

The Smallest Hotel Rooms in the World

Hotel rooms aren't always as big and comfortable as you might think. Here are some of the world's smallest hotel rooms.

Those with claustrophobia should probably look elsewhere for lodging. But for adventurous travelers looking for something cozy, these five tiny, space-saving hotel rooms might be just the thing.

Though small, these capsule hotels solve the problems of space, cost, and privacy in a unique way that makes them more of an adventure than a room downgrade. Indeed, the idea behind them makes sense, if you can get over the fear of sleeping in such a small place.

Capsule Inn (Osaka, Japan)

Japan invented the idea of the capsule hotel, and one of the most authentic experiences is Capsule Inn in Osaka.

Opened in 1979, this micro-hotel was designed by Kisho Kurokawa, who maximized efficiency in this capsule concept. The rooms, which feel like a series of capsules on a spaceship, were originally intended for business travelers, but have evolved into a general concept for anyone who wants a room with just enough room to sleep.

Panda Pod Hotel (Vancouver, Canada)

Canada's first capsule hotel, Panda Pods is sleek, simple yet comfortable, with drop-down tables and enough room for one person. The idea behind the capsule hotel here is to address the high cost of accommodation in one of the world's most expensive cities.

CityHub (Amsterdam, Netherlands)

Amsterdam seems like a natural fit for these Tetris-inspired little pods. They are soundproof, and have adjustable lighting and colours. With many young people travelling to Amsterdam, this could be a fun alternative to shared hostels. The reception area is a lounge and bar, with hosts offering guided tours of the city.

TubeHotel La Tatacoa (Villavieja, Colombia)

Located on the banks of the Magdalena River, this innovative hotel takes camping to its fullest and turns it into a fun, upscale experience. Each room is housed inside a brightly painted concrete tube with small windows, curtains, a king-sized bed and storage. The 'suites' are located on a campsite with a communal pool, bar and restaurant, and shared bathrooms.

Das Parkhotel (Germany)

Yes, technically you'll be sleeping in repurposed (or unused) sewer pipes. But the accommodations are surprisingly modern and comfortable, with hand-painted murals inside each pipe, and built-in storage, lighting, and smart charging.
