

The ThinkPad X100E 'Super' mobile is priced at 10 million dong

With small design, fashion and strong configuration, Lenovo's latest laptop makes many people change their thinking about ThinkPad.

With small design, fashion and strong configuration, Lenovo's latest laptop makes many people change their thinking about ThinkPad.

In addition to traditional black, the X100E also has red and silver versions. It has a very compact size and weighs only 1.5 kg. Like the new models today, X100E is also designed by Lenovo with chiclet keyboard, so that not only minimizes the noise but also brings a comfortable feeling to the hands when writing documents.

What this fashionable ThinkPad is the most surprising is its excellent waterproof ability right on the keyboard. Below the keyboard, the X100E's touchpad is also designed extensively, while supporting multi-touch, making it easier to control the mouse pointer.

On both sides of the body, the connectivity ports of the ThinkPad X100E are discreet in plastic housing to ensure aesthetics for the product, including 3 USB ports, VGA, card reader slots. In addition to built-in Bluetooth and Wi-Fi, 3G network connectivity is also a reasonable option on this laptop.

First appearing in the ThinkPad line, the 1.6 GHz AMD Athlon Neo MV-40 processor and 2 GB of internal memory yielded surprising results when the X100E ran smoothly on Windows 7 Professional operating system. The time from pressing the power button to booting the machine until the desktop appears is only 30 seconds.

Easy handling of rich applications in Windows 7 but the absence of discrete graphics is the reason why the X100E is quite *sluggish* when running professional graphics software such as Photoshop, Corel or typical 3D games.

The X100E has an 11.6-inch screen with bright and vivid colors and a resolution of 1366 x 768 pixels, satisfying the demand for watching HD movies. Speakers are located right below the body of the camera to create a sound effect quite good.

The ThinkPad X100E is also equipped with a webcam with clear picture quality. At the same time, EnergyStar certified energy-saving mechanism also allows the machine to operate continuously for 5 hours with a 6-cell battery.

The ThinkPad X100E is sold in Vietnam via Nhat Huy distributor with a starting price of 500 USD (about 10 million VND).
