

The simplest but most controversial puzzle answer!

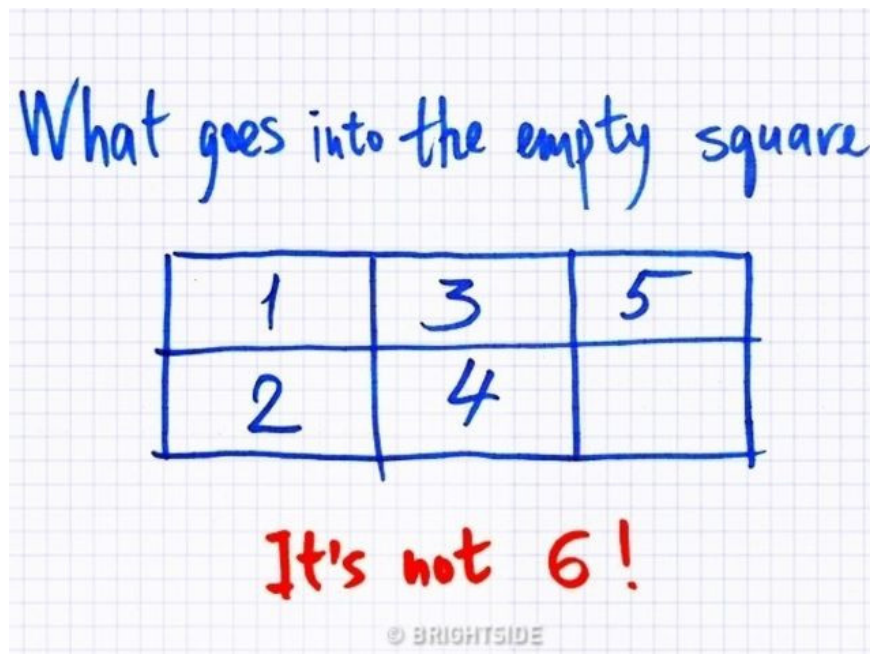

Surely you will not expect that simple question answer is that way!

Sometimes, solving logical questions and complex problems is much more difficult than what we initially saw. On the **Bright Side** page challenge you to read this simple math. Before solving this puzzle, pay attention to the suggestions outside.

Although the people claiming the riddle are not related to math knowledge, there are certainly many people who still try to find answers according to arithmetic rules and cannot give the correct answer.

A seemingly simple puzzle is introduced as follows:

Please fill in the series in the picture below:

The article states that the answer is not number 6, so of course, the way of thinking from the number of numbers from 1 to 6 cannot help the solver find the correct answer. At first, this seemingly simple puzzle made it difficult for many readers.

Answer

THE CORRECT ANSWER IS R.

The table wasn't a math problem. It's a common five-speed shift pattern you see on a gear stick in cars with manual transmissions.

When looking at the answer, surely many readers will assume that this answer lacks convincing. However, the one who suggested this suggestion did not require math knowledge. Therefore, it is necessary for the prize-taker to use the destructive way of thinking, approach the problem in different directions.

In fact, this is a sign on the **number of cars** and the main answer is **R**. Only one of the few readers gave the correct answer. In which there is a detailed explanation of an unnamed reader, many people agree that: "*In my opinion, this series is the same as the number of cars: 1-2-3-4-5-R: Return (return) when the car runs up the hill, I go 1 and then 2, 3 4, if running face flat, I run number 5, and if I want to go back, I have to use R (return) of the gear lever*".

When not using math skills will help you solve this difficult puzzle - all you need to do is think differently and use new approaches. If you solve this puzzle, congratulations, you are a very intelligent person. Be proud of yourself!
