

The slug race - the strange slow-motion race in human history

Norwich, England, organized an international race for slugs. Perhaps this is the most exotic race in the world. With the highest high-speed movement of 2.8 mm / sec, the slugs had to undergo a rigorous training process to achieve the perfect fitness before competing one millimeter at a time.

Norwich, England, organized an international race for slugs. Perhaps this is the most exotic race in the world. With the highest high-speed movement of 2.8 mm / sec, the slugs had to undergo a rigorous training process to achieve the perfect fitness before competing one millimeter at a time.

You must be curious about this fascinating race. Slugs will be placed between 3 circles drawn on a damp cloth. The first athlete to reach the outer ring will win the championship. Anyone can bring their own snails from their garden to join the competition.

But surely you will need a lot of patience to cheer the athletes in this exciting race on the runway to the finish line.

Do you find this race interesting? Now come along with some extremely interesting facts about creatures that are considered the symbol of this slow.

Snails can last up to 25 years depending on the species

They exist almost anywhere on Earth
