

# The super product of 6 million screens 'eats up' the Galaxy S23 Ultra revealed, the flawless design overshadows the iPhone 14

Vivo's new smartphone model with a giant 6.8-inch screen larger than the Galaxy S23 Ultra will have a fresh and attractive design that makes the iPhone 11 and iPhone 14 bow.

Today, a Blogger has revealed the actual image of the vivo Y36, which is expected to be a new breeze in the low-cost smartphone segment. This is the version that appeared right after the vivo S17e was announced a few days ago in Vietnam. Vivo Y36 will launch in Indonesia on May 25 and may be an alternative to vivo Y35 with a selling price from VND 6.1 million.

Coincidentally, a Blogger from Indonesia named PassionateGeekz also shared an actual photo of vivo Y36 confirming its design. The leaked image shows that the device has a boxy design with a back and flat edges that are somewhat thinner than the iPhone 11. The camera module has two large lenses, a design that has appeared on

many Vivo devices before. and iQOO.

According to rumors vivo Y36 possesses a sleek and modern design with a dynamic glass structure. It has a rectangular camera module on the back and a centered punch-hole display on the front. The device integrates a fingerprint scanner mounted inside the power button for convenient and secure access.

vivo Y36 can offer a larger 6.8-inch LCD screen than the Galaxy S23 Ultra (6.7 inches). The screen will also have a punch hole on the front, providing a much more spacious display space compared to the iPhone 14.

As a low-cost device, vivo Y36 is rumored to be equipped with Snapdragon 680 processor, providing reliable performance and smooth multitasking. With 8GB of RAM and improved virtual RAM technology, the device is expected to deliver seamless performance, even in resource-intensive tasks like graphics-heavy games.

Additionally, users can enjoy ample storage space with the rumored 256GB of internal storage that holds their apps, files and media. vivo Y36 is likely to be equipped with a 5,000mAh battery that supports 44W fast charging, allowing quick recharging. Its camera setup includes two sensors with LED flash.
