

# The simplest and most detailed way to use I12 headphones

I12 Bluetooth headphones are currently very popular on the market, so how to use I12 headphones? Let's find out right below

On the market today, i12 headphones are sought after and loved by many users. So what's special about the i12 headphone line? Find out the information about this headset below as well as how to use the i12 headset.

## Introducing the Inpods i12 Bluetooth headset

Inpods i12 headphones are known to be quite a hot headphone line on the market today. Let's join TipsMake to find out the detailed information of the i12 headphones below.

### What is the Inpods i12 Bluetooth headset?

The i12 Bluetooth headset is a type of Bluetooth headset, considered a copy of AirPods with a similar style and design but a cheaper price. Therefore, i12 headphones are very suitable for those who love Apple AirPods but do not have enough budget to own one. It is not difficult to realize that Bluetooth i12 is one of the most popular types of headphones on the market today.

In general, with a fairly cheap price of only 90,000 VND to 150,000 VND, i12 headphones have superior quality compared to the price range. The sound of the headset is mid-range, but compared to previous versions, the i12 headset has improved sound quality quite a lot. From there, bringing more unique sound experiences to users.

### Design of Inpods i12 headphones

Compared to AirPods, the Inpods i12 clone has larger design specifications. Specifically, the dimensions of the headset are 2.13 x 1.73 x 0.59 inches and weight 80g. The design of this version is quite compact and has many major improvements compared to previous versions of TWS. The battery charging box is designed in the same size, shape and color as the AirPods line. It is quite difficult to distinguish if the two types of headphones are placed next to each other.

### Sound quality

The sound quality of the i12 Bluetooth headset is used to control the HIFI sound sensor to produce quite sharp bass, bright sound, and treble. However, at such a cheap price, the sound quality cannot be compared to the original. However, the Inpods i12 headset still ensures tasks such as listening to music, chatting, and watching movies are extremely stable, better than the price range.

## Used Time

1. Music listening time: From 2-3 hours.
2. Talk time: From 3-4 hours.
3. Charging time: About 1-2 hours.
4. Standby time: 100 hours.

## Device compatibility

Inpods i12 headphones use Bluetooth version 5.0, compatible with mobile devices that support Bluetooth and use iOS and Android operating systems.

## How to use i12 headphones is simple

In fact, how to use the Inpods i12 headset is not too different from other Bluetooth headsets. Let's learn how to use the i12 Bluetooth headset right below.

### How to connect i12 headphones to the phone

How to connect i12 Bluetooth headset to the phone as follows:

1. **Step 1:** Take the headset out of the charging box, turn on Bluetooth on the phone.
2. **Step 2:** After turning on Bluetooth, the phone will search for Bluetooth-connected devices around. You search for the device name InPods i12 and then connect.
3. **Step 3:** When the phone reports entering connected mode, you can use the headset.

### Features of i12 headphones

With a low price, i12 TWS still has full features to meet all user needs.

#### *When listening to music*

1. Touch once: Stop or continue listening to the song.
2. Tap twice: To increase or decrease volume.
3. Tap 3 times: Call Siri or skip tracks.

#### *When answering the phone*

Touch once: Answer the phone, end the call.

## How to charge i12 headset battery effectively with charging box

Many people who are new to using i12 headphones are often confused about how to charge the battery. If so, let's see how to charge i12 headphones with the charging box right below.

1. **Step 1:** Prepare the cable suitable for the charging box.
2. **Step 2:** Plug the charging cable into the charging box and wait for the battery to be fully charged. When charging, the body of the charging box will display a flashing red light, but when the battery is fully charged, it will turn green or stop flashing.

## Some notes when using i12 headphones

If you want to prolong the life of your headphones, users need to note the following things:

1. Place the headset in the charging box immediately after use to avoid scratches or loss of the headset.
