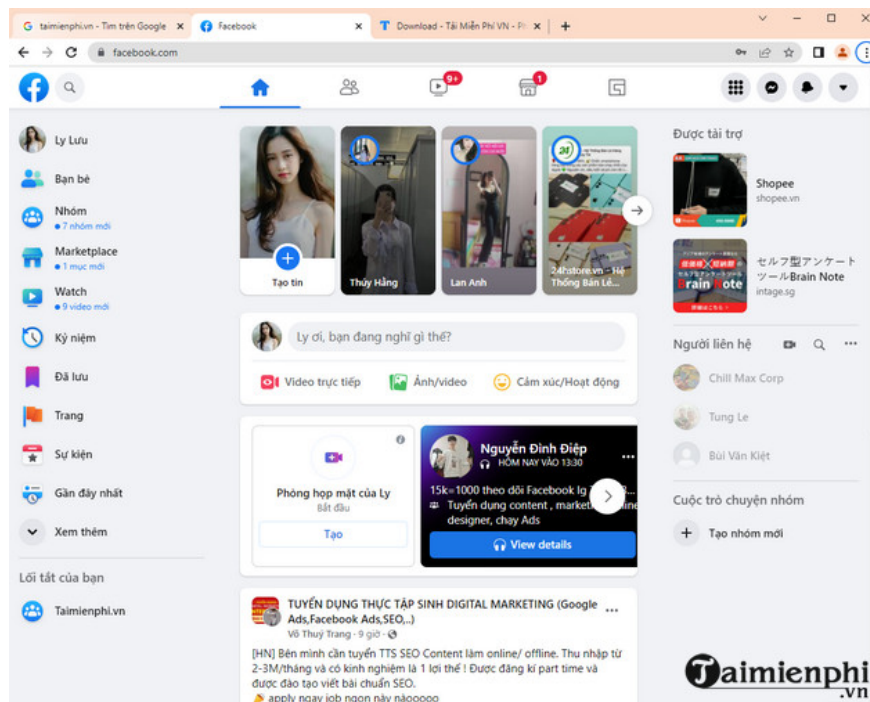

Meta has updated its features to allow logging into Facebook using your username. It's now easy; simply enter your username and password on the login page. This saves time and simplifies the login process. If you don't know where to find your username, you can refer to the instructions below.

1. Log in to Facebook using your username.

Once you have a username, simply **enter it** into the first field (the Gmail address field) on the Facebook Login page => enter your Facebook password => click **Login** and you're done.

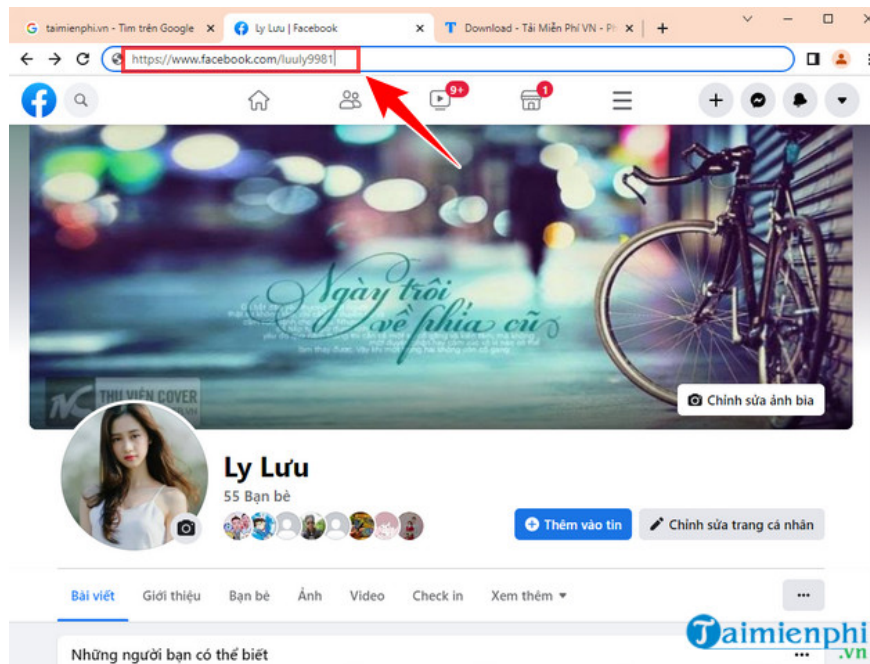

- Results after logging into Facebook using username and password

2. Where can I get my Facebook login username?

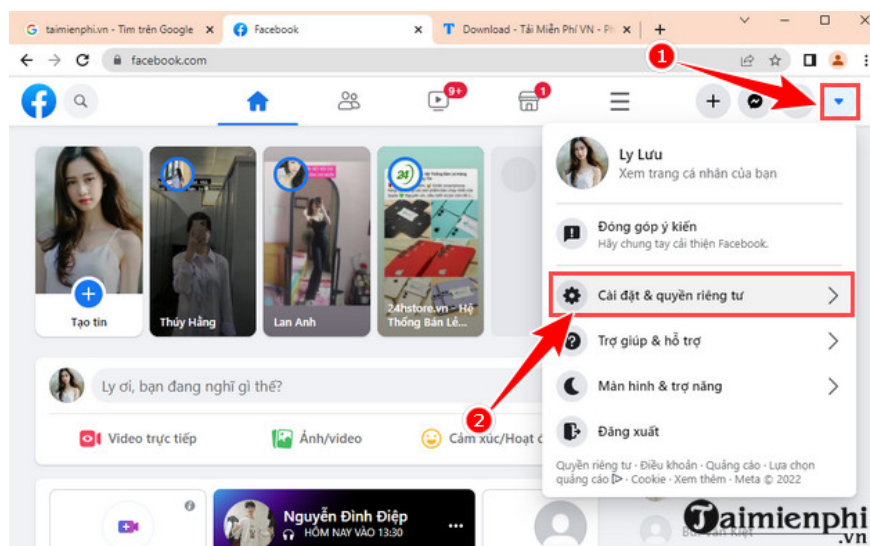

Below are instructions on how to **log in to Facebook** without a verification code on a computer. To find your username, go to your profile page (your Facebook wall). In your browser's Facebook link, you will see your username appear after the link **https://www.facebook.com/ =>** (for example, **https://www.facebook.com/luuly9981 =>** username is **luuly9981**)

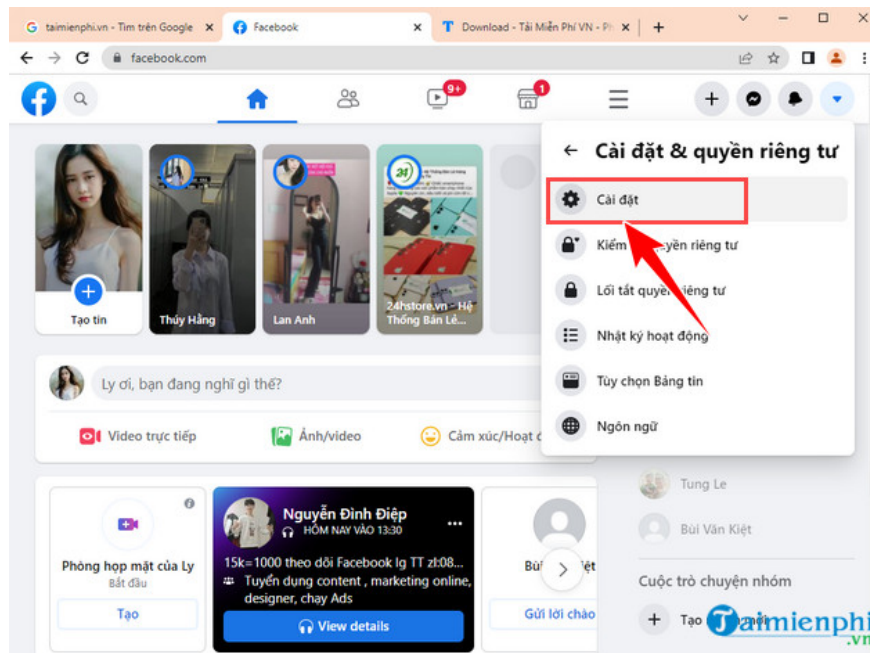

How to log in to Facebook without a password.

3. Set up a username to log in to Facebook.

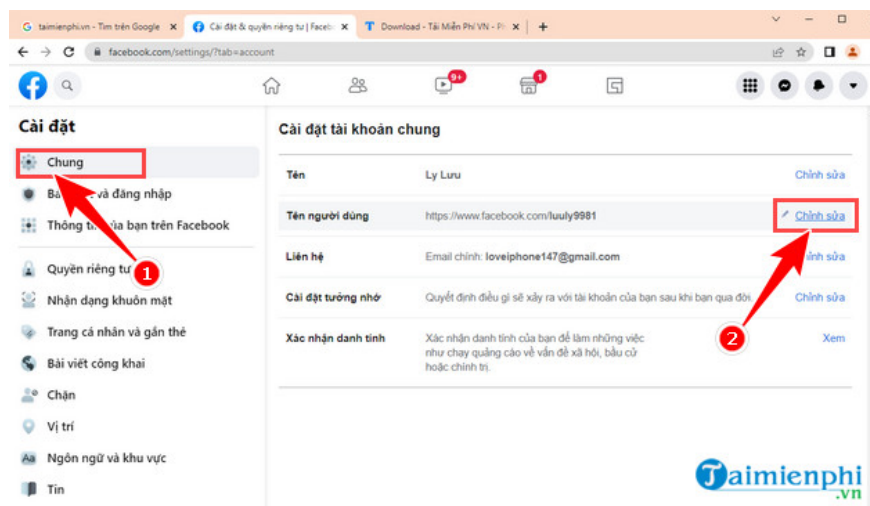

Step 1: After logging into Facebook on your browser, select **the triangle icon** (top right corner of the screen) => Select **Settings & Privacy** .

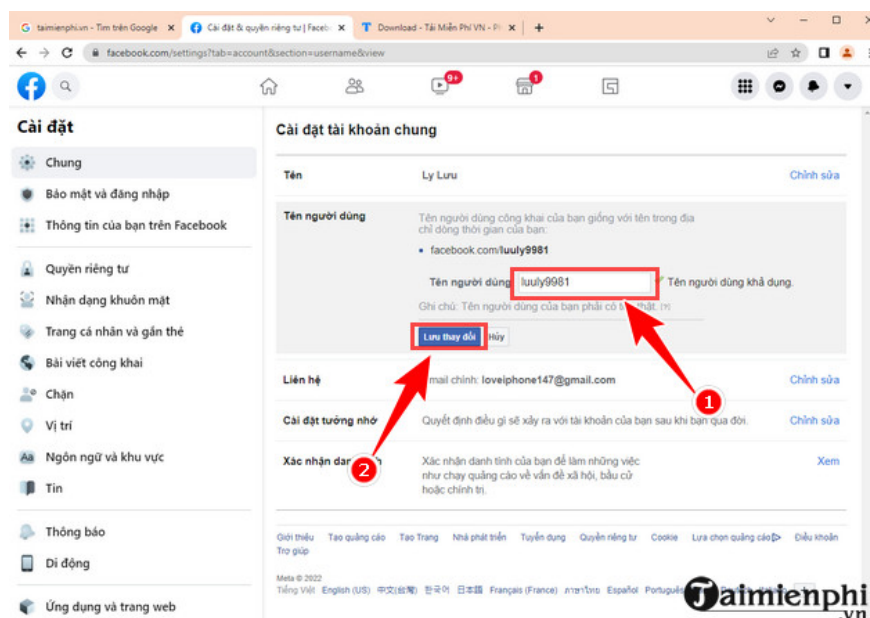

Step 2: Here, select the **Settings** option .

Step 3: In **Settings**, select **General** => In the **general account settings** section , select **Edit username** .

Step 4: Enter your desired username and then click **Save Changes** .

How to log in to Facebook using a picture.

The ability **to log in to Facebook using your profile picture** is a convenient feature that allows you to save your login information in your browser. This makes it easy to switch between different Facebook accounts on the same browser without having to re-enter your login details. When you **log in for the first time**, simply select "**Remember password**," and then, for subsequent logins, just click on the profile picture of the account you want to access.

Note: This method is only applicable to computer users.

Log in to Facebook using a token, no password required.

Logging into Facebook using a token is a method that allows you to access your account without having to enter your login information directly. To do this, you need a valid access token. This token is usually generated using an authentication method such as OAuth 2.0. Once you have the token, you can use it to authenticate and access your Facebook account without having to enter your password. However, using tokens requires special attention to security and access permissions, so be sure to only share your token with trusted applications or services.

Error preventing users from logging into Facebook.

Reasons why users might be unable to log in to Facebook include: entering the wrong username or password, the **Facebook login** page not loading, or Facebook phishing. TipsMake has previously published articles on how to fix these errors; you can refer to "**How to fix Facebook login issues**" and "**Fix Facebook login errors**" to

resolve the problems you are experiencing.

Another reason you might be unable to log in to Facebook is that your internet provider may have blocked your IP address. To fix this, you need to fake your IP address to another country to continue using the social network. You can refer to **the instructions on how to fake your IP address on the Chrome browser** .

If you are unable to **log in to Facebook** on your phone, it could be due to the following reasons: Wi-Fi or 3G/4G network connection issues, DNS problems, or errors within the Facebook app itself. To fix these issues, you can refer to our guide on how to troubleshoot **Facebook login problems on your phone** .

In the previous article, Taimienphi guided you on how to log in to Gmail, access your Gmail inbox to send and receive emails. In general, **logging into Gmail** is not difficult and is relatively easy, similar to **logging into Facebook** using Gmail.

Many internet providers block Facebook, preventing users from accessing it. However, it's not too difficult to log in to Facebook during these times. You can change **your DNS, edit the Hosts file** , or use third-party software like Ultrasurf or Hotspot Shield to easily access Facebook. Of course, if you don't have a Gmail account, the first thing you need to do is **register for Gmail** so you can use it to log in to Facebook.
