

# The top most 'audiovisual' laptops available today

Laptops for entertainment needs such as watching movies, listening to music ... still have specific requirements such as high-resolution screens, terrible hard drives for storage, good sound. Here are the laptop models to serve the needs of good entertainment today.

**Sony Vaio F, MacBook Pro Retina, HP Envy 17 . are the top multimedia entertainment laptops today.**

Laptops for entertainment needs such as watching movies, listening to music . still have specific requirements such as high-resolution screens, "terrible" hard drives for storage, sound good. Here are the laptop models to serve the needs of good entertainment today.

## Sony Vaio F

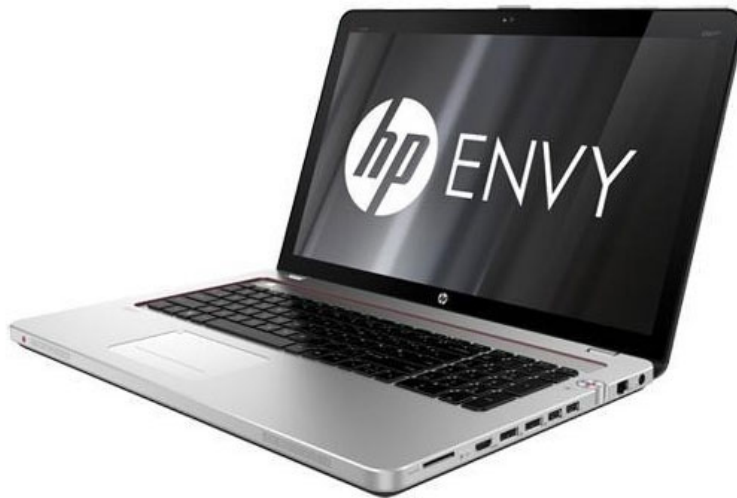

**Sony Vaio F** is a high-end laptop from Sony equipped with Intel Core i processor, 4GB RAM, 500 GB hard drive with 5400 rpm, Nvidia GeForce GT 540M graphics card, Blu-ray drive ray. Vaio F uses LED backlight screen with Full HD resolution of 1,920x1,080 pixels, Blu-ray optical drive.

## MacBook Pro Retina

This is currently the **most advanced MacBook of Apple** with a very high resolution Retina display 2880x1880. The standard MBP 15 inch retina is also equipped with a quad-core Core i7 2.3GHz, 8GB Ram, 256GB SSD, GeForce GT 650M GPU.

## HP Envy 17

This is considered a high-end entertainment machine from HP computer company. Machine with high quality aluminum design, full HD resolution screen.

Recently, HP also upgraded this machine to Haswell chips, NVIDIA GPUs, 2TB hard drives, 4 external speakers, two subwoofer controllers, and Beats Audio brand sounds that promise high quality audio. With a

super-sharp screen and high sound quality, the Envy 17 still deserves to be one of the most advanced entertainment laptops.

## Dell XPS 15z

Under the high-end entertainment line of Dell, XPS 15z is equipped with 15.6-inch screen full HD 1080x1920, Core i chip, 8 GB RAM, 750 GB hard drive. The design of the XPS 15z is also very beautiful with monolithic aluminum with attractive curves.
