

The 'super quartet' in the village browser is compared

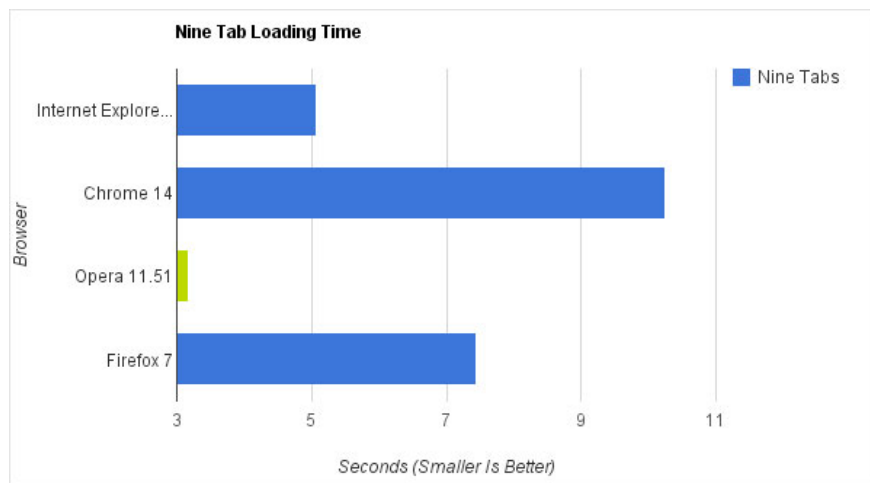

Mozilla has just launched the latest generation of Firefox 7 and it is immediately compared to the top competitors including Chrome 14, Internet Explorer 9 and Opera 11.51.

Mozilla has just launched the latest generation of Firefox 7 and it is immediately compared to the top competitors including Chrome 14, Internet Explorer 9 and Opera 11.51.

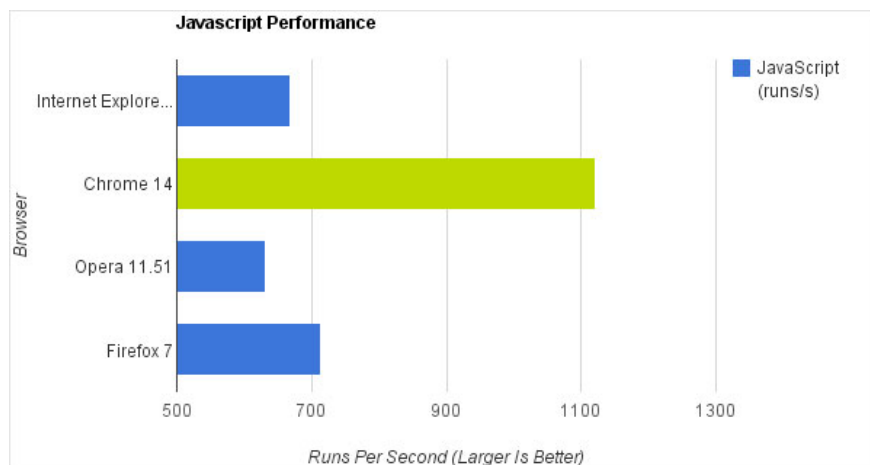

The 7th generation "Fire fox" will consume 20-30% less memory than the old version, enhance HTML5 support . *LifeHacker* technology page has compared boot speed, tab opening, JavaScript power, "7" RAM of Firefox 7 with 3 other popular browsers. Testing was done on Windows computers, so Apple's Safari browser is not on the list.

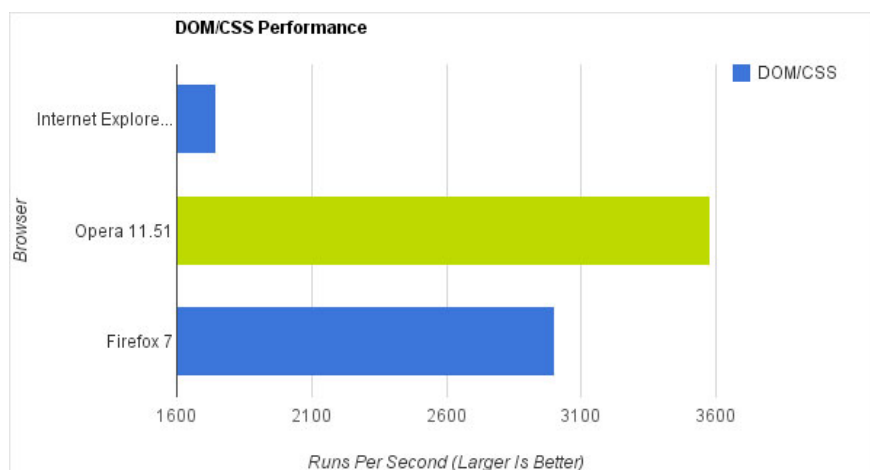

Boot time: Opera boots super fast (only for nearly 4 seconds), followed by Firefox 7. Internet Explorer, like many previous tests, ended with 11 seconds.

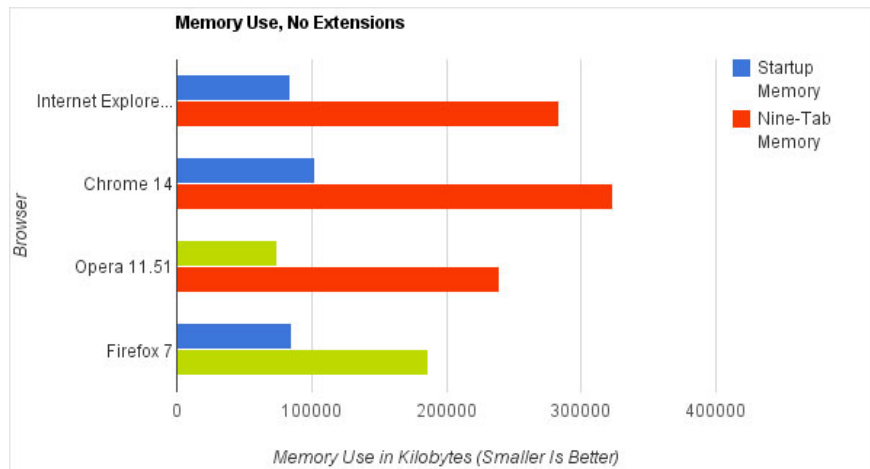

Tab opening time: Opera continues to be champion when it takes just over 3 seconds to open 9 tabs, followed closely by Internet Explorer for 5 seconds and Firefox 7 for more than 7 seconds.

JavaScript power: However, in terms of JavaScript capabilities, Chrome beat all rivals and Opera scooped up the table.

CSS (page layout language, styling for web page components): Opera continues to show its CSS power while Chrome fails during LifeHacker testing so it is not included in this list.

Ability to save memory: Opera is famous for being a browser with little memory on the computer and this is demonstrated by the above results. Firefox 7 is equally excellent.

This test only focused on performance and **Opera 11.51** rated 82%, **Firefox 7** was 73%, **IE9** was 47.5% and **Chrome 14** was 43%. However, users may also be interested in many other criteria such as speed, integrated applications (add-on, extension, plugin), customization ability .
